## **Frank Lloyd Wright's Living Space Architectures Fourth Dimension:**

Frank Lloyd Wright's Living Space Gail Satler, 2000-04 This sociological analysis of Wright's architecture examines the interaction between people and the spaces they create. Satler shows how Wright explored a new architectural dimension: the space in which we live. Focusing on the Larkin Building 1904 and Unity Temple 1907, works that Wright considered important but that have received little attention, Satler delineates the social nature of space. She provides an analytic framework through which to understand Wright's buildings and his writings, revealing how the history of such works and cultural landscapes offer a basis for making social, political, and spatial choices about the future. Wright's specific architectural works provide a framework for constructing social histories of places and people because his designs represent a natural way to build and to live within a larger social landscape. This original study will appeal to sociologists, architects, urban and architectural historians, urban planners, and anthropologists, and those interested in the work of Frank Lloyd Wright.

**Frank Lloyd Wright Quarterly**, 2006      **Open Space New Media Documentary** Patricia R. Zimmermann, Helen De Michiel, 2017-11-22 *Open Space New Media Documentary* examines an emerging and significant area of documentary practice in the twenty-first century: community-based new media documentary projects that move across platforms and utilize participatory modalities. The book offers an innovative theorization of these collaborative and collective new media practices which the authors term open space, gesturing towards a more contextual critical nexus of technology, form, histories, community, convenings, collaborations, and mobilities. It looks at a variety of low-cost, sustainable, and scalable documentary projects from across the globe where new technologies meet places and people in Argentina, Canada, India, Indonesia, Peru, South Africa, Ukraine, and the USA.      Midwest Engineer, 2000      **The Architecture of Frank Lloyd Wright, Fourth Edition** William Allin Storrer, 2017-07-02 From sprawling houses to compact bungalows and from world-famous museums to a still-working gas station, Frank Lloyd Wright's designs can be found in nearly every corner of the country. While the renowned architect passed away more than fifty years ago, researchers and enthusiasts are still uncovering structures that should be attributed to him. William Allin Storrer is one of the experts leading this charge, and his definitive guide *The Architecture of Frank Lloyd Wright* has long been the resource of choice for anyone interested in Wright. Thanks to the work of Storrer and his colleagues at the Rediscovering Wright Project, thirty-seven new sites have recently been identified as the work of Wright. Together with more photos, updated and expanded entries, and a new essay on the evolution of Wright's unparalleled architectural style, this new edition is the most comprehensive and authoritative catalog available. Organized chronologically, the catalog includes full-color photos, location information, and historical and architectural background for all of Wright's extant structures in the United States and abroad, as well as entries for works that have been demolished over the years. A geographic listing makes it easy for traveling Wright fans to find nearby structures, and a new key indicates whether a site is open to the public. Publishing for Wright's sesquicentennial, this new edition will be a trusted companion for anyone

**Publications of the State of Illinois 1994 , Illinois Documents List** ,1998 The Space Within Robert McCarter,2016-11-15 Alvar Aalto once argued that what mattered in architecture wasn t what a building looks like on the day it opens but what it is like to live inside it thirty years later In this book architect and critic Robert McCarter persuasively argues that interior spatial experience is the necessary starting point for design and the quality of that experience is the only appropriate means of evaluating a work after it has been built McCarter reveals that we can t really know a piece of architecture without inhabiting its spaces and we need to counter our contemporary obsession with exterior views and forms with a renewed appreciation for interiors He explores how interior space has been integral to the development of modern architecture from the late 1800s to today and he examines how architects have engaged interior space and its experiences in their design processes fundamentally transforming traditional approaches to composition Eloquently placing us within a host of interior spaces he opens up new ways of thinking about architecture and what its goals are and should be *The Seven Ages of Frank Lloyd Wright* Donald W.
