Dalecky,2014-08-15 This study attempts to show the misapplication of tactical airpower by the Luftwaffe in support of German ground forces during the Battle of Kursk in July 1943 The analysis is based on an investigation of historical references and provides lessons learned which might be applied in future conflicts The study shows that the Luftwaffe concentrated its efforts at Kursk on Close Air Support and neglected Battlefield Air Interdiction This was primarily because Close Air Support had proven itself so successful in German

experience prior to Kursk However the failure of the Luftwaffe to interdict Russian reinforcements at Kursk proved to be critical and contributed to the German defeat Air planners must realize that a correct balance between Close Air Support and Battlefield Air Interdiction is essential to the efficient use of airpower during any tactical application in support of ground forces Neither Close Air Support nor Battlefield Air Interdiction should gain primacy in doctrine rather a mix of the two should be applied on a situational basis *International Catalogue of Scientific Literature*, 1902 College in Prison Daniel Karpowitz, 2017-02-01 Over the years American colleges and universities have made various efforts to provide prisoners with access to education However few of these outreach programs presume that incarcerated men and women can rise to the challenge of a truly rigorous college curriculum The Bard Prison Initiative is different College in Prison chronicles how since 2001 Bard College has provided hundreds of incarcerated men and women across the country access to a high quality liberal arts education Earning degrees in subjects ranging from Mandarin to advanced mathematics graduates have upon release gone on to rewarding careers and elite graduate and professional programs Yet this is more than just a story of exceptional individuals triumphing against the odds It is a study in how the liberal arts can alter the landscape of some of our most important public institutions giving people from all walks of life a chance to enrich their minds and expand their opportunities Drawing on fifteen years of experience as a director of and teacher within the Bard Prison Initiative Daniel Karpowitz tells the story of BPI's development from a small pilot project to a nationwide network At the same time he recounts dramatic scenes from in and around college in prison classrooms pinpointing the contested meanings that emerge in moments of highly charged reading writing and public speaking Through examining the transformative encounter between two characteristically American institutions the undergraduate college and the modern penitentiary College in Prison makes a powerful case for why liberal arts education is still vital to the future of democracy in the United States **Franz Kempf** George Berger, 1975 **Primate Lateralization** Jeannette P. Ward, William D. Hopkins, 2012-12-06 This book arrays recent research on the neural and behavioral lateralization of the brain relying heavily on animal models The authors employ the comparative method to enhance our understanding of behavior specifically through hand use and handedness by drawing comparisons with studies involving primates Topics discussed include Patterns of Lateralized Behavior in Prosimians Behavioral Lateralization in Language Trained Chimpanzees Patterns of Handedness Comparative Study of Nursery School Children and Captive Gorillas and Rotational Behavior in Children and Adults It is the first book of its kind devoted entirely to the question of behavioral asymmetries in all primates and thus presents a milestone as it recognizes the accumulating evidence of asymmetry and lateralized behavior in the non human nervous system *Franz Kempf* John Neylon, 2014 Exhibition catalogue Gender and Politics in Austrian Fiction Ritchie Robertson, Edward Timms, 1996 This volume of essays on Austrian fiction compiled at a time when Austria is forming stronger links within the European Union illustrates a transition from traditional preoccupations with character differences between Austrian and German literature to wider

concerns of politics and gender Fictional treatments of such issues as male homosexuality problems in feminism the representation of women in male authored texts and anti war protest are examined both in well known novels and in little known works by underrated authors Many of the authors discussed have received insufficient recognition because they do not fall within a familiar canon of German literature The specialised research involved in compiling this material is accessible through a series of book reviews included at the end of the volume which range in subject area from the life of an eighteenth century soldier in the Habsburg service to the continuing discussion on Austrian identity

Foreign Words Susan Bernofsky, 2005-09-01 A new perspective on the principal developments in translation practice and theory in Germany during the Age of Goethe with emphasis on the work of Goethe Hölderlin and Kleist as translators The turn of the nineteenth century was a particularly fertile period in the history of translation theory and practice With an unprecedented number of works being carefully translated and scrutinized this era saw a definite shift in the dominant mode of translation Many translators began attempting for the first time to communicate the formal characteristics linguistic features and cultural contexts of the original text while minimizing the paraphrasing that distorted most eighteenth century translations As soon as these new rules became the norm authorial translators defined not by virtue of being authors in their own right but by the liberties they took in their translations emerged to challenge them altering translated texts in such a way as to bring them into line with the artistic and thematic concerns displayed in the translators own original work In the process authorial translators implicitly declared translation an art form and explicitly incorporated it into their theoretical programs for the poetic arts

Foreign Words provides a detailed account of translation practice and theory throughout the eighteenth and early nineteenth centuries linking the work of actual translators to the theories of translation articulated by Goethe Wilhelm von Humboldt and above all Friedrich Schleiermacher Employing a variety of critical approaches author Susan Bernofsky discusses in depth the work of Kleist Hölderlin and Goethe whose virtuoso translations raise issues that serve to delineate a theory of translation that has relevance at the turn of the twenty first century as well Combining a broad historical approach with individual readings of the work of several different translators **Foreign Words** paints a full picture of translation during the Age of Goethe and provides all scholars of translation theory with an important new perspective
