Germany Yugoslavia the United States Japan and China *Colonial Exploitation and Economic Development* Ewout Frankema, Frans Buelens, 2013-03-12 Since many countries in the world at present were European colonies in the not so distant past the relationship between colonial institutions and development outcomes is a key topic of study across many disciplines This edited volume from a leading international group of scholars discusses the comparative legacy of colonial rule in the Netherlands Indies and Belgian Congo during the nineteenth and twentieth centuries Whereas the Indonesian economy progressed rapidly during the last three decades of the twentieth century and became a self reliant and assertive world power the Congo regressed into a state of political chaos and endemic violence To which extent do the different legacies of Dutch and Belgian rule explain these different development outcomes if they do at all By discussing the comparative features and development of Dutch and Belgian rule the book aims to 1 to contribute to a deeper understanding of the role of colonial institutional legacies in long run patterns of economic divergence in the modern era 2 to fill in a huge gap in the comparative colonial historical literature which focuses largely on the comparative evolution of the British French Spanish and Portuguese Empires 3 to add a focused and well motivated comparative case study to the increasing strand of literature analyzing the marked differences in economic and political development in Asia and Africa during the postcolonial era Covering such issues as agriculture manufacturing and foreign investment human capital fiscal policy labour coercion and mineral resource management this book offers a highly original and scholarly contribution to the literature on colonial history and development economics Agricultural Transformation in a Global History Perspective Ellen Hillbom, Patrick Svensson, 2013 History teaches us that agricultural growth and development is necessary for achieving overall better living conditions in all societies Although this process may seem homogenous when looked at from the outside it is full of diversity within This book captures this diversity by presenting eleven independent case studies ranging over time and space By comparing outcomes attempts are made to draw general conclusion and lessons about the agricultural transformation process **The Management of the National Debt of the United Kingdom 1900-1932** Jeremy Wormell, 2002-09-11 This impressive and pioneering work describes and analyses the management of the national debt of the United Kingdom from the Boer War 1899 1902 to the period of the Great Depression in the early 1930s It therefore spans the expansion of the debt during the Great War of 1914 18 and the struggle to bring its structure and cost under control in the decade and a half following Armistice The Management of the National Debt in the United Kingdom is the first definitive work on the subject Using an impressive array of research from archives and unpublished material Jeremy Wormell has brought together material that is unavailable in any other form It will be an invaluable resource for political and economic historians as well as economists in general civil servants bankers and financial journalists **Bengal Industries and the British Industrial Revolution (1757-1857)** Indrajit Ray, 2011-08-09 This book seeks to enlighten two grey areas of industrial historiography Although Bengal industries were globally dominant on the eve of the industrial revolution no detailed literature is available

about their later course of development A series of questions are involved in it Did those industries decline during the spells of British industrial revolution If yes what were their reasons If not the general curiosity is On which merits could those industries survive against the odds of the technological revolution A thorough discussion on these issues also clears up another area of dispute relating to the occurrence of deindustrialization in Bengal and the validity of two competing hypotheses on it viz i the mainstream hypothesis of market failures and ii the neo marxian hypothesis of imperialistic state interventions

Ideas and Economic Crises in Britain from Attlee to Blair (1945-2005) Matthias Matthijs, 2012-08-21

During the period from 1945 to 2005 Britain underwent two deep seated institutional transformations when political elites successfully challenged the prevailing wisdom on how to govern the economy Attlee and Thatcher were able to effectively implement most of their political platforms During this period there were also two opportunities to challenge existing institutional arrangements Heath s U turn in 1972 signalled his failure to implement the radical agenda promised upon election in 1970 whilst Tony Blair s New Labour similarly failed to instigate a major break with the Thatcherite settlement Rather than simply retell the story of British economic policymaking since World War II this book offers a theoretically informed version of events which draws upon the literatures on institutional path dependence economic constructivism and political economy to explain this puzzle It will be of great interest to both researchers and postgraduates with an interest in British economic history and the fields of political economy and economic crisis more widely
