Think to New Worlds Joshua Blu Buhs, 2024-07-03 This book is about Charles Fort his followers and the surprising influence they have had on science fiction the avant garde UFOlogy and more broadly on the role of spirituality and conspiracy in the modern world Fort was an author and maverick philosopher who wrote four non fiction books about anomalies rains of frogs mysterious disappearances unexplained lights in the sky for which he offered hypotheses that even he did not always accept as true His books developed into a monistic philosophy that denounced science as a machine for generating truth In his view science was a small part of a larger system in which truth and falsity were constantly transforming one into the other This was not a rejection of the modern world but instead its fulfillment Fort prophesied the next stage in intellectual evolution after the scientific era He inspired four overlapping groups members of the Fortean Society science fiction fans and writers avant garde artists and flying saucer enthusiasts First We Must Think to New Worlds takes up each of these groups in turn to ask How can the human imagination be expanded What is the fundamental structure of the universe And how does power move As they developed their responses Fort's followers mixed Forteanism with Fundamentalism New Agerism and conspiracy as well as a host of other forms of modern enchantments such as the ironic imagination scientific wonder and Theosophical syncretism Each chapter is interrupted by and concludes with shorter sections that focus on particular Fortean events as a way to deepen themes Genre, 2004 The Routledge Research Companion to Border Studies Doris Wastl-Walter, 2016-04-01 Throughout history the functions and roles of borders have been continuously changing They can only be understood in their context shaped as they are by history politics and power as well as cultural and social issues Borders are therefore complex spatial and social phenomena which are not static or invariable but which are instead highly dynamic This comprehensive volume brings together a multidisciplinary team of leading scholars to provide an authoritative state of the art review of all aspects of borders and border research It is truly global in scope and besides embracing the more traditional strands of the field including geopolitics migration and territorial identities it also takes in recently emerging topics such as the role of borders in a seemingly borderless world creating neighbourhoods and border enforcement in the post 9 11 era *The Politics of Culture*, **EU, Europe Unfinished** Zlatan Krajina, Nebojša Blanuša, 2016-09-23 What is the meaning of the Balkans in the early 21st century Former Yugoslav countries seek a self flattering alliance with the West via EU membership while the Union's citizens increasingly declare to

be Eurosceptic At the same time economic turmoil in countries like Greece confronts massive incoming waves of refugees for whom Europe's south eastern borders are the nearest shelter In this time of crisis the Balkans return on the agenda as a parable of Europe's haunting questions about its future EU Europe Unfinished brings together established and emerging media and cultural scholars to explore colliding visions of space and identity within a declining continent Whereas Europe imagines the Balkans to be the source of its nearest trouble the region envisions Europe as a refuge from ongoing post socialist transition The book adopts a variety of critical perspectives from media and policy analysis to anthropology art history and autobiography to investigate where Europe is headed with the Balkans in its skein 25 years after the fall of the Iron Curtain

Producing and Contesting Urban Marginality Julie Cupples, Tom Slater, 2019-10-25 In Mexico City as in many other large cities worldwide contemporary modes of urban governance have overwhelmingly benefited affluent populations and widened social inequalities Disinvestment from social housing and rent seeking developments by real estate companies and land speculators have resulted in the displacement of low income populations to the urban periphery Public social spaces have been eliminated to make way for luxury apartments and business interests Low income neighbourhoods are often stigmatized by dominant social forces to justify their demolition The urban poor have however negotiated and resisted these developments in a range of ways This text explores these urban dynamics in Mexico City and beyond looking at the material and symbolic mechanisms through which urban marginality is produced and contested It seeks to understand how things might be otherwise how the city might be geared towards more inclusive forms of belonging and citizenship

Provincializing the Bible Norman Jones, 2018-01-29 Why in our supposedly secular age does the Bible feature prominently in so many influential and innovative works of contemporary U S literature More pointedly why would a book indelibly allied with a long history of institutionalized oppressions play a

supporting role and not simply as an object of critique in a wide variety of landmark literary representations of marginalized subjectivities. The answers to these questions go beyond mere playful re-appropriations or subversive resignifications of biblical themes, figures and forms. This book shows how certain contemporary authors invoke the Bible in ways that undermine clear distinctions between subversive and traditional, indeed that undermine clear distinctions between secular and sacred. By tracing a key source of such complex literary invocations of the Bible back to William Faulkner's major novels, *Provincializing the Bible* argues that these literary works, which might be termed postsecular, ironically provincialize the Bible as a means of reevaluating and revalorizing its significance in contemporary American culture. **Living in a Bubble**

, 2007-08. In this issue, the cultural, political and social costs of an era of debt-backed boom are explored by authors who link the global glut of financial liquidity with the capitalist self-cannibalization that sustains it. New Cultural Studies Clare Birchall, Gary Hall, 2006-01-01. *New Cultural Studies* is both an introductory reference work and an original study which explores new directions and territories for cultural studies. A new generation has begun to emerge from the shadow of the Birmingham School. It is a generation whose whole education has been shaped by theory and who frequently turn to it as a means to think through some of the issues and current problems in contemporary culture and cultural studies. In a period when departments which were once hotbeds of high theory are returning to more sociological and social science-oriented modes of research, and 9/11 and the war in Iraq especially have helped create a sense of post-theoretical political urgency which leaves little time for the elitist Eurocentric textual concerns of Theory, theoretical approaches to the study of culture have for many of this generation never seemed so important or so vital. *New Cultural Studies* explores theory's past, present and most especially future role in cultural studies. It does so by providing an authoritative and accessible guide for students and teachers alike to the most innovative members of this new generation: the thinkers and theories currently influencing new work in cultural studies: Agamben, Badiou, Deleuze, Derrida, Hardt and Negri, Kittler, Laclau, Levinas and, like the new territories currently being mapped out across the intersections of cultural studies and cultural theory: anti-capitalism, ethics, the posthumanities, post-Marxism and the transnational. Empires of Sustainability Joseph Murphy, 2024-06-07. Focussing on the greening of imperialism and empires, *Empires of Sustainability* analyses the shift around the world from denial of the environmental crisis to action to prevent catastrophe and the resulting implications. Evidence of this shift is clear in widespread and purposeful social change which is gathering momentum. The book explains how globalisation accelerated us towards the crisis and today, even as its own legitimacy is being questioned, is evolving through solutions and responses to it. Looking ahead and as the environmental crisis worsens, two possible futures are discerned and explored. One is that through universal actions to save the planet, shaped by interweaving political and economic forces, the hegemony of globalisation is restored, albeit in a green form. The other is that the world reorganises into competing spheres of influence with politics, economics and the environment interwoven differently in each case. In these ways we face the prospect of one or more
