Health Care and Its Financing in the Single European Market Reiner Leidl, R. Leidl, 1998 Health care and its financing will not be harmonized within the European Union EU Therefore the differences between the health systems of the member states in a Single European Market are gaining in relevance The process of economic integration also effects health This book integrates economics law social political and health sciences in the analysis of health care issues in the EU It covers the development of health systems and policy in the community the markets for pharmaceuticals and for medical devices EU trends in hospital financing issues in the comparison of financing systems especially in the field of private expenditures reforms of health care financing in social security systems and national health services in the EU and cross border health care between EU member states The results feature an up to date overview on the European dimension of health care and its financing The book is relevant to experts in health care organizations policy industry and research

Health Policy And European Union Enlargement McKee, Martin, MacLehose, Laura, Nolte, Ellen, 2004-04-01 What are the implications of the different levels of health in an enlarged EU Will free movement of goods services and people within an enlarged EU be good for health and health care What have we learned from past enlargements European national policy makers broadly agree on the core objectives that their health care system should pursue The list is straightforward universal access for all citizens effective care for better health outcomes efficient use of resources and high quality services responsive to patient s concerns It is a formula that resonates across the political spectrum and which in various sometimes inventive configurations has played a

role in most recent European national election campaigns While there may be consensus on the broader issues expectations differ between EU countries and with the enlargement of 2004 matters become more complex This book seeks firstly to assess the impact of the enlargement process and then to analyse the challenges that lie ahead in the field of health and health policy Written by leading health policy analysts the book investigates a host of areas including Health care investment International recruitment of nurses and doctors Health and safety Communicable disease control European pharmaceutical policy Health Policy and European Union Enlargement will be of interest to students of health policy economics public policy and management as well as health managers and policy makers Contributors Tit Albrecht Roza Adany Ivana Bozicevic James Buchan Richard Coker Evgenia Delcheva Carl Ardy Dubois Anna B Gilmore Antero Heloma Rainer Hess Elke Jakubowski Nicholas Jennett Panos Kanavos Manuel Lobato Karen Lock Laura MacLehose Martin McKee Sally Nicholas Ellen Nolte Stjepan Oreskovic Esa Osterberg Anne Marie Rafferty Magdalene Rosenm ller Alison Wright Reid Monika Zajac Witold Zatonski

The European Union and Health Services Reinhard Busse, Matthias Wismar, Philip C. Berman, 2002 While most Member States Governments have assumed that they have full responsibility and control over their own health services it is becoming increasingly apparent that the Single European Market is having a substantial impact on health services Recent rulings by the European Court of Justice ECJ have in particular established the freedom of citizens to choose health care goods and services across borders To examine the actual relationship between the SEM and health services this book identifies SEM regulations and directives as well as ECJ decisions which explicitly refer to health services and which therefore have a potential impact on the purchasing supply and delivery of health services evaluates the impact of SEM regulations and ECJ decisions on the purchasing supply and delivery of health services identifies outcomes including both intended and unintended effects of the SEM on Member States health services and develops future scenarios exploring key issues identified in the earlier analysis and evaluation

Education and Public Policy in the European Union Sarah K. St. John, Mark Murphy, 2019-02-12 This book fleshes out activities and initiatives in the field of education from across areas of European Union competence in order to highlight the extent to which education and training have penetrated the European Community's policymaking since its creation Policies are all too often placed in their individual silos which can sometimes work against deeper understanding of policymaking and its reach across policy domains This project avoids such compartmentalisation and instead crosses boundaries to explore education's relationship with other policy areas as well as its far reaching role in the construction of a united Europe It demonstrates education's significance across the broad landscape of European integration by presenting a collection of case studies which represent policy areas that have experienced the infiltration of education These include Migration Health Agriculture Multilingualism Media and Communications and the environment

Single Markets Michelle Egan, 2015-01-22 This timely book provides in depth analytical comparison of the nineteenth century evolution of the American single market with corresponding political economic and social developments in post WWII European efforts to create a single European market Building the regulatory framework needed for successful adoption of an integrated single market across diverse political units represents one of the most important issues in comparative political economy What accounts for the political success or failure in creating integrated markets in their respective territories When social discontent threatens market integration with populist backlash what must be done to create political support and greater legitimacy Single Markets focuses on the creation of integrated economies in which the United States and European Union experienced sharply contested ideas about the operation of their respective markets conflict over the allocation of institutional authority and pressure from competing political economic and social forces over the role and consequences of increased competition Drawing upon four case studies the book highlights the contestation surrounding the US and EU's efforts to create common currencies expand their borders and territories and deal with the

pressures of populist parties regional interests and varied fiscal and economic challenges Theoretically the book draws on work in European integration and American Political Development APD to illustrate that the consolidation of markets in the US and EU took place in conjunction with the expansion of state regulatory power and pressure for democratic reform Single Markets situates the consolidation of single markets in the US and EU in a broader comparative context that draws on research in economics public administration political science law and history

