**Francois Arnal** , *The Arterial System in Hypertension* Michel Emile Safar, M.F. O'Rourke, 2012-12-06 MICHEL E SAFAR and MICHAEL F O ROURKE One of the principal problems of hypertension is the precise definition of blood pressure as a cardiovascular risk factor Clinicians indicate peak systolic pressure and end diastolic pressure in the brachial artery as the principal criteria for blood pressure measurement Consequently these values are as indicators for clinical management and therapeutic adjustment This used methodology based on indirect blood pressure measurements at the site of the brachial artery relates only to the highest and lowest pressure in that vessel and does not give any information of the blood pressure curve itself this carries more information than peak systolic pressure and end diastolic pressure As a first step in better analysis of the blood pressure curve research workers in experimental hypertension defined in addition to peak systolic pressure and end diastolic another blood pressure value mean arterial pressure i e the average pressure throughout the cardiac cycle and about which pressure fluctuates This is the pressure recorded by Hales 1 and by Poiseuille 2 in their pioneering studies By application of Poiseuille s Law this definition of mean arterial pressure led to the concept that increased mean arterial pressure and therefore hypertension was related at any given value of cardiac output to an increase in vascular resistance i e to a reduction in the caliber of the small arteries **Bio-Assays for Oxidative Stress Status**

Taking on the myth of France s creative exhaustion following World War II this collection of essays brings together an international team of scholars whose research offers English readers a rich and complex overview of the place of France and French artists in the visual arts since 1945 Addressing a wide range of artistic practices spanning over seven decades and using different methodologies their contributions cover ground charted and unknown They introduce greater depth and specificity to familiar artists and movements such as Lettrism Situationist International or Nouveau R alisme while bringing to the fore lesser known artists and groups including GRAPUS the Sociological Art Collective and Nicolas Sch ffer

Collectively they stress the political dimensions and social ambitions of the art produced in France at the time deconstruct the traditional geography of the French art world and highlight the multiculturalism of the French art scene that resulted from its colonial past and the constant flux of artistic travels and migrations Ultimately the book contributes to a story of postwar art in which France can be inscribed not as a main or sub chapter but rather as a vector in the wider constellation of modern and contemporary art

### **"Painting, Politics and the Struggle for the ?ole de Paris, 1944?1964 "**

Natalie Adamson, 2017-07-05 Painting Politics and the Struggle for the ole de Paris 1944 1964 is the first book dedicated to the postwar or nouvelle ole de Paris It challenges the customary relegation of the ole de Paris to the footnotes not by arguing for some hitherto hidden merit for the art and ideas associated with this school but by establishing how and why the ole de Paris was a highly significant vehicle for artistic and political debate The book presents a sustained historical study of how this school was constituted by the paintings of a diverse group of artists by the combative field of art criticism and by the curatorial policies of galleries and state exhibitions By thoroughly mining the extensive resources of the newspaper and art journal press gallery and government archives artists writings and interviews with surviving artists and art critics the book traces the artists exhibitions and art critical debates that made the ole de Paris a zone of aesthetic and political conflict Through setting the ole de Paris into its artistic social and political context Natalie Adamson demonstrates how it functioned as the defining force in French postwar art in its defence of the tradition of easel painting as well as an international point of reference for the expansion of modernism In doing so she presents a wholly new perspective on the vexed relationships between painting politics and national identity in France during the two decades following World War II

definition of feminism that is based solely on Eurocentric or West centric gender politics rather Feminist Translation Studies Local and Transnational Perspectives seeks to expand our understanding of feminist action not only to include feminist translation as resistance against multiple forms of domination but also to rethink feminist translation through feminist theories and practices developed in different geohistorical and disciplinary contexts In so doing the collection expands the geopolitical sociocultural and historical scope of the field from different disciplinary perspectives pointing towards a more transnational interdisciplinary and overtly political conceptualization of translation studies
