Introducing Sociology Using the Stuff of Everyday Life Josee Johnston, Kate Cairns, Shyon Baumann, 2017-01-06 The challenges of teaching a successful introductory sociology course today demand materials from a publisher very different from the norm Texts that are organized the way the discipline structures itself intellectually no longer connect with the majority of student learners This is not an issue of pandering to students or otherwise seeking the lowest common denominator On the contrary it is a question of again making the practice of sociological thinking meaningful rigorous and relevant to today s world of undergraduates This comparatively concise highly visual and affordable book offers a refreshingly new way forward to reach students using one of the most powerful tools in a sociologist s teaching arsenal the familiar stuff in students everyday lives throughout the world the jeans they wear to class the coffee they drink each morning or the phones their professors tell them to put away during lectures A focus on consumer culture seeing the strange in the familiar is not only interesting for students it is also the authors suggest pedagogically superior to more traditional approaches By engaging students through their stuff this book moves beyond teaching about sociology to helping instructors teach the practice of sociological thinking It moves beyond describing what sociology is so that students can practice what sociological thinking can do This pedagogy also posits a relationship between teacher and learner that is bi directional Many students feel a sense of authority in various areas of consumer culture and they often enjoy sharing their knowledge with fellow students and with their instructor Opening up the sociology classroom to discussion of these topics validates students expertise on their own life worlds Teachers in turn gain

insight from the goods services and cultural expectations that shape students lives While innovative the book has been carefully crafted to make it as useful and flexible as possible for instructors aiming to build core sociological foundations in a single semester A map on pages ii iii identifies core sociological concepts covered so that a traditional syllabus as well as individual lectures can easily be maintained Theory method and active learning exercises in every chapter constantly encourage the sociological imagination as well as the doing of sociology Australian Children's Books, 1980-2000 Marcie Muir, Kerry White, 2004 All Australian children s books published from 1989 to 2000 are listed in this essential reference for those who appreciate the richness of Australian writing for children Following the same format as volumes 1 and 2 in this series chronicling books published as early as 1774 entries include publishing details the number of illustrations and the awards received for each book This third volume follows the continuing careers of authors such as Mem Fox Bob Graham Robin Klein and Paul Jennings and traces changes in the popularity of Australian themes and settings to identify publishing trends Varied cultural aspects of modern day life are shown from globalization commercialism and the rise of the middle class in Asia to desktop publishing outcome based school curricula and the modern obsession with celebrities all of which are reflected in the type and quantity of books produced by Australian writers and publishers The wealth of included material will extend researchers understanding of the range of Australian children s books *Born Reading* Jason Boog, 2014-07-15 Describes how to raise a child s IQ and give him or her a competitive advantage through interactive reading and provides step by step instructions for developing and nurturing an early interest in books *Inventing a Classroom* Kathryn F. Whitmore, Caryl G. Crowell, 1994 What are the patterns of teaching and learning that make a classroom holistic How do children invent oral and written language How do they create the culture and curriculum of a classroom How does the spirit of community and collaboration develop among children and teachers What are the relationships between literacy schooling and socialization as they form among the children These are a few of the broad questions that Kathy Whitmore and Caryl Crowell answer in this absorbing portrait of Caryl s third grade classroom the Sunshine Room Over the span of a school year we watch the students in this bicultural classroom within a bilingual working class neighborhood work and develop together as a community of learners It is the story of how the Sunshine Room like many whole language classrooms invents itself and how in this process the children themselves are continually inventing oral and written language culture and curriculum In two separate collaborative voices the authors carry readers through several critical events in the life of the classroom the process through which the children and the teachers negotiate the curriculum the creation of a theme study about the Middle Ages and a vicarious experience of the Middle East war through children s literature and discussions On an individual level the deep friendship between Seaira an English speaking child from the volunteer community and Lolita a bilingual Latina from the barrio is symbolic of the bicultural experience fostered in the Sunshine Room *101 Things for Kids in Las Vegas* Carol A.
