Hausaland Divided William F. S. Miles, 2015-07-09 How have different forms of colonialism shaped societies and their politics William F S Miles focuses on the Hausa speaking people of West Africa whose land is still split by an arbitrary boundary established by Great Britain and France at the turn of the century

Moral Aspects of Economic Growth, and Other Essays Barrington Moore, Jr., 2018-03-15 Barrington Moore Jr one of the most distinguished thinkers in critical theory and historical sociology was long concerned with the prospects for freedom and decency in industrial society The product of decades of reflection on issues of authority inequality and injustice this volume analyzes fluctuating moral beliefs and behavior in political and economic affairs at different points in history from the early Middle Ages in England to the prospects for liberalism under twentieth century Soviet socialism The social sources of antisocial behavior principles of social inequality and the origins enemies and possibilities of rational discussion in public affairs these are among the topics Moore considers as he seeks to uncover the historical causes of some accepted forms of morality and to assess their social consequences The keynote essay examines how moral codes grew out of commercial practices in England from medieval times through the industrial revolution Moore pays special attention to conceptions of honesty and the temptation to evade that inform the volume as a whole In the other essays he considers particular political issues viewing political in its broadest sense as an unequal distribution of power and authority that carries a strong moral charge Free of preaching and advocacy his work offers a rare reasonable assessment of the morality of major social institutions over time

Making the Fascist Self Mabel Berezin, 2018-10-18 In her examination of the culture of Italian fascism Mabel Berezin focuses on how Mussolini's regime consciously constructed a nonliberal public sphere to support its political aims Fascism stresses form over content she believes and the regime tried to build its political support through the careful construction and manipulation of public spectacles or rituals such as parades commemoration ceremonies and holiday festivities The fascists believed they could rely on the motivating power of spectacle and experiential symbols In contrast with the liberal democratic notion of separable public and private selves Italian fascism attempted to merge the public and private selves in political spectacles creating communities of feeling in public piazzas Such communities were only temporary Berezin explains and fascist identity was only formed to the extent that it could be articulated in a language of pre-existing cultural identities In the Italian case those identities meant the popular culture of Roman Catholicism and the cult of motherhood Berezin hypothesizes that at particular historical moments certain social groups which perceive the division of public and private self as untenable on cultural grounds will gain political ascendancy Her hypothesis opens a new perspective on how fascism works

Language and Power Benedict R. O'G. Anderson, 2018-08-06 In this lively book Benedict R O G Anderson explores the cultural and political contradictions that have arisen from two critical facts in Indonesian history that while the Indonesian nation is young the Indonesian state is ancient originating in the early seventeenth century Dutch conquests and that contemporary politics are

conducted in a new language Bahasa Indonesia by peoples especially the Javanese whose cultures are rooted in medieval times Analyzing a spectrum of examples from classical poetry to public monuments and cartoons Anderson deepens our understanding of the interaction between modern and traditional notions of power the meditation of power by language and the development of national consciousness This volume brings together eight of Anderson s most influential essays written over the past two decades Most of the essays address aspects of Javanese political culture from the early nineteenth century when the Javanese did not yet have words for politics colonialism society or class through the early nationalism of the 1900s to the era of independence after World War II when deep internal tensions exploded into large scale massacres In the first group of essays Anderson considers how power was imagined in traditional Javanese society and how these imaginings shaped Indonesia s modern politics Other essays focus on the significance of the incongruences between the egalitarian ironizing national language through which modern Indonesia has been imagined and the powerful influence of the hierarchical authoritarian Javanese official culture Finally two essays on consciousness illuminate the crucial eras before and after the rise of Indonesia s nationalist movement One reflects on Javanese intellectuals phantasmagoric efforts to keep imagining Java as the island was overrun by colonial capitalism and absorbed into the huge heterogeneous Netherlands East Indies the second traces the transition from old culture to new nation through the autobiography of an eminent Javanese first generation nationalist politician

