Francis Blake An Inventors Life 18501913:

Francis Blake Elton Wayland Hall,2003 Accomplished inventor visionary photographer philanthropist and successful businessman Francis Blake 1850 1913 changed not only the way Americans communicated in the nineteenth century but also quite literally how they saw themselves His major inventions the telephone transmitter and innovations in high speed photography and his Weston Massachusetts estate Keewaydin epitomized how a gifted individual of modest circumstances could create and re create himself during America s Gilded Age The Blake telephone transmitter became the world standard and anyone who spoke into Alexander Graham Bell s device in the last twenty years of the nineteenth century also encountered Blake s name emblazoned on his transmitter In addition he invested an enormous amount of his energy talent and wealth in his home originally designed by Charles Follen McKim and its elaborate grounds This self contained compound which included homes for his in laws and his children and a complete water system reflected Blake s passion for precision beauty and order It became his major preoccupation a place where he could exercise unchallenged mastery Unfortunately the fabulous Keewaydin estate did not endure but thankfully Blake s photographic images remain Blake s experimental camera work placed him in the forefront of the photographic world in the 1880s His high speed photographs remain unsurpassed for their clarity crispness and composition and are as fresh today as when he first snapped them over a hundred years ago Although little known today Blake helped revolutionize photography and transformed the role of the photograph in American society marking him as a significant figure at the dawn of the twentieth century His story is a compelling and fascinating chronicle of unbounded energy independence and genius The Register of the Kentucky Historical Society Kentucky Historical Society,2004 Network Nation Richard R. John,2015-10-05 The telegraph and the telephone were the first electrical communications networks to become hallmarks of modernity Yet they were not initially expected to achieve universal accessibility In this pioneering history of their evolution Richard R John demonstrates how access to these networks was determined not only by technological imperatives and economic incentives but also by political decision making at the federal state and municipal levels In the decades between the Civil War and the First World War Western Union and the Bell System emerged as the dominant providers for the telegraph and telephone Both operated networks that were products not only of technology and economics but also of a distinctive political economy Western Union arose in an antimonopolistic political economy that glorified equal rights and vilified special privilege The Bell System flourished in a progressive political economy that idealized public utility and disparaged unnecessary waste The popularization of the telegraph and the telephone was opposed by business lobbies that were intent on perpetuating specialty services In fact it wasn t until 1900 that the civic ideal of mass access trumped the elitist ideal of exclusivity in shaping the commercialization of the telephone The telegraph did not become widely accessible until 1910 sixty five years after the first fee for service telegraph line opened in 1845 Network Nation places the history of telecommunications within the broader context of American politics business
