Changing Corporate America from Inside Out Nicole Christine Raeburn, 2004 Despite the backlash against lesbian and gay rights occurring in cities and states across the country a growing number of corporations are actually expanding protections and benefits for their gay and lesbian employees Why this should be and why some corporations are increasingly

open to inclusive policies while others are determinedly not is what Nicole C Raeburn seeks to explain in *Changing Corporate America from Inside Out* A long overdue study of the workplace movement Raeburn's analysis focuses on the mobilization of lesbian gay and bisexual employee networks over the past fifteen years to win domestic partner benefits in Fortune 1000 companies Drawing on surveys of nearly one hundred corporations with and without gay networks intensive interviews with human resources executives and gay employee activists as well as a number of case studies Raeburn reveals the impact of the larger social and political environment on corporations openness to gay inclusive policies the effects of industry and corporate characteristics on companies willingness to adopt such policies and what strategies have been most effective in transforming corporate policies and practices to support equitable benefits for all workers Nicole C Raeburn is assistant professor and chair of sociology at the University of San Francisco

Unequal Opportunity Richard J. Wolitski, Ron Stall, Ronald O. Valdiserri, 2008 Most public health students academicians and practitioners recognize the association between racial ethnic minority status and the disproportionate burden of preventable disease in the United States Much less attention has been directed however toward health disparities that affect gay and bisexual men These disparities affect the lives of an estimated 5.374 million American men and are an important concern for public health Until very recently the relative invisibility of this group and a paucity of empirical data have hampered attempts to identify health disparities experienced by gay and bisexual men This book proposes to review and synthesize evidence of health disparities among gay and bisexual men identify individual and community factors that contribute to these disparities and articulate strategies for public health efforts to eliminate disparities To date these disparities have been largely discussed in isolation in the research literature in a manner that does not permit a comprehensive examination of these problems their underlying causes and potential solutions Thus a primary emphasis of the book will be to document health disparities among gay and bisexual men while also describing public health solutions to these challenges

American Memories Joachim J. Savelsberg, Ryan D. King, 2011-09-01 In the long history of warfare and cultural and ethnic violence the twentieth century was exceptional for producing institutions charged with seeking accountability or redress for violent offenses and human rights abuses across the globe often forcing nations to confront the consequences of past atrocities The Holocaust ended with trials at Nuremberg apartheid in South Africa concluded with the Truth and Reconciliation Commission and the Gacaca courts continue to strive for closure in the wake of the Rwandan genocide Despite this global trend toward accountability American collective memory appears distinct in that it tends to glorify the nation's past celebrating triumphs while eliding darker episodes in its history In *American Memories* sociologists Joachim Savelsberg and Ryan King rigorously examine how the United States remembers its own and others atrocities and how institutional responses to such crimes including trials and tribunals may help shape memories and perhaps impede future violence *American Memories* uses historical and media accounts court records and survey research to examine a number of atrocities from the nation's past including the massacres of civilians by U.S. military

in My Lai Vietnam and Haditha Iraq The book shows that when states initiate responses to such violence via criminal trials tribunals or reconciliation hearings they lay important groundwork for how such atrocities are viewed in the future Trials can serve to delegitimize violence even by a nation's military by creating a public record of grave offenses But the law is filtered by and must also compete with other institutions such as the media and historical texts in shaping American memory Savelsberg and King show for example how the My Lai slayings of women children and elderly men by U S soldiers have been largely eliminated from or misrepresented in American textbooks and the army's reputation survived the episode untarnished The American media nevertheless evoked the killings at My Lai in response to the murder of twenty four civilian Iraqis in Haditha during the war in Iraq Since only one conviction was obtained for the My Lai massacre and convictions for the killings in Haditha seem increasingly unlikely Savelsberg and King argue that Haditha in the near past is now bound inextricably to My Lai in the distant past With virtually no criminal convictions and none of higher ranks for either massacre both events will continue to be misrepresented in American memory In contrast the book examines American representations of atrocities committed by foreign powers during the Balkan wars which entailed the prosecution of ranking military and political leaders The authors analyze news accounts of the war's events and show how articles based on diplomatic sources initially cast Serbian President Slobodan Milosevic in a less negative light but court based accounts increasingly portrayed Milosevic as a criminal solidifying his image for the public record American Memories provocatively suggests that a nation's memories don't just develop as a rejoinder to events they are largely shaped by institutions In the wake of atrocities how a state responds has an enduring effect and provides a moral framework for whether and how we remember violent transgressions Savelsberg and King deftly show that such responses can be instructive for how to deal with large scale violence in the future and hopefully how to deter it A Volume in the American Sociological Association's Rose Series in Sociology Challenges and Choices James A. Holstein, Gale Miller, The social constructionist perspective has revolutionized the way that social scientists investigate social problems Constructing Social Problems Spector and Kitsuse 1977 2001 offered the guiding statement of the approach which both transformed and revitalized the sociology of social problems propelling it into a quarter century of exciting and innovative empirical research John Kitsuse and Malcolm Spector challenged conventional approaches to the field they insisted on treating social problems as social constructions as the products of claims making and constitutive definitional processes The purpose of this book is to highlight contemporary challenges to the social constructionist perspective on social problems In 1993 two collections of essays Reconsidering Social Constructionism Debates in Social Problems Theory Holstein and Miller 1993 and Constructionist Controversies Issues in Social Problems Theory Miller and Holstein 1993 brought a wide variety of constructionist challenges into focus Challenges and Choices attempts to distill these debates and offers some compelling suggestions for how challenges may be met and where constructionist studies might proceed in the future While each of the essays in this volume deeply appreciates the

constructionist approach each of them points to issues and choices that social constructionists must confront if the perspective is to continue to be a vital part of ongoing debates on social problems The essays critique previous constructionist formulations make suggestions for advancing expanding or diversifying the constructionist agenda and challenge the perspective to move in new directions They remind us that social constructionism is an ongoing not a finished product and the essays point to some of the choices available to social constructionists in moving their projects into new even uncharted territories James A Holstein and Gale Miller are professors in the Department of Social and Cultural Sciences at Marquette University

Losing the Race David Gadd,Bill Dixon,2018-04-17 Based on a two year research project funded by the Economic and Social Research Council ESRC this book explores why many of those involved in racially motivated crime seem to be struggling to cope with economic cultural and emotional losses in their own lives Drawing on in depth biographical interviews with perpetrators of racist crimes and focus group discussions with ordinary people living in the same communities the book explores why it is that some people and not others feel inclined to attack immigrants and minority ethnic groups The relationships between ordinary racism racial harassment and the politics of the British National Party are also explored as are the enduring impacts of deindustrialisation economic failure and immigration on white working class communities The book assesses the legacy of New Labour policy on community cohesion hate crime and respect in terms of its impact on racist attitudes and racist incidents and explores how it is that racist attacks including racist murders continue to happen

Tangled Up in Red, White, and Blue Christine A. Kelly,2001 In Tangled Up in Red White and Blue Christine Kelly examines the role that progressive social movements might play in the recovery and expansion of democracy and justice in the new millennium Kelly simultaneously combines an analysis of several modernization theses with respect to the role of social movements with a unique sense of the way that the American ideological and institutional context has shaped progressive social movements for better and worse in our era Kelly candidly confronts contemporary American radicalism from the perspective of a movement participant included is a rare treatment of the 1980s student movement but with an eye on the future Tangled Up in Red White and Blue is a bold and sophisticated study combining the frequently divorced interests of political theory institutional analysis and social movement studies both European and American
