The Harvard Classics Anthology Complete 51 Volumes is an unparalleled journey through the rich tapestry of Western literary and philosophical thought. Curated with an eye for the monumental and the profound, this collection spans epic poetry, philosophical treatises, scientific discourse, and pioneering political theory. From the stirring plays of Shakespeare to the foundational dialogues of Plato, each work contributes to the anthology's overarching exploration of human inquiry, creativity, and the quest for knowledge. It is a treasury of diverse styles and genres, featuring standout pieces that provoke reflection and insight without providing definitive answers, but instead fostering a legacy of questions that drive human progress. The assembly of authors in this anthology reads as a who's who of intellectual giants whose works have each shaped the world in indelible ways. Here, Renaissance dramatists mingle with Enlightenment philosophers, and Romantic poets converse with ancient historians. These authors, from Goethe to Montaigne, reflect a broad spectrum of cultural and historical backgrounds, representing movements such as the Enlightenment, the Reformation, and the Scientific Revolution, united in their pursuit to articulate the human experience. Their collective voices enrich this anthology, offering comprehensive viewpoints that underscore the interconnectedness of thought across eras. This extensive compendium is essential for anyone seeking to immerse themselves in the pillars of Western literary and intellectual heritage. Collier & Son Corporation,1926      Neither Ghost nor Machine Jeremy Sherman,2017-10-10 If the universe is aimless how do selves and aims emerge Why do living beings have aims when inanimate things do not Current science encourages us to reject the ghost in the machine explanation that something called spirit soul mind or will was somehow breathed into matter and instead accept that selves are just matter in aimless mechanistic motion like everything else But what about life s many emergent qualities the multifarious purposes that shape actual physical behavior not just in human lives but in all of life Even the simplest life forms have adaptive functions traits that accomplish goals or ends How can we explain the nature and origin of selves and aims without resorting to supernatural forces or explaining them away as nothing but cause and effect mechanisms In Neither Ghost nor Machine Jeremy Sherman explains the emergence of selves and aims in an aimless universe He distills for a general audience the theory developed by renowned neuroscientist Terrence Deacon which extends the breakthrough constraint based insight that inspired evolutionary information and self organization theory Emergent dynamics theory provides a testable hypothesis for how mattering arose from matter function from physics and means to ends behavior from cause and effect dynamics It offers a physics of purpose demonstrating that there is a strictly physical explanation for the emergence and nature of selves and aims one that shows our existence in an otherwise inanimate universe is not absurd Neither Ghost nor Machine bridges the gap between the hard and soft sciences suggesting fresh and exciting solutions to philosophical mysteries that have perplexed humanity for millennia from free will to causality to morality
