Donald Judd Interviews Donald Judd, 2019-11-12 Donald Judd Interviews presents sixty interviews with the artist over the course of four decades and is the first compilation of its kind It is the companion volume to the critically acclaimed and bestselling Donald Judd Writings This collection of interviews engages a diverse range of topics from philosophy and politics to Judd's insightful critiques of his own work and the work of others such as Mark di Suvero Edward Hopper Yayoi Kusama Barnett Newman and Jackson Pollock The opening discussion of the volume between Judd Dan Flavin and Frank Stella provides the foundation for many of the succeeding conversations focusing on the nature and material conditions of the new art developing in the 1960s The publication also gathers a substantial body of unpublished material across a range of mediums including extensive interviews with art historians Lucy R Lippard and Barbara Rose Judd's contributions in interviews panels and extemporaneous conversations are marked by his forthright manner and rigorous thinking whether in dialogue with art critics art historians or his contemporaries In one of the last interviews he observed Generally expensive art is in expensive chic circumstances it's a falsification The society is basically not interested in art And most people who are artists do that because they like the work they like to do that make art Art has an integrity of its own and a purpose of its own and it's not to serve the society That's been tried now in the Soviet Union and lots of places and it doesn't work The only role I can think of in a very general way for the artist is that they tend to shake up the society a little bit just by their existence in which case it helps undermine the general political stagnation and perhaps by providing a little freedom supports science which requires freedom If the artist isn't free you won't have any art Donald Judd Interviews is co-published by Judd Foundation and David Zwirner Books The interviews expand upon the artist's thinking present in Donald Judd Writings Judd Foundation David Zwirner Books 2016

De Kooning John Elderfield, Willem De Kooning, Lauren Mahony, Jennifer Field, Delphine Huisinga, Susan Lake, 2011 This publication offers an unparalleled opportunity to appreciate the development of the artist's work as it unfolded over nearly seven decades beginning with his early academic works made in Holland before he moved to the United States in 1926 and concluding with his final sparsely abstract paintings of the late 1980s

Reductionism in Art and Brain Science Eric R. Kandel, 2016-08-30 Are art and science separated by an unbridgeable divide Can they find common ground In this new book neuroscientist Eric R Kandel whose remarkable scientific career and deep interest in art give him a unique perspective demonstrates how science can inform the way we experience a work of art and seek to understand its meaning Kandel illustrates how reductionism the distillation of larger scientific or aesthetic concepts into smaller more tractable components has been used by scientists and artists alike to pursue their respective truths He draws on his Nobel Prize winning work revealing the neurobiological underpinnings of learning and memory in sea slugs to shed light on the complex workings of the mental processes of higher animals In

Reductionism in Art and Brain Science Kandel shows how this radically reductionist approach applied to the most complex puzzle of our time the brain has been employed by modern artists who distill their subjective world into color form and light Kandel demonstrates through bottom up sensory and top down cognitive functions how science can explore the complexities of human perception and help us to perceive appreciate and understand great works of art At the heart of the book is an elegant elucidation of the contribution of reductionism to the evolution of modern art and its role in a monumental shift in artistic perspective Reductionism steered the transition from figurative art to the first explorations of abstract art reflected in the works of Turner Monet Kandinsky Schoenberg and Mondrian Kandel explains how in the postwar era Pollock de Kooning Rothko Louis Turrell and Flavin used a reductionist approach to arrive at their abstract expressionism and how Katz Warhol Close and Sandback built upon the advances of the New York School to reimagine figurative and minimal art Featuring captivating drawings of the brain alongside full color reproductions of modern art masterpieces this book draws out the common concerns of science and art and how they illuminate each other
