A Flock of Beautiful Birds Library Company of Philadelphia, 1977 *Studer's Popular Ornithology ...* Jacob H. Studer, 1878 *The Ornithologist and Oölogist* , 1881 The Journal of the Maine Ornithological Society Maine Ornithological Society, 1907 *Ornithologist and Oölogist* , 1886 **Early Southwest Ornithologists, 1528-1900** Dan Fischer, 2021-11-16 With its colorful landscape and wonderful diversity of plant and animal communities the southwestern borderlands have attracted naturalists for centuries As Col Thomas Henry noted in 1853 there are to be found many curious birds peculiar to the country This book identifies more than 100 early ornithologists and explorers who entered the Southwest from 1528 to 1900 all of whom have contributed in significant ways to our understanding of the region s avian life Dan Fischer identifies those individuals who documented the natural history of the Southwest and summarizes their contributions to our knowledge about the region s birds particularly through discovering and naming them He tells why the ornithologists came to the region what they saw who described and named the new discoveries and who were the first to sketch or paint new birds Beginning with accounts of the earliest Spanish explorers such as Cabeza de Vaca and Coronado Fischer considers all who visited the region through the end of the nineteenth century including such renowned naturalists as William Gambel John McCown Adolphus Heermann Elliott Coues Charles Bendire and Henry Henshaw In between he recalls English mining speculators French traders army explorers railroad surveyors and more all of whom contributed to ornithological knowledge Although focusing on ornithologists Fischer s text reveals the wonderful variety of avian species in the region and their relationship with human history Featuring a comprehensive bibliography illustrations and maps that portray the westward march of exploration it is a major sourcebook for southwestern ornithology and an essential volume for anyone interested in birds The History of Natural History Gavin D. recovery of nature as an emotionally charged practice J rgensen argues that the recovery of nature identifying that something is lost and then going out to find it and bring it back is a nostalgic practice that looks to a historical past and relies on the concept of belonging to justify future oriented action The recovery impulse depends on emotional responses to what is lost particularly a longing for recovery that manifests itself in such emotions as guilt hope fear and grief J rgensen explains why emotional frameworks matter deeply both for how people understand nature theoretically and how they interact with it physically The identification of what belongs the lost nature and our longing the emotional attachment to it in the present will affect how environmental restoration practices are carried out in the future A sustainable future will depend on questioning how and why belonging and longing factor into the choices we make about what to recover The Condor ,1901
