Representational Change and the Use of Metaphors in Problem Solving Benjamin Angerer, 2023-07-07 This book addresses a longstanding impasse in problem solving research if structured mental representations of problems are required for solving them how do those arise and if needed change The book argues that established theories underestimate this question due to methodological requirements Proposing to momentarily suspend these requirements including the focus on well defined puzzle tasks the book suggests to alternatively conduct exploratory studies with more complex open ended problems It presents a qualitative case study of participants working for several days on a mental paper folding task designed
