Florence An Architectural Guide:

Florence Guido Zucconi, Pietro Ruschi, 1995 This book looks at how the human brain got the capacity for language and how language then evolved Its four parts are concerned with different views on the emergence of language with what language is how it evolved in the human brain and finally how this process led to the properties of language Part I considers the main approaches to the subject and how far language evolved culturally or genetically Part II argues that language is a system of signs and considers how these elements first came together in the brain Part III examines the evidence for brain mechanisms to allow the formation of signs Part IV shows how the book's explanation of language origins and evolution is not only consistent with the complex properties of languages but provides the basis for a theory of syntax that offers insights into the learnability of language and to the nature of constructions that have defied decades of linguistic analysis including including subject verb inversion in questions existential constructions and long distance dependencies Denis Bouchard's outstandingly original account will interest linguists of all persuasions as well as cognitive scientists and others interested in the evolution of language

Lasansky, 2018-01-10 Tuscany is a landscape whose cultural construction is complicated and multi-layered. It is this very complexity that this book seeks to untangle. By revealing hidden histories we learn how food landscape and architecture are intertwined as well as the extent to which Italian design and contemporary consumption patterns form a legacy that draws upon the Romantic longings of a century before. In the process this book reveals the extent to which Tuscany has been constructed by Anglos and what has been distorted, idealized and even overlooked in the process **Architectural Guides**

Lorenzo Capellini, Domenico Cardini, Carlo Cresti, 1998 Each volume includes information about public transportation and maps denoting each city's monuments from the Roman era to developments of this decade. Development of Cities in Northern and Central Italy Paul N. Balchin, 2022-02-19 Originally published in 2019, this book provides a comprehensive account of a formative historical period uniquely describing Renaissance architecture as the physical manifestation of political and economic change. The book illustrates how shifts in architectural style and design were paralleled with Northern and Central Italy's external and internal conflicts, the evolution of urban and regional government and economic and demographic growth. Covering the full extent of the Renaissance period, Balchin charts the era's medieval roots and its transformation into Mannerist and Baroque tendencies. He demonstrates how developments in architecture and planning were inextricably linked to political and economic power and how these relationships shifted from city to city over time *Florence on the Road City* Laura Andreini, 2018-01-04

A contemporary guide to the architecture of Florence, the purpose of which is to tell about the city through its architectural works. The book's jacket opens out into a map marking the locations of the architectural works and interesting sites to visit. Includes general information about Florence and useful tips for travelers. Each entry includes a photo of the whole building, architectural drawings, a short description and facts including architect, year of construction, address, website and how to visit. Florence is aimed at showing how one of the Italian cities most strongly linked with its past, the quintessential symbol of the Renaissance period, conceals a myriad of innovative architecture. Florence is not a static city. It has often been guilty of long delays and a certain lack of courage in assimilating new approaches, but its way of introducing contemporary architecture into a consolidated context is unique. Changes with great impact began in Florence at the end of the 19th century with the urban planning transformations designed by Giuseppe Poggi. The strongly defined limits of the historic center became blurred with the demolition of the fortifications and the city was opened up to permit expansion. In the 1930s the Rationalist design of the Santa Maria Novella Station introduced a new form of architectural expression into the historic center and outskirts of the city. This is the building that begins the itinerary.

proposed in this guide a chronological but also a physical beginning a starting point for visitors to begin their architectural excursion
