Harpers Ferry Armory and the New Technology Merritt Roe Smith,2015-03-19 Focusing on the day to day operations of the U S armory at Harpers Ferry Virginia from 1798 to 1861 this book shows what the new technology of mechanized production meant in terms of organization management and worker morale A local study of much more than local significance it highlights the major problems of technical innovation and social adaptation in antebellum America Merritt Roe Smith describes how positions of authority at the armory were tied to a larger network of political and economic influence in the community how these relationships in turn affected managerial behavior and how local social conditions reinforced the reactions of decision makers He also demonstrates how craft traditions and variant attitudes toward work vis vis New England created an atmosphere in which the machine was held suspect and inventive activity was hampered Of central importance is the author's analysis of the drastic differences between Harpers Ferry and its counterpart the national armory at Springfield Massachusetts which played a pivotal role in the emergence of the new technology The flow of technical information between the two armories he shows moved in one direction only north to south In the end Smith concludes the stamina of local culture is paramount in explaining why the Harpers Ferry armory never really flourished as a center of technological innovation Pointing up the complexities of industrial change this account of the Harpers Ferry experience challenges the commonly held view that Americans have always been eagerly receptive to new technological advances

Springfield Massachusetts capping a nearly 32 year history of job loss and work relocation from the sprawling factory The author a former Bosch worker and the business agent for the union representing nearly 1 200 Bosch employees when the plant closed interjects his personal recollections into the story For more than 150 years Springfield stood at the center of a prosperous 200 mile industrial corridor along the Connecticut River between Bridgeport Connecticut and Springfield Vermont populated with hundreds of machine tool and metalworking plants and thousands of workers This book is a historical account of the profound economic collapse of the Connecticut River Valley region with a particular focus on Bosch its workers and its union The shutdown is placed in the context of the wider region s deindustrialization The closure marked the watershed for large firm metalworking and metalworking unions in the Connecticut River Valley The book also describes how the United States in a ten year period from the mid 1970s to the mid 1980s went from being the world's leading exporter of machine tools to its leading importer and how that sharp decline affected the region s leading city Springfield Massachusetts which by 2005 was in danger of bankruptcy **A Volunteer in the Regulars** Mark A. Meyer, 2006-12-20 A century and a half before the modern information technology revolution machinists in the eastern United States created the nation s first high technology industries In iron foundries and steam engine works locomotive works machine and tool shops textile machinery firms and firearms manufacturers these resourceful workers pioneered the practice of dispersing technological expertise through communities of practice In the first book to study this phenomenon since the 1916 classic English and American Tool Builders David R Meyer examines the development of skilled labor

Nelson, 2024-01-02 The second volume of an ambitious new economic history of American higher education Capital of Mind is the second volume in a breathtakingly ambitious new economic history of American higher education Picking up from the first volume Exchange of Ideas Adam R Nelson looks at the early decades of the nineteenth century explaining how the idea of the modern university arose from a set of institutional and ideological reforms designed to foster the mass production and mass consumption of knowledge This industrialization of ideas mirrored the industrialization of the American economy and catered to the demands of a new industrial middle class for practical and professional education From Harvard in the north to the University of Virginia in the south new experiments with the idea of a university elicited intense debate about the role of scholarship in national development and international competition and whether higher education should be supported by public funds especially in periods of fiscal austerity The history of capitalism and the history of the university Nelson reveals are intimately intertwined

which raises a host of important questions that remain salient today How do we understand knowledge and education as commercial goods Should they be public or private Who should pay for them And fundamentally what is the optimal system of higher education for a capitalist democracy The United States Army and the Making of America Robert Wooster, 2021-04-01 The United States Army and the Making of America From Confederation to Empire 1775 1903 is the story of how the American military and more particularly the regular army has played a vital role in the late eighteenth and nineteenth century United States that extended beyond the battlefield Repeatedly Americans used the army not only to secure their expanding empire and fight their enemies but to shape their nation and their vision of who they were often in ways not directly associated with shooting wars or combat That the regular army served as nation builders is ironic given the officer corps obsession with a warrior ethic and the deep seated disdain for a standing army that includes Thomas Jefferson s Declaration of Independence the writings of Henry David Thoreau and debates regarding congressional appropriations Whether the issue concerned Indian policy the appropriate division of power between state and federal authorities technology transportation communications or business innovations the public demanded that the military remain small even as it expected those forces to promote civilian development Robert Wooster's exhaustive research in manuscript collections government documents and newspapers builds upon previous scholarship to provide a coherent and comprehensive history of the U S Army from its inception during the American Revolution to the Philippine American War Wooster integrates its institutional history with larger trends in American history during that period with a special focus on state building and civil military relations The United States Army and the Making of America will be the definitive book on the army s relationship with the nation from its founding to the dawn of the twentieth century and will be a valuable resource for a generation of undergraduates graduate students and virtually any scholar with an interest in the U S Army American frontiers and borderlands the American West or eighteenth and nineteenth century nation building Tracing Hospital Boundaries ,2020-04-06 Tracing Hospital Boundaries explores for the first time how the forces of both integration and segregation shaped hospitals and their communities between the eleventh and twentieth centuries in Europe North America and Africa Within this broad comparative context it also shines a light on a number of case studies from Southeastern Europe The eleven chapters show how people s access to and experience of healthcare institutions was affected by social cultural and economic as well as medical dynamics These same factors intersected with developing healthcare technologies to shape hospital design and location as well as internal policies and practices The volume produces a new history of the hospital in which boundaries both physical and symbolic are frequently contested and redrawn Contributors are Irena Benyovsky Latin David Gentilcore Annemarie Kinzelbach Rina Kralj Brassard Ivana Lazarevi Clement Masakure Anna Peterson Egidio Priani Gordan Ravan i Jonathan Reinarz Jane Stevens Crawshaw David Theodore Christina Vanja George Weisz and Valentina ivkovi Merchants of Doubt Naomi Oreskes, Erik M.
