Franchthi Paralia Fascicle 6 The Sediments Stratigraphy And Offshore Investigations:

Palaeohistoria 45/46 (2003/2004) P. A. J. Attema, M. A. Los-Weijns, N. D. Maring-Van der Pers, Ma Losweijns, Nd Maringvan Der Pers, 2005-12-31 The annual journal *Palaeohistoria* is edited by the staff of the Groningen Institute of Archaeology and carries detailed articles on material culture analysis of radiocarbon data and the results of excavations surveys and coring campaigns

Aegean Strategies P. Nick Kardulias, Mark T. Shutes, 1997 With a long detailed historical record a large corpus of archaeological data and more recently a number of sophisticated analyses of current and previous environmental conditions the Aegean region of the eastern Mediterranean offers a unique setting to explore the evolution of a landscape through time As expanding world markets continue to encroach upon even the most remote and delicate ecological zones anthropologists across all sub disciplines are beginning to find common theoretical and methodological ground within their own discipline and with other ecologically oriented sciences This volume examines the value of such collaborative research by bringing together archaeologists cultural anthropologists ethnoarchaeologists and ecologists to discuss environmentally related issues that affect the European fringe with an emphasis on the Aegean region The contributors bring to light the subtleties involved in understanding the interactive relationship between humans and their environment over time Students and scholars in a variety of disciplines including anthropology ecology classics and history will find this book to be a valuable and original investigation of a dynamic and complex region

Theory and Practice in Mediterranean Archaeology Richard M. Leventhal, John K. Papadopoulos, 2003-12-31 Theory and Practice in Mediterranean Archaeology Old World and New World Perspectives brings together leading scholars from the Old World and the Americas to discuss some of the most pressing issues facing archaeology today These topics include archaeology and text the future of large scale archaeological fieldwork at individual sites interpretation and preservation of archaeological sites and landscapes past trajectories and new approaches to regional survey and debates surrounding landscape and settlement archaeology Essays by Old World archaeologists provide an overview of these themes as well as a history of research over the last hundred years These scholars review the major successes and shortcomings of that work identifying critical issues that determine and define the field These essays serve as a springboard for discussion and response by archaeologists working in the Americas and in other parts of the world The combination of an Old World focus with responses from New World archaeologists provides a uniquely broad assessment of contemporary archaeological theory methods and practice throughout the world

Les Industries lithiques taillées de Franchthi (Argolide, Grèce), Volume 3 Catherine Perlès, 2018-10-26 This fascicle is the thirteenth in the series of Level One publications of the excavations at Franchthi Cave and is the third and final installment of the report on the site s chipped stone industries The objective of Catherine Perlès s study is to make sense of the chronology of the site in its economic technological and typological dimensions All phases of the Neolithic are represented at Franchthi Cave Rich with more than 3 000 reconstructed pieces this study offers a

representative and technical typology that is unequaled today The first part of the analysis offers diagnostic elements to facilitate comparisons between the lithic sequence and surface dating and is more descriptive than interpretive The second part is dedicated to a step by step analysis of the Franchthi material in a well defined chrono stratigraphical framework The third and most interpretive portion of the study addresses itself more specifically to those who are interested in the socio economic organizational problems of Neolithic societies Excavations at Franchthi Cave Greece Thomas W Jacobsen editor with Karen D Vitelli **The Origins And Spread Of Agriculture And Pastoralism In Eurasia** David R.

Harris,2024-11-01 As the first book to examine the origins and spread of agriculture and pastoralism in Europe and Asia as a whole this major contribution should be essential reading for archaeologists anthropologists biologists and geographers Adopting a novel approach to the subject the authors examine it first in terms of seven different disciplinary perspectives social ecological genetic linguistic biomolecular epidemiological and geographical Then 20 case studies are presented which are based primarily on archaeological and biological evidence and which relate to three major regions Southwest Asia Europe and Central Asia to the Pacific The book concludes with an overview of Eurasia as a whole The transition from hunting and gathering to agriculture had revolutionary consequences for human society It led to the emergence of urban civilizations and ultimately to humanity's almost complete dependence on relatively few domesticated animals and plants The subject has been much studied but the results have tended to be interpreted largely in terms of local cultural sequences with insufficient comparison made with evidence from other areas In contrast this book provides a continental scale framework with its scope extended to pastoralism because in Eurasia both the raising of livestock and the cultivation of crops were integral components of the agricultural revolution from its inception some 10 000 years ago Comprehensive and authoritative The Origins and Spread of Agriculture and Pastoralism in Eurasia should appeal strongly to the wide readership of students and specialists concerned with the prehistoric antecedents of modern civilization *Flexible Stones* Anna

