Self-Development and College Writing Nick Tingle,2004-09 Nick Tingle investigates the psychoanalytic dimensions of composition instruction in Self Development and College Writing to boldly illustrate that mastering academic prose requires students to develop psychologically as well as cognitively Asserting that writing instruction should be an engaging developmental process for both teachers and students he urges reaching for new levels of consciousness in the classroom to aid students in realigning their subjective relationships with knowledge and truth Drawing on psychoanalytic theory and twenty years of experience as a teacher Tingle outlines the importance of moving beyond usual ways of thinking abandoning the common sense of everyday reality and coming to understand beliefs as beliefs and not absolutes These developmental moves must be accompanied Tingle says by a new attitude towards language not as something that points to things but as a series of concepts that arrange the very things one points to And this development is necessary not just in order to perform well in the writing class but also to fully participate in and reap the academic rewards of structured university life Self

Development and College Writing calls attention to the psychological destabilization this method may produce for students Tingle explains that if writing instructors are to respond to this destabilization they must conceive of the classroom as a transitional space or a kind of holding environment They must also become aware of their psychological allegiances to particular theories of writing if they are to construct such environments But the goal of the transitional environment is worth pursuing Tingle argues contending that university education fails to address students developmental needs With purposeful writing and deft analyses Tingle shows that this goal also affords a means by which to place writing courses at the center of the educational curriculum Conceived as a transitional space the writing class may support and stabilize students in their developmental passage thereby fostering an improved understanding of their academic work and more importantly an increased intellectual understanding of themselves and the complex world in which they live The Railway Clerk ,1924
