underscores the reality of structural changes in the global economy and the global system This book explains that a new era of egocentrism and polycrisis in a multipolar system has emerged in international economic policy with a strong drive toward interventionism and protectionism of national economies Dynamic economic imbalances are becoming a constant factor in disrupting international competitiveness and forcing changes in both monetary policy and general economic policy This prompts a new more pragmatic definition of fundamental concepts in the theoretical sphere as well as an up to date and viable cause and effect narrative that is not disconnected from decision making processes in the economic and political spheres This book provides a comprehensive diagnosis of the current global economy landscape and evaluates the processes affecting the economic and financial realities and the effectiveness of economic policies The recent dynamics have rendered much of the existing literature outdated or confined to individual economies economic systems and regions The book describes the evolution of international economic policy offering a comparative analysis of foreign trade theories especially in the context of macroeconomic trends and the impact of international trade in goods and services in the new balance of power of the global economy Targeted primarily at academics students and researchers in economics finance international relations and management it will also serve as a valuable resource for policymakers shaping and implementing contemporary state economic policies

Challenges for Economic Policy Coordination within European Monetary Union Andrew J. Hughes Hallett, Peter Mooslechner, Martin Schürz, 2013-06-29 The launch of European Monetary Union EMU marked the beginning of a new era and its establishment has proved an impressive success at the technical legal and procedural level After all EMU has accelerated economic and political integration in the European Union and tied the economies of the Member States closer together However the performance of the euro high unemployment rates uneven output and investment growth and the issue of structural reforms that have yet to be tackled have raised questions about the performance of EMU in practice There is a general consensus on the justification for economic policy coordination The existing literature on economic policy coordination however seems far from able to provide robust conclusions about how to organize the necessary interaction of institutions and policies Therefore there seems to be a case for re examining the subject under the new framework set by EMU The objective of such a reassessment is to enhance the understanding of what type of coordination and what institutional setting for policy coordination can be expected to be most favorable

Evaluating Policy Regimes Ralph Bryant,Peter Hooper,Catherine L. Mann,2010-12-01 Economists have long debated the theoretical merits for an individual nation and for a multi nation world economy of alternative approaches to the conduct of

economic policy Yet theory alone cannot resolve the important issues at stake Only after the robustness of policy regimes has been carefully examined with empirical evidence will policymakers and economists be able to reach more of a consensus This pathbreaking volume takes major steps forward in meeting the need for a combination of theoretical and empirical evaluations of alternative policy regimes Bringing together individuals and groups doing pioneering research on macroeconomic interaction it explores what approach to monetary policy would lead to superior performance by individual national economies and the world economy as a whole Many parts of the book use the analytical techniques of stochastic simulation an evaluation procedure increasingly employed at the frontier of empirical economic analysis The book provides a summary of the key issues involved in evaluating policy regimes and clarifies the relationships among those issues The authors examine the stabilization properties of alternative monetary policy regimes and analyze how well various regime types perform in the face of unexpected shocks to national economies Among their conclusions they find that some simplified regimes for monetary policy are markedly less promising than others for achieving the stabilization objectives commonly sought by policymakers Evaluating Policy Regimes is another major installment in a continuing world wide research project sponsored by the Brookings Institution to improve empirical knowledge about the interdependence of national economies

China's Trade Policy on International Air Transport Chrystal Zhang, Kareem Yarde, 2020-08-09 This book is a political economic analysis of China's transformation to become a global aviation power It aims to identify the driving forces that have shaped China's ever evolving international air transport policy direction and goals in the past four decades and further determines how and to what extent these driving forces have shaped China's considerations and strategies when executing its policy goals through bilateral air services negotiations The findings reveal that China's international air transport policymaking has remained in the domain of the country's aviation regulator which has enjoyed an exclusivity to exercise its power on the air transport sector The book argues that China's international air transport policy direction is in alignment with the country's overall strategic mission and its goal is set to support the country's endeavour to realise the China dream It concludes that factors at all levels interact

with each other with a far reaching impact on the country's policy direction and goal setting however these factors are constrained by time and circumstances The book is a must read for a wide array of audiences including but not limited to scholars and industry professionals who have an interest in China's political economy policymaking international trade government behaviour corporate political activities air transport aviation liberalisation and bilateral negotiations