Stroulia,2010-03-30 Despite their ubiquitous presence among prehistoric remains in Greece ground stone tools have yet to attract the same kind of attention as have other categories of archaeological material such as pottery or lithics *Flexible Stones* provides a detailed analysis of the material discovered during the excavations at Franchthi Cave Peloponnese Greece Approximately 500 tools the raw material used for their manufacture as well as the byproducts of such manufacture were found Most of this collection comes from the Neolithic component of the site including a small number of Palaeolithic and Mesolithic cases with a large number of the studied tools indicating multiple uses Anna Stroulia sees the multifunctional character of these tools as a conscious choice that reflects a flexible attitude of tool makers and users toward tools and raw materials *Depositional History of Franchthi Cave* William R. Farrand,2018-10-26 This fascicle describes the background of the Franchthi project and its excavation history and methodology Particle size mineralogy and chemistry are all taken into consideration as the cultural remains and the sediments from the cave are analyzed to determine their origin and history

William Farrand constructs an integrated stratigraphy for the entire cave using excavators notes laboratory analyses and personal field data to correlate sequences in separate trenches On the basis of some 60 radiocarbon dates the evolution and chronology of the sedimentary fill is postulated *Franchthi Neolithic Pottery, Volume 1* Karen D. Vitelli, 2018-10-26 a highly innovative study that foregrounds the decision making and technological choices of Neolithic potters Antiquity imaginative rigorous and admirably lucid study Journal of Hellenic Studies The first of two systematic reports on the more than one million sherds of pottery recovered from the Franchthi Cave and Paralia which will significantly increase our understanding of Neolithic pottery and Neolithic society in southern Greece Illustrated **Journal of Field Archaeology. Vol. 23. No.1. Spring 1996.** ,1996 **Farmers at the Frontier** Kurt J Gron, Lasse Sørensen, Peter Rowley-Conwy, 2020-02-15 All farming in prehistoric Europe ultimately came from elsewhere in one way or another unlike the growing numbers of primary centers of domestication and agricultural origins worldwide This fact affects every aspect of our understanding of the start of farming on the continent because it means that ultimately domesticated plants and animals came from somewhere else and from someone else In an area as vast as Europe the process by which food production becomes the predominant subsistence strategy is of course highly variable but in a sense the outcome is the same and has the potential for addressing more large scale questions regarding agricultural origins Therefore a detailed understanding of all aspects of farming in its absolute earliest form in various regions of Europe can potentially provide a new perspective on the mechanisms by which this monumental change comes to human societies and regions In this volume we aim to collect various perspectives regarding the earliest farming from across Europe Methodological approaches archaeological cultures and geographic locations in Europe are variable but all papers engage with the simple question What was the earliest farming like This volume opens a conversation about agriculture just after the transition in order to address the role incoming people technologies and adaptations have in secondary adoptions The book starts with an introduction by the editors which will serve to contextualize the theme of the volume The broad arguments concerning the process of neolithisation are addressed and the rationale for the volume discussed Contributions are ordered geographically and chronologically given the progression of the Neolithic across Europe The editors conclude the volume with a short commentary paper regarding the theme of the volume *Antiquity* Osbert Guy Stanhope Crawford, 1993 Includes section Reviews **JOURNAL OF FIELD ARCHAEOLOGY** TIMOTHY KAISER, 1992 *Landscape and Land Use in Postglacial Greece* Paul Halstead, Charles Frederick, 2000-12-01 Collaboration between prehistorians and palaeoecologists is radically changing our understanding of the relationship between landscape land use and human settlement in Greece The chapters in this volume include case studies and broader syntheses developments of both on site and off site field methodology explorations of palaeoecological and archaeological evidence and discussions of how the palaeoecological and archaeological records are formed Contributions range geographically over the contrasting natural and cultural landscapes of northern and

southern Greece and the lowlands and highlands and chronologically over the whole postglacial period including studies of plant and animal ecology and of palaeoecological formation processes in the present The difficulty of disentangling climatic and anthropogenic causes of palaeoecological change is a recurrent theme **Proceedings of the Prehistoric Society for ...**,1992 **Journal of Field Archaeology** Association for Field Archaeology,1993 **Current Contents. Arts & Humanities** Institute for scientific information (Philadelphie, Pa),1994 *Old World Archaeology Newsletter* ,1990

Palaeodiet in the Aegean Archaeological Institute of America. General Meeting,2000 This volume of papers is the result of the Annual Meetings of the Archaeological Institute of America conference Washington 2003 The aim was to present the latest research in the field of palaeodietry studies in the Aegean The theme of palaeodiet was chosen because it is arguably the most important field of study concerning the Aegean which complements archaeological fieldwork Food and drink are just as essential for man's survival as shelter What the ancient peoples in the Aegean ate is as important as the buildings they built or the artifacts they produced The volume discusses how religion social structure and ethnicity effects diet The book also demonstrates skeletal evidence for nutrition in Mesolithic and Neolithic Greece looking at growth oral health bone composition and pathological changes in bone The book challenges current methodology in recovering bio archaeological material whilst offering practical methods for gathering palaeodietary data **Beyond the Site** P.
