*Terrorism Risk Assessment Instruments* R. Corrado, G. Wössner, A. Merari, 2021-03-25. The search for a distinct terrorist profile has been going on for many years and while it is generally agreed that nobody is born a terrorist there is plenty of disagreement about why a person might become one. Whereas personal and situational push and pull factors can be combined to determine how and why young people become involved in terrorism preventing an individual from following a path that ends in violence without moral restraint poses an enormous challenge especially in an open society. This book presents papers from the NATO Advanced Research Workshop titled A Review of the Utility of Existing Terrorism Risk Assessment Instruments and Policies Is there the Need for Possible New Approaches held in Berlin Germany on 29-30 November 2019. Researchers were asked to present papers for discussion sessions with invited participants and practitioners from a number of NATO member and partner countries. Various assessment instruments for identifying problematic individuals at an early stage were presented by experts. It was generally agreed that due to cultural religious and other differences there is no simple way to identify the relatively few high risk individuals among the larger population of politically radicalized but not necessarily violent individuals who pose no threat. Framed by an Introduction and Conclusion the 16 chapters in the book are divided into three parts: Theory and Risk Threat Assessment Instrument Policy Themes Implementation of Politically Motivated Terrorism Protocols and Personality Traits Disorders Anti State Terrorism Profiles and the DSM 5 Personality Trait Instrument. This practice oriented book will be of interest to all those tasked with protecting society from some of its most dangerous members.

**The Age of Lone Wolf Terrorism** Mark S. Hamm, Ramón Spaaij, 2017-05-09. The lethality of lone wolf terrorism has reached an all time high in the United States. Isolated individuals using firearms with high capacity magazines are committing brutally efficient killings with the aim of terrorizing others yet there is little consensus on what connects these crimes and the motivations behind them. In *The Age of Lone Wolf Terrorism* terrorism experts Mark S Hamm and Ram n Spaaij combine criminological theory with empirical and ethnographic research to map the pathways of lone wolf radicalization helping with the identification of suspected behaviors and recognizing patterns of indoctrination. Reviewing comprehensive data on these actors including more than two hundred terrorist incidents Hamm and Spaaij find that a combination of personal and political grievances lead lone wolves to befriend online sympathizers whether jihadists white supremacists or other antigovernment extremists and then announce their intent to commit terror when triggered. Hamm and Spaaij carefully distinguish between lone wolves and individuals radicalized within a group dynamic. This important difference is what makes this book such a significant manual.

for professionals seeking richer insight into the transformation of alienated individuals into armed warriors Hamm and Spaaij conclude with an analysis of recent FBI sting operations designed to prevent lone wolf terrorism in the United States describing who gets targeted strategies for luring suspects and the ethics of arresting and prosecuting citizens
