Harvard Architecture Review Ethics:

Ethics and the Practice of Architecture Barry Wasserman, Patrick J. Sullivan, Gregory Palermo, 2000-03-07 From theory to practice a unique well rounded guide to ethics for today's architect How does an architect assist a community in evaluating alternative designs Resolve a dispute with a contractor Take into account a project's impact on the natural environment When it comes to questions like these making decisions about what ought to be done or what is the best or right solution requires more than sound technical knowledge and strong design talent It demands a solid understanding of the ethical issues that lie at the heart of architectural practice Ethics and the Practice of Architecture offers a complete broad based introduction to this crucial subject First it examines basic ethical theories and their application to architecture and discusses different ways of identifying ethical content in architecture Bridging the gap between theory and practice the second part of the book surveys different professional settings and building project processes that frequently hold ethical concerns and charts the ethical mandates that arise from them In the final section of the book thirty case studies explore a wide range of ethical dilemmas encountered in architectural practice with useful guidance on how to work through them effectively Arranged by topics that span the key phases of a project from pre design through post occupancy evaluation these case studies allow a detailed look at ethical concerns in real life situations where multiple issues are often at stake Providing a practical framework for the exploration of ethical issues in architecture today Ethics and the Practice of Architecture is an excellent resource for present and future architects in all areas of the field *The Ethical Architect* Tom Spector, 2012-04-17 Many believe that the moral mission of architecture has been in serious decline for the last 25 years In this important new book Tom Spector points out the dilemmas of architectural practice and offers a theoretical and practical basis for an examination and transformation of the quandaries the profession now faces What makes a good building or a good architect Are there limits to an architect's ethical or legal responsibilities in a building process where architecture plays an increasingly smaller role Is preservation a moral imperative What happens when building codes and ethical responsibilities are in conflict In *The Ethical Architect* Spector investigates the moral underpinnings and implications of leading architectural theories subjecting them to the analytical techniques of moral philosophy His conclusions provide a road map to help architects make the right decision in the difficult tradeoffs that confront designers on a daily basis Spector estimates that more than 100 000 decisions go into the design of an average sized building *The Ethical Architect* is a work of theory but refers to real buildings and real world problems It is Spector's call to arms for his profession and a must read for practicing architects and students alike **The Publishers' Trade List Annual**, 1990 **The Ashgate Research Companion to Planning Theory** Patsy Healey, 2016-11-03 At a time of potentially radical changes in the ways in which humans interact with their environments through financial environmental and or social crises the raison d'être of spatial planning faces significant conceptual and empirical challenges This Companion presents a multidimensional collection of critical narratives

of conceptual challenges for spatial planning The authors draw on various disciplinary traditions and theoretical frames to explore different ways of conceptualising spatial planning and the challenges it faces Through problematising planning itself the values which underpin planning and theory practice relations contributions make visible the limits of established planning theories and illustrate how by thinking about new issues or about issues in new ways spatial planning might be advanced both theoretically and practically There cannot be definitive answers to the conceptual challenges posed but the authors in this collection provoke critical questions and debates over important issues for spatial planning and its future A key question is not so much what planning theory is but what might planning theory do in times of uncertainty and complexity An underlying rationale is that planning theory and practice are intrinsically connected The Companion is presented in three linked parts issues which arise from an interactive understanding of the relations between planning ideas and the political institutional contexts in which such ideas are put to work key concepts in current theorising from mainly poststructuralist perspectives and what discussion on complexity may offer planning theory and practice

The Architecture of the British Library at St. Pancras Roger Stonehouse, Gerhard Stromberg, 2004-08-02 In a series of interrelated essays this book describes the British Library and the issues surrounding its design construction purpose and place in the architectural canon Examining the experience of the building together with its form these essays explore the ideas and aspirations behind its conception and its construction offering insight into this striking controversial and stimulating building For artists architects and building professionals interested in the current debates concerning architecture and our culture The Architecture of the British Library at St Pancras is a stimulating read

