Haves And The Have Nots:

The Haves and the Have-Nots Branko Milanovic, Senior Scholar Visiting Presidential Professor Branko Milanovic, 2010-11 One of the world's leading experts on wealth poverty and the gap that separates them explains how wealth is unevenly spread throughout our world now and through time Economist Branko Milanovic uses history literature and stories straight out of today's newspapers to discuss one of the major divisions in our social lives between the haves and the have nots He reveals just how rich Elizabeth Bennet's suitor Mr Darcy really was how much Anna Karenina gained by falling in love how wealthy ancient Romans compare to today's super rich where in Kenyan income distribution was Obama's grandfather how we should think about Marxism in a modern world and how location where one is born determines his wealth He goes beyond mere entertainment to explain why inequality matters how it damages our economic prospects and how it can threaten the foundations of the social order that we take for granted From publisher description [Democracy in the Digital Age](#) Anthony G. Davis, 2024-03-19 An examination of the ethical issues raised by the possibility of human life extension including its desirability unequal access and the threat of overpopulation Life extension slowing or halting human aging is now being taken seriously by many scientists Although no techniques to slow human aging yet exist researchers have successfully slowed aging in yeast mice and fruit flies and have determined that humans share aging related genes with these species In *New Methuselahs* John Davis offers a philosophical

discussion of the ethical issues raised by the possibility of human life extension Why consider these issues now before human life extension is a reality Davis points out that even today we are making policy and funding decisions about human life extension research that have ethical implications With New Methuselahs he provides a comprehensive guide to these issues offering policy recommendations and a qualified defense of life extension After an overview of the ethics and science of life extension Davis considers such issues as the desirability of extended life whether refusing extended life is a form of suicide the Malthusian threat of overpopulation equal access to life extension and life extension and the right against harm In the end Davis sides neither with those who argue that there are no moral objections to life enhancement nor with those who argue that the moral objections are so strong that we should never develop it Davis argues that life extension is on balance a good thing and that we should fund life extension research aggressively and he proposes a feasible and just policy for preventing an overpopulation crisis

Dawn of Unity John B. Leonard, 2011-03-23 Have you ever thought about the meaning of the phrase in Pres Abraham Lincolns Gettysburg Address where he refers to a government of the people by the people and for the people The author believes that our present system by allowing money to influence the process is not truly a government by the people but is rather a government by the wealthy elite operating primarily for their benefit The book proposes that for a government to truly be by the people all people should have equal power and play an active role in determining government policy It further suggests that this can only be achieved when people unify into a structure of power which the book describes and let their governmental bodies know what changes the people collectively desire The major portion of this book is dedicated to addressing areas of social concern considering present policies from the standpoint of the underlying principles involved and suggesting possible remedies or changes The subjects addressed include industry disparity in wages taxation on money and investments rather than income and purchases money creation and control governments responsibility inappropriately delegated to a private banking trust imperialism problems from using force rather than diplomacy to obtain needs education addressing childrens need for security acceptance and hope law restrictions upon personal freedom justice rehabilitation rather than retribution welfare and land ownership Together with these the book proposes two protocols one to remove the power of money and wealth from electoral processes and lobbying practices and the other an easy to implement procedure that will put all motivated individuals in control of decision making processes within all governmental bodies city county state and federal Herein is a viable way for all people to obtain governance that truly serves all That way is through the power of cooperative unity

Jarice Hanson, 2007-07-30 Just as the automobile radically changed people s lives at the beginning of the 20th century so too has the revolution in online services including blogging podcasting videogaming shopping and social networking and cell

phone use changed our lives at the turn of the 21st century. In addition, many other services, activities, and devices including the Palm Pilot, the BlackBerry, the iPod, digital cameras, and cell cameras have been made possible by the combination of these two technologies. Whereas the automobile allowed people for the first time to work in cities and live comfortably in the suburbs, extending the long commute beyond the limits previously circumscribed by public transportation, the Internet and cell phone allow us to interact with others from around the world or a few hundred miles from where we work or live, giving rise to the telecommuting phenomenon and allowing us to stay in touch with friends and families in the new virtual environment. As Hanson demonstrates in her new book, these technologies enable us to work and play 24/7 anytime, anywhere. What does this mean for us as individuals and for society as a whole? What are the social implications of this technological revolution that we have witnessed in the short span of about 20 years? Do people of different generations use these technologies in the same ways, or do they adopt them to support their communication habits formed at different times of their lives? How does the illusion of control provided by these technologies affect the way we think about what is meaningful in our lives? Hanson examines the wide-ranging impact of this change. How do individuals posting their viewpoints on the Internet affect democracy? Is it possible to ever completely prevent identity theft over the Internet? How permanent is information stored on the Internet or on a hard drive? Do cell phones change the way people think about privacy or the way they communicate with others? Does email? Do videogames teach new social principles? Do cell phones and the Internet change traditional communication behaviors and attitudes? Hanson discusses these crucial issues and explores to what extent individuals do have control, and she assesses how social and governmental services are responding to or running from the problems posed by these new technologies.

The Sky is The Limit Emile Barry, 2012-03-08 This book explores a new theory which delves into the explanation of God and how mankind came to be. It starts by questioning the idea of God and continues with how the idea was exploited by the messengers. It explores the topics of Evolution, Science, War, and Society. The moon conspiracy controversy is thoroughly examined, revealing new information which has been hidden in plain sight for decades. It then brings into the fold the question of who controls the planet, the concept of a shadow world government, and its connection to extraterrestrial life. It explores the State of Denial the human race is in and concludes with a new theory of God and how the Universe may have been created. It is not for the faint-hearted. Los Angeles School Journal, 1922

Unequal America Anthony DiMaggio, 2020-12-09 This book examines Americans and their beliefs about the class divide in the United States. It argues that Americans' beliefs about class and the economic divide develop through a multistep process. Economic affluence
