Think Outside the Gate Melisa Mel, 2017-10-12 Think Outside the Gate is a book dedicated to all those who work or live in any type of incarceration environment It contains a compilation of lesson plans and presentation outlines which can be used as an example of how one can turn any type of lesson into a think outside the gate experience The think outside the gate mind set is a philosophy that Melisa Mel created as the focal point of her lessons and presentations This approach makes it a priority to keep the students focus on everything and anything outside of their limited incarcerating walls This not only instills hope in them but it also better prepares them for when they cross the prison gates to go live back in society Melisa Mel feels that better preparing for reentry into society

is the most efficient way to ensure a person's success outside of prison so that they do not return to prison. Her hope is that while working or living behind bars a "think outside the gate" mind set is present at all times as that will tackle recidivism at its very core.

Implementing Sustainability in the Curriculum of Universities Walter Leal Filho, 2017-11-17 This book presents sustainable development themes across universities and introduces methodological approaches and projects to the teaching staff. It has been prepared against this background to identify ways to better teach about sustainability issues in a university context. It contains a set of papers presented at a Symposium with the same title held at Manchester Metropolitan University UK in March 2017. The event was attended by a number of institutions of higher education active in this field. It involved researchers in the field of sustainable development in the widest sense from business and economics to arts and fashion, administration, environment, languages and media studies. Sustainability is seldom systematically embedded in the curriculum at higher education institutions. Yet proper provisions for curricular integration of sustainability issues as part of teaching programmes across universities are an important element towards curriculum greening. The aims of this book are i to provide teaching staff at universities active and or interested in teaching sustainable development themes with an opportunity to document and disseminate their works i.e. curriculum innovation, empirical work, activities, case studies, practical projects; ii to promote information, ideas and experiences acquired in the execution of teaching courses especially successful initiatives and good practice; iii to introduce methodological approaches and projects which aim to offer a better understanding of how matters related to sustainable development can be tackled in university teaching. Last but not least a further aim of this book prepared by the Inter University Sustainable Development Research Programme IUSDRP and the World Sustainable Development Research and Transfer Centre WSD RTC is to catalyse a debate on the need to promote sustainable development teaching today.

Vault publishes the entire surveys of current students and alumni at more than 300 top undergraduate institutions. Each 2 to 3 page entry is composed almost entirely of insider comments from students and alumni. Through these narratives Vault provides applicants with detailed balanced perspectives.
