Has Freedom A Future Convergence Ser:

Smart Global Value Chain Adarsh Garg, Amrita Jain, Manisha Singh, Fadi Al-Turjman, 2024-08-01 Innovation is a critical facilitator in today's fast changing global value chain landscape. This book describes the interplay of technological breakthroughs enabling efficiency and intelligence within value chains, making them smart and sustainable. From service models and smart technologies to the application of smart global value chains across sectors, this book offers a unique insight into the transformational role of smart global value chains in bringing agility and sustainability to the global value chain ecosystem. This book is an essential guide for academics, industry leaders, and policymakers to navigate the future where smart technologies like artificial intelligence, machine learning, blockchain, Internet of Things, and beyond reshape the global economic landscape.

Is Two-Tier Health Care the Future? Colleen M. Flood, Bryan Thomas, 2020-04-28 Canadians are deeply worried about wait times for health care. Entrepreneurial doctors and private clinics are bringing Charter challenges to existing laws restrictive of a two-tier system. They argue that Canada is an outlier among developed countries in limiting options to jump the queue. This book explores whether a two-tier model is a solution. In *Is Two Tier Health Care the Future*, leading researchers explore the public and private mix in Canada, Australia, Germany, France, and Ireland. They explain the history and complexity of interactions between public and private funding of health care and the many regulations and policies found in different countries used to both inhibit and sometimes to encourage two-tier care, such as tax breaks. This edited collection provides critical evidence on the different approaches to regulating two-tier care across different countries and what could work in Canada. Published in English.
