Managing Uncertainty Harvard Business Review, 1999 **Wounded Leaders: How Their Damaged Past Affects Your Future** Allan Bonner, 2014-10-17 Why are we in a leadership crisis Up to 85% of mergers and acquisitions destroy value executives are in jail economies are shaky and politics isn't providing answers This new book provides answers Based on my doctoral research and work with leaders on 5 continents for 25 years I also draw on my experiences teaching and learning in a Karate Dojo You will find out why leaders fail and what can be done about it a blend of Eastern and Western approaches *Innovation Capability Maturity Model* Patrick Corsi, Erwan Neau, 2015-05-04 Whilst innovation remains of course an approach a process and is still often even reduced to a set of results it essentially reflects a way of thinking evolution Time is up for varying the thinking methods according to capacities and learned and available competencies with a view to change the thinking level No domain and no sector is immune to this transformation in today's world Having clarified our ideas through this book we remain ever more convinced that the leveled maturity approach will lead to real advances in innovation over the 2020 years Hence the competitive capacities of organizations must evolve As we strive in our quest for new inspiration sources in business let us reckon that all is bound to evolving including the way to evolve In that resides the very capacity to innovate *Handbook of Research on Value Creation for Small and Micro Social Enterprises* Maher, Chi, 2018-12-07 In the corporate world businesses are focused on increasing their revenues but ignore the cries of social and environmental concerns from nearby communities At the other end of the spectrum nonprofits seek to help their local communities but are constantly required to create fundraisers without having adequate time to put those collected donations to use The world needs an industry to combine civic engagement and public service with wealth and value creation to provide self sustaining opportunities for public services that are sometimes overlooked or ignored The Handbook of Research on Value Creation for Small and Micro Social Enterprises defines the concept of social enterprise and provides vital insight into

the importance of rebalancing creating and promoting economic activities that achieve social fairness cultural fulfillment and the protection of the environment While highlighting topics such as marketing strategies cross cultural frameworks and public policy this publication focuses on empowering rather than controlling sustainable solutions for various communities and consumers This book is ideally designed for researchers policymakers academicians who teach and or research small and micro social enterprises and advanced level students furthering their research exposure to pertinent topics in this field
