Fights of Fancy George Edgar Slusser, Eric S. Rabkin, 1993 This collection of fifteen original essays offers new perspectives on armed conflict as a central aspect of science fiction and fantasy writing Looking past the superficial conventions associated with ray guns and aliens swords and sorcerers the contributors show how writers in the genre today are not so much imagining war more fully as they are completely re imagining it Science fiction and fantasy writing is no longer mired in epic or chivalric models but is responding to new and more complex real world motivations for armed aggression advances in weaponry shifts in the theaters of war and changes in battlefield conditions Most of the papers were presented at the annual J Lloyd Eaton Conference on Science Fiction and Fantasy Literature the field's most prestigious international gathering The trend throughout the book is away from critical interest in stories of spatial or territorial conquest and toward works that deal with topics related to wars of temporal logistics and the internationalization of the combat zone including urban street violence gender conflicts and resistance to runaway technology The essays range from studies of the semantics and linguistics of warfare in science fiction to a critique of Osip Senkovsky's *Fantastic Journeys of Baron Brambeus* from writer Joe Haldeman's assessment of the impact of his Vietnam experiences on his fiction to inquiries into a shared author reader agenda in novels concerning potential mass destruction including Stephen King's *Dead Zone* and M J Engh's *Arslan* The collection also charts new directions in writing such as the anti apocalyptic science fiction of Samuel R Delany and embraces new modes of presentation particularly computer animation and the bande dessinée or illustrated narrative as exemplified by French novelist Phillippe Druillet's *La Nuit* Musician Bob Marley film actor directors Sylvester Stallone and Bruce Lee and the cyberpunk film classics *Terminator* and the *Road Warrior* series are among other topics discussed Together the essays reinforce the editors contention that the true function of these fantasies and science fictions is neither nostalgia nor fancy but analysis The contributors treat the texts they examine as a means not of playing war games but of understanding the role of war in the present and the future

Heinlein* Farah Mendlesohn,2019-03-07 Robert A Heinlein began publishing in the 1940s at the dawn of the Golden Age of science fiction and today he is considered one of the genre s big three alongside Arthur C Clarke and Isaac Asimov His short stories were instrumental in developing its structure and rhetoric while novels such as *Stranger in a Strange Land* and *Starship Troopers* demonstrated that such writing could be a vehicle for political argument Heinlein s influence remains strong but his legacy is fiercely contested His vision of the future was sometimes radical sometimes deeply conservative and arguments have flared up recently about which faction has the most significant claim on his ideas In this major critical study Hugo Award winner Farah Mendlesohn carries out a close reading of Heinlein s work including unpublished stories essays and speeches It sets out not to interpret a single book but to think through the arguments Heinlein made over a lifetime about the nature of science fiction about American politics and about himself *Building New Worlds, 1946-1959* John Boston,Damien Broderick,2013-02-13 *Building New Worlds* is a history of a pivotal decades long episode in the birth and growth of today s science fiction Enthralling and amusing it s written with affection and wit This is no dry modishly theorized academic analysis Nor is it a rah rah celebration of the Good Old Days Here is a candid and astute reader s response to a magazine that by today s standards was often comically bad but was also immensely important in its time and improved like the *Little Engine* or maybe *Starship That Could* *New Worlds* is best remembered today as the fountainhead of the New Wave of audacious experimental SF in the second half of the 1960s under editor Michael Moorcock But these first pioneering issues from 1946 59 were edited by the magazine s founder John Ted Carnell 1912 72 Carnell was a pillar of the old style UK SF establishment but gamely supportive of innovators most famously of the brilliant J G Ballard Brian W Aldiss and John Brunner

whose early work he nurtured The story of how New Worlds got started survived and got better is essential to the history of the genres of the fantastic in the UK and indeed the world And huge fun to read Watch for the companion volumes New Worlds Before the New Wave and Strange Highways dealing with New World s companion magazine Science Fantasy