Democracy, Revolution, and History Theda Skocpol, 2018-10-18 The work of Barrington Moore Jr is one of the landmarks of modern social science A distinguished roster of contributors here discusses the influence of his best known work *Social Origins of Dictatorship and Democracy* Their individual perspectives combine in delineating Moore s contributions to the transformation of comparative and historical social science over the past several decades The essays in *Democracy Revolution and History* all address substantive and methodological problems asking questions about the different historical paths toward democratic or nondemocratic political outcomes Following Moore s example they use well researched comparative cases to make their arguments In the process they demonstrate how vital Moore s work remains to contemporary research in the social sciences This volume points as well to new frontiers of scholarship suggesting lines of work that build upon Moore s achievements

The SIJORI Cross-Border Region Francis E Hutchinson, Terence Chong, 2016-06-14 Twenty five years ago the governments of Singapore Malaysia and Indonesia agreed to jointly promote the city state the state of Johor in Malaysia and the Riau Islands in Indonesia Facilitated by common

cultural references a more distant shared history and complementary attributes interactions between the three territories developed quickly Logistics networks have proliferated and production chains link firms based in one location with affiliates or transport facilities in the other territories These cross border links have enabled all three locations to develop their economies and enjoy rising standards of living Initially economic in nature the interactions between Singapore Johor and the Riau Islands have multiplied and grown deeper Today people cross the borders to work go to school or avail of an increasing range of goods and services New political social and cultural phenomena have developed Policymakers in the various territories now need to reconcile economic imperatives and issues of identity and sovereignty Enabled by their proximity and increasing opportunities families have also begun to straddle borders with resulting questions about citizenship and belonging Using the Cross Border Region framework which seeks to analyse these three territories as one entity simultaneously divided and bound together by its borders this book brings together scholars from a range of disciplines Its 18 chapters and more than 20 maps examine the interaction between Singapore Johor and the Riau Islands over the past quarter century and seek to shed light on how these territories could develop in the future

Democracy in Translation

Frederic Charles Schaffer, 2000-07 Frederic C Schaffer challenges the assumption often made by American scholars that democracy has been achieved in foreign countries when criteria such as free elections are met Elections he argues often have cultural underpinnings that are invisible to outsiders To examine grassroots understandings of democratic institutions and political concepts Schaffer conducted fieldwork in Senegal a mostly Islamic and agrarian country with a long history of electoral politics Schaffer discovered that ideas of *demokaraasi* held by Wolof speakers often reflect concerns about collective security Many Senegalese see voting as less a matter of choosing leaders than of reinforcing community ties that may be called upon in times of crisis By looking carefully at language Schaffer demonstrates that institutional arrangements do not necessarily carry the same meaning in different cultural contexts Democracy in Translation asks how social scientists should investigate the functioning of democratic institutions in cultures dissimilar from their own and raises larger issues about the nature of democracy the universality of democratic ideals and the practice of cross cultural research

Scars of Partition William F.S. Miles, 2014-07-01 Based on three decades of fieldwork throughout the developing world Scars of Partition is the first book to systematically evaluate the long term implications of French and British styles of colonialism and decolonization for ordinary people throughout the so called Third World It pays particular attention to the contemporary legacies of artificial boundaries superimposed by Britain and France that continue to divide indigenous peoples into separate postcolonial states In so doing it uniquely illustrates how the distinctive stamps of France and Britain continue to mark daily life along and behind these inherited borders in Africa Asia Oceania and the Caribbean Scars of Partition draws on political science anthropology history and geography to examine six cases of indigenous indentured and enslaved peoples partitioned by colonialism in West Africa West Indies South Pacific Southeast Asia South India and the Indian Ocean William F S Miles