Theorizing a New Agenda for Architecture: Kate Nesbitt, 1996-03 Theorizing a New Agenda for Architecture An Anthology of Architectural Theory collects in a single volume the most significant essays on architectural theory of the last thirty years A dynamic period of reexamination of the discipline the postmodern era produced widely divergent and radical viewpoints on issues of making meaning history and the city Among the paradigms presented are architectural postmodernism phenomenology semiotics poststructuralism deconstruction and feminism By gathering these influential articles from a vast array of books and journals into a comprehensive anthology Kate Nesbitt has created a resource of great value Indispensable to professors and students of architecture and architectural theory Theorizing a New Agenda also serves practitioners and the general public as Nesbitt provides an overview a thematic structure and a critical introduction to each essay The list of authors in Theorizing a New Agenda reads like a Who's Who of contemporary architectural thought Tadao Ando Giulio Carlo Argan Alan Colquhoun Jacques Derrida Peter Eisenman Marco Frascari Kenneth Frampton Diane Ghirardo Vittorio Gregotti Karsten Harries Rem Koolhaas Christian Norberg Schulz Aldo Rossi Colin Rowe Thomas Schumacher Ignasi de Sol Morales Rubi Bernard Tschumi Robert Venturi and Denise Scott Brown and Anthony Vidler A bibliography and notes on all the contributors are also included

Moshe Safdie: Volume 1 Moshe Safdie, The Images Publishing Group, 2009 Safdie is one of the greatest and most

energetic architectural thinkers of our time This book features essays on his work illustrated in color photographs **Urban Ethics** Eamonn Canniffe, 2006-06-01 Although contemporary practice in urbanism has many sources of design guidelines it lacks theory to provide a flexible approach to the complexities of most urban situations The author provides that theoretical framework looking beyond the style obsession of urban makeovers to the fundamental elements of city making The scope of this book takes in illuminating historical analysis and significant theoretical coherence while recent case studies link the physical environment to the citizens within it ultimately offering a new methodology for the analysis and design of urban spaces which encourages a balance between diversity and community Ethics for the Built Environment Peter Fewings, 2008-09-16 Praise for Construction Project Management by Peter Fewings The complexity of the subject matter has at least been reinforced in an informative document with a large helping of common sense written in a comprehensive and well structured manner Building Engineer Magazine Ethics are not an optional extra for the professional in the built environment sector Whether you re a civil engineer an architect or a construction project manager an understanding of the ethical context of your work is an institutional requirement and a commercial demand not to mention a matter of personal pride Sometimes as a construction professional you will be faced with complicated dilemmas as commercial responsibilities clash with health and safety environmental or competition concerns Peter Fewings brings together practical construction project management experience with ethical theory to establish how best to deal with difficult issues **The Oxford Handbook of Digital Ethics** Carissa Véliz, 2024 This Handbook offers a lively authoritative up to date exploration of pressing ethical issues in our digital world An international team of philosophers give critical appraisals of research in the this fast growing field exploring novel approaches and arguments that will shape the agenda on digital ethics for years to come The Icon Project Leslie Sklair, 2017-02-27 In the last quarter century a new form of iconic architecture has appeared throughout the world s major cities Typically designed by globe trotting starchitects or by a few large transnational architectural firms these projects are almost always funded by the private sector in the service of private interests Whereas in the past monumental architecture often had a strong public component the urban ziggurats of today are emblems and conduits of capitalist globalization In The Icon Project Leslie Sklair focuses on ways in which capitalist globalization is produced and represented all over the world especially in globalizing cities Sklair traces how the iconic buildings of our era elaborate shopping malls spectacular museums and vast urban megaprojects constitute the triumphal Icon Project of contemporary global capitalism promoting increasing inequality and hyperconsumerism Two of the most significant strains of iconic architecture unique icons recognized as works of art designed by the likes of Gehry Foster Koolhaas and Hadid as well as successful derivative icons that copy elements of the starchitects work speak to the centrality of hyperconsumerism within contemporary capitalism Along with explaining how the architecture industry organizes the social production and marketing of iconic structures he also shows how corporations increasingly dominate the built environment and promote the trend

towards globalizing consumerist cities The Icon Project Sklair argues is a weapon in the struggle to solidify capitalist hegemony as well as reinforce transnational capitalist control of where we live what we consume and how we think