EU Health Law & Policy Anniek de Ruijter, 2019-01-31 Whether there is a public health need for the containment and response to swine flu or an individual need to access health care across the border for a hip operation to alleviate pain the EU has an increasingly powerful role in the field of human health Health law and policy is deeply tied into fundamental rights bioethics and values with important implications for individuals However it is also an expansive area of economic regulation of social and state arrangements The growing role of the EU in human health law and policy is contested particularly as it has implications for the fundamental rights and values that are enshrined in national health law and policy This book outlines through case studies how the expansion of EU power is taking place through law and policy in both public health and health care How is law and policy in the field of human health adopted who are the institutional actors involved and what is the impact of these developments for fundamental rights

Skill-mix Innovation, Effectiveness and Implementation Claudia B. Maier, Marieke Kroezen, Reinhard Busse, Matthias Wismar, 2022-06-09 What are skill mix innovations and why are they relevant This systemic analysis of health workforce skill mix innovations provides an overview of the evidence and lessons for implementation across multiple countries The authors focus on six core segments of health systems health promotion and prevention acute care chronic care long term and palliative care as well as access for vulnerable groups and people living in underserved areas In addition the book analyses the roles of educational systems workforce planning and policy and financing within individual countries healthcare organisations from a cross country perspective Although implementing skill mix changes may be prone to stakeholder opposition or other barriers this book helps identify ways to steer the process The authors ultimately determine what skill mix innovations exist who may benefit from the changes and how to implement these changes within health systems This Open Access title is the sixth book in Cambridge's European Observatory on Health Systems and Policies series

Regulating Migrant Integration in Europe Dáire McCormack-George, 2025-07-09 Migrants coming to and moving within Europe typically experience inadequate recognition of their professional qualifications and wrongful discrimination This book describes and critically assesses international European and EU laws and policies governing migrant integration in Europe with a particular focus on those concerning the recognition of migrants skills It argues that at least certain parts of EU law require clarification restatement and even reform The book formulates practical proposals to improve the governance of migrant integration in Europe making

it more coherent effective and fair

Health Law and the European Union Tamara K. Hervey, Jean V. McHale, 2004-11-04

How does the law of the European Union affect health law and policy At first sight it seems limited However despite its restricted formal competence the EU has recently become increasingly involved in the health field Litigation based on EU law has resulted in a right to receive health care services across national boundaries which may have huge practical implications for national health systems The EU has promulgated legislation regulating clinical research and the marketing of pharmaceuticals patients rights are affected by EU legislation on data protection and product liability the qualifications of health care professionals are legally recognised across the EU and the EU has acted to promote public health This book explores the various impacts of measures of EU law on national health law and policy Through elaboration of selected examples the authors show that within the EU health law cannot be regarded as a purely national affair

The History and Politics of Free Movement within the European Union Saila Heinikoski, 2020-11-26

The right to free movement is the one privilege that EU citizens value the most in the Union but one that has also created much political controversy in recent years as the debates preceding the 2016 Brexit referendum aptly illustrate This book examines how European politicians have justified and criticized free movement from the commencement of the first Commission of the EU 25 in November 2004 to the Brexit referendum in June 2016 The analysis takes into account the discourses of Heads of State Governments and Ministers of the Interior or Home Secretaries of six major European states the UK Germany France Italy Spain and Romania In addition to these national leaders the speeches of European Commissioners responsible for free movement matters are also considered The book introduces a new conceptual framework for analysing practical reasoning in political discourses and applies it in the analysis of national free movement debates contextualised in respective migration histories In addition to results related to political discourses the study unearths wider problems related to free movement including the diversified and variegated approaches towards different groups of movers as well as the exclusive attitudes apparent in both discourses and policies

The History and Politics of Free Movement within the European Union is of interest to anyone studying national and European politics and ideologies contemporary history migration policies and political argumentation

Free Movement of Civil Judgments in the European Union and the Right to a Fair Trial Monique Hazelhorst, 2017-02-27

This book examines the attainment of complete free movement of civil judgments across EU member states from the perspective of its conformity with the fundamental right to a fair trial In the integrated legal order of the European Union it is essential that litigants can rely on a judgment no matter where in the EU it was delivered Effective mechanisms for cross border recognition and the enforcement of judgments provide both debtors and creditors with the security that their rights including their right to a fair trial will be protected In recent years the attainment of complete free movement of civil judgments through simplification or abolition of these mechanisms has become a priority for the European legislator The text uniquely combines a thorough discussion of EU

legislation with an in depth and critical examination of its interplay with fundamental rights It contains an over view and comparison of both ECtHR and CJEU case law on the right to a fair trial and provides a great number of specific recommendations for current and future legislation With its critical discussion of EU Regulations from both a practical and a theoretical standpoint this book is particularly relevant to legislators and policymakers working in this field Because of the extensive overview of the functioning of the EU s mechanisms and of relevant case law it provides the book is also highly relevant to academics and practitioners Monique Hazelhorst is Judicial Assistant at the Supreme Court of the Netherlands She studied Law and Legal Research at Utrecht University and holds a Ph D in Law from the Erasmus School of Law at Erasmus University Rotterdam
