France Today Introductory Studies:

France Today John Flower,1990 *The National Front in France* Peter Davies,2012-11-12 This provocative and non polemic study explores the value system of the National Front movement in France and explains the way in which the movement s ideology has been formulated and articulated in the 1980s and 1990s Also discussing the crucial role of Le Pen this book provides a fascinating enquiry into the most controversial political party in contemporary France Jacques Derrida and the Institution of French Philosophy Vivienne Orchard,2017-12-02 Jacques Derrida 1930 2004 was unquestionably one of the most celebrated and reviled French thinkers of the last thirty years Outside France his influence in comparative literature circles through deconstruction and other ideas has been so profound that his personal role as a leader of contemporary French philosophy has been almost overlooked Perhaps because there is no equivalent in English speaking countries to the timetabling of philosophy in the French education system writers on Derrida outside France have not fully appreciated the importance of this political and cultural struggle In this ground breaking book Orchard examines a hard fought debate of great importance not only to Derrida himself but also to France s idea of what studying philosophy might mean after the student uprisings of 1968 **Studying and Working in France** Russel Cousins,Ron Hallmark,Ian Pickup,1994-12-15 This is a substantially revised updated and expanded version of the authors Student Guide to French Universities It should be of interest to all English speaking students both linguists and non linguists who need practical advice when planning to study or work in France General information is given on the French higher education system work placements assistantships accommodation life in the student community and procedures for coping with French bureaucracy The reference section includes a presentation of some twenty universities their towns and local amenities a glossary of terms and appendices designed to complement the guidance given in the text on communications with employers or academic or public authorities **Sociolinguistics and Contemporary French** D. E. Ager,1990-12-13 This textbook deals with the ways in which French is used in different circumstances and settings in France and abroad with the language attitudes of French speakers and with language policy It is concerned not only with the linguistic data but also the social political and economic environment in which contemporary French is used This is the only up to date introduction to the sociolinguistics of French currently available The exposition is clear and lively and will be welcomed by students and teachers alike **A History of Education for Citizenship** Derek Heater,2003-10-23 In this unique examination of education for citizenship Derek Heater covers two and a half millennia of history encompassing every continent Education for citizenship is considered from its classical origins through to ideas of world citizenship and multiculturalism which are relevant today The book reveals the constants of motives policies recommendations and practices in this field and the variables determined by political social and economic circumstances which in turn illustrate the reasons behind education for citizenship today Sections covered include Classical origins The age of rebellions and revolutions Education for liberal democracy

Totalitarianism and transitions Multiple citizenship education A History of Education for Citizenship will be of interest to teachers and students of citizenship particularly those concerned with citizenship education It will also be of interest to those working in the field of politics of education and history of education **An Introduction to the French Poets** Geoffrey Brereton, 2022-07-10 The French poetry of some five centuries is here surveyed in a series of studies of the work and personality of individual poets from Villon to the present day Each chapter is primarily concerned with establishing the literary identity of the poet or poets with whom it deals the work of each is outlined and related to the historical and biographical circumstances in which it was written and its characteristics are then examined critically in terms relevant to the modern reader Comparisons are made between different poets and more general topics such as the concepts of classic and baroque are discussed This book first published in 1956 had become a standard introductory work for students of French poetry and general readers alike For this revised edition originally published in 1973 new chapters have been added on irregular seventeenth century poets and on various modern poets whose work now enables the Surrealist movement to be seen in clearer perspective The bibliography has been revised extensively Religion and Politics John T. S. Madeley, 2019-07-15 This title was first published in 2003 This subject area of this work cross cuts conventional disciplinary boundaries in the study of comparative politics Connections between religion and politics can be identified in all of the thematic areas covered by the articles within *Current Research in French Studies at Universities and University Colleges in the United Kingdom* , 1969 **Christian Democracy in France (Routledge Revivals)** R. E. M. Irving, 2010-03-23 Christian Democracy which may briefly be defined as organised political action by Catholic democrats has been a major political force in Western Europe since the Second World War not least in France The aim of this book first published in 1973 is to trace the Development of Christian Democracy in France from its origins in the 1830s to the present day discussing its theories and its importance in French history and politics with particular but by no means exclusive reference to the Fourth Republic 1946-58 when the MRP was one of the key centre parties Dr Irving provides a thorough analysis of MRP its economic foreign and colonial policies and gives reasons for the relative decline of French Christian Democracy in the 1960s This French movement has been little understood in Britain and a thorough history has been badly needed This study will be valuable to all those who in the context of a United Europe wish to understand the political forces at work at its conception It will be valuable especially to students of modern history and politics Postwar Europe Richard Bessel, 2025-07-29 Very Short Introductions Brilliant Sharp Inspiring The Second World War was the most destructive conflict in history It left Europe in ruins its economies severely damaged and millions of its people facing malnutrition its political systems shaken if not destroyed Yet three decades later its economies had recovered it largely appeared politically stable its inhabitants generally were well housed and well fed Then at the end of the 1980s the postwar settlement disintegrated and a new chapter in Europe's postwar history had begun In this Very Short introduction Richard Bessel

presents a clear concise informative account of Europe s history between the end of the Second World War and roughly the end of the twentieth century He explores the conditions in Europe at the end of the war how political life took shape and societies were rebuilt the impressive economic recovery the Cold War division the end of empire and European cultural life Bessel discusses how we might understand the beginnings and endings of the postwar era and emphasises the importance of the experiences and actions of specific generations of Europeans ABOUT THE SERIES The Very Short Introductions series from Oxford University Press contains hundreds of titles in almost every subject area These pocket sized books are the perfect way to get ahead in a new subject quickly Our expert authors combine facts analysis perspective new ideas and enthusiasm to make interesting and challenging topics highly readable