demonstrates that sovereign nations throughout the developing world despite basic differences in culture geography and politics still bear the underlying imprint of their colonial pasts Disentangling and appreciating these embedded colonial legacies is critical to achieving full decolonization particularly in their borderlands **Essays in African Land Law** Robert Home (College teacher),2011 1994 Massimo Mastrogregori,2013-05-08 Annually published since 1930 the International bibliography of Historical Sciences IBOHS is an international bibliography of the most important historical monographs and periodical articles published throughout the world which deal with history from the earliest to the most recent times The works are arranged systematically according to period region or historical discipline and within this classification alphabetically The bibliography contains a geographical index and indexes of persons and authors Encyclopedia of African History 3-Volume Set KEVIN SHILLINGTON.,2005 **Holding the Line** Ian Townsend Gault,Heather Nora Nicol,2005 This volume contains contributions from twenty four scholars concerning the significance and implications of the world s borderlands in economic political and socio cultural contexts Together these essays explore the changing role of borders in a global world Are borders increasingly irrelevant under conditions of globalization or can a case be made to demonstrate their continuing importance at various levels of spatial activity Situating itself within a growing border literature Holding the Line argues that contemporary borders facilitate parallel processes of globalization and localization of political activity As such the essays adopt a holistic approach to understanding the impact of boundaries on both society and space They demonstrate that any attempt to create a methodological and conceptual framework for the understanding of boundaries must be concerned with the process of bounding rather than simply the means through which the physical lines of separation are delimited and demarcated This approach renders the notion of a borderless world highly problematic because the latter ignores the important and ongoing relationship between the functional role of borders in the bounding process and the symbolic role of borders as imagined social political and economic constructions embedded within a geographical text The changing characteristics of political boundaries during an era of globalization has become a great focus of interdisciplinary study and this book will appeal to scholars of political geography border studies and international relations **Surviving with Dignity** Scott M. Youngstedt,2013 Surviving with Dignity explores three key interconnected themes structural violence suffering and surviving with dignity through examining the lived experiences of first and second generation migrant Hausa men in Niamey over the past two decadesin the current neoliberal moment Colonialism state mismanagement structural adjustment and global neoliberalism have inflicted structural violence on Nigeriens by denying them human and particularly socioeconomic rights and relegating them to a status at or very near the bottom of UN Human Development Index in each year of the past decade As a result of structural violence most Hausa of Niamey suffer grinding and intractable poverty that has intensified over the past two decades Suffering is a recurrent and expected condition it is the normal condition The central goal of the book is to explain the material migration and informal economy work and

symbolic meaning making strategies that Hausa individuals and communities have deployed in their struggles not only to literally survive in the face of economic austerity on the outer periphery of the global economy but also to survive with dignity Despite daunting challenges many Hausa men find strength and patience in their humble devotion to Islam cherish their vibrant sociability and gracious hospitality deeply value extraordinary conversational virtuosity and knowledge deploy humor in complex transcendent defensive and self critical ways perpetuate a sense of hope and optimism for the future articulate their own modernities and strive relentlessly to feel connected to the modern world at large Extreme poverty created by socioeconomic injustice constitutes an unacceptable assault on human dignity Hausa men s remarkable strength does not negate the reality of the socioeconomic injustices they face Their dire poverty in a world of plenty is unacceptable even when they handle it gracefully

Where Nation-States Come From Philip G. Roeder,2007-08-05 Almost all successful nation state projects have been associated with a particular political institution prior to independence the segment state This text clarifies this link through narrative evidence from Central Eurasia a rigorous theory and extensive statistical tests

Tribal Nation Adrienne Lynn Edgar,2006-09-05 On October 27 1991 the Turkmen Soviet Socialist Republic declared its independence from the Soviet Union Hammer and sickle gave way to a flag a national anthem and new holidays Seven decades earlier Turkmenistan had been a stateless conglomeration of tribes What brought about this remarkable transformation Tribal Nation addresses this question by examining the Soviet effort in the 1920s and 1930s to create a modern socialist nation in the Central Asian Republic of Turkmenistan Adrienne Edgar argues that the recent focus on the Soviet state as a maker of nations overlooks another vital factor in Turkmen nationhood the complex interaction between Soviet policies and indigenous notions of identity In particular the genealogical ideas that defined premodern Turkmen identity were reshaped by Soviet territorial and linguistic ideas of nationhood The Soviet desire to construct socialist modernity in Turkmenistan conflicted with Moscow s policy of promoting nationhood since many Turkmen viewed their backward customs as central to Turkmen identity Tribal Nation is the first book in any Western language on Soviet Turkmenistan the first to use both archival and indigenous language sources to analyze Soviet nation making in Central Asia and among the few works to examine the Soviet multinational state from a non Russian perspective By investigating Soviet nation making in one of the most poorly understood regions of the Soviet Union it also sheds light on broader questions about nationalism and colonialism in the twentieth century
