L'immuno-nutrition Bernard Weber, Camille Lieners, William Amzallag, Docteur Dominique Rueff, 2018-04-26 Aujourd'hui personne ne doute plus du rôle primordial de la nutrition tant en prévention des risques cardiologiques cancérologiques et plus généralement des grandes maladies de nos civilisations qu'en accompagnement des traitements spécifiques de ces maladies Si la communauté scientifique s'est aujourd'hui unifiée autour d'une alimentation diversifiée riche en fruits et légumes en fibres appauvrie en mauvaises graisses et apportant suffisamment de nutriments d'antioxydants et d'acides gras de bonne qualité elle néglige encore trop souvent l'aspect individuel c'est-à-dire la capacité immunitaire et digestive vis-à-vis de certains aliments L

immunonutrition étudie les capacités immunitaires de chacun tolérer tel ou tel aliment et les moyens d'augmenter ses tolérances propres. De ce fait nous contrainsons un paramètre essentiel de la bonne santé : l'inflammation chronique. Cette inflammation chronique de notre organisme souvent méconnue est l'origine de toutes ces maladies chroniques de civilisation. Elle les entretient parfois les aggrave et contribue à augmenter le stress oxydatif et accélérer l'évolution de ces pathologies. Maîtriser cette inflammation chronique en se nourrissant en fonction de son immunité spécifique c'est aussi bien augmenter son bien-être, ses performances psychologiques, intellectuelles ou sportives, maîtriser son poids, optimiser son vieillissement et sa longévité que contribuer et aider la guérison de pathologies rhumatismales, cardiovasculaires, digestives, psychiatriques, allergiques, migraineuses et de bien d'autres encore.
