world in the twentieth century renowned economist Mahbub ul Haq 1934 1998 made a major impact on development philosophy and lending policies of the World Bank Following the trajectory of four decades from the 1960s to the 1990s tracking an ideological transition from growth only to growth with distribution Economic Growth with Social Justice distinctly portrays Haq s contribution to the larger international development debate His work is contextualized explaining its significance in shaping development theory policy and practice as a result emphasizing its on going influence and relevance in contemporary times

**China's Economic Growth: Towards Sustainable Economic Development and Social Justice** John Joshua, 2017-01-09 This two volume book addresses the economic transformation occurring in China at present The author investigates China s domestic and international policies the impact of these policies on economic growth and their effect on the quality of life for the people of China In the first volume the author distinguishes between economic growth and sustainable economic development and discusses China s current and past economic policies towards growth Chapters also explore the structural transformation of China s economy and its increasingly consumer oriented nature The second volume looks more specifically at the result of domestic policies on the quality of life for people living in China The author examines the distribution of income the alleviation of poverty the Chinese education system and the environmental cost of economic growth These volumes will be of particular interest to researchers and scholars concerned with China s emerging economic power

*Climate Change and Developing Countries* Nijavalli H. Ravindranath, Jayant A. Sathaye, 2005-12-16 Among global environmental issues climate change has received the largest attention of national and global policy makers researchers industry multilateral banks and NGOs Climate change is one of the most important global environmental problems with unique characteristics It is global long term up to several centuries and involves complex interactions between climatic environmental economic political institutional and technological pressures It is of great significance to developing countries as all the available knowledge suggests that they and particularly their poorer inhabitants are highly vulnerable to climate impacts The projected warming of 1.4 to 5.8 C by 2100 and the related changes in rainfall pattern rise in sea level and increased frequency of extreme events such as drought hurricanes and storms are likely to threaten food security increase fresh water scarcity lead to decline in biodiversity increase occurrence of vector borne diseases cause flooding of coastal settlements etc Recognizing the potential threat of severe disruptions the United Nations Conference on Environment and Development was organized in 1992 in Rio de Janeiro Brazil to begin to address ways to reduce these impacts which led to the formulation of the UN Framework Convention on Climate Change This Convention and the subsequent Kyoto Protocol recognize the common but differentiated responsibility of developing and industrialized countries in addressing climate change Developing countries thus have a unique role to play in formulating a sound reasoned and well informed response to the threat of climate change

*Equity and Efficiency in Economic Development* Donald J. Savoie, Irving Brecher, 1992-10-16 The ideological foundations of the contributors range from personalized neo Marxism through extreme centre neo

Keynesianism to hard line neoclassical mathematical economics Despite this diversity there is a surprising degree of consensus No contributor advocates centralized planning and none expects a free market to cure all economic ills Opinions vary as to how well the market actually works but all agree that equity and efficiency are essential goals which most consider to be complementary rather than mutually exclusive In the concluding chapter it is suggested that current economic problems are caused not so much by government intervention as by the nature of that intervention The authors believe that the recent ideological convergence may lead to a new paradigm a theory of the optimal blend of market and management that will be flexible enough to deal with the varying conditions of diverse societies thus simplifying the task of creating a smooth running global economy The contributors are Irma Adelman Mark Blaug Kenneth Boulding Irving Brecher Albert Breton John S Chipman Andr Gunder Frank Martha Fuentes Frank Niles Hansen Murray C Kemp Robin Marris Richard Musgrave Walt Rostow Donald J Savoie Nicholas Spulber and Paul Streeten Higgins himself contributes a chapter on basic concepts and collaborates with Donald Savoie on the final chapter
