Can We Afford the Future? Frank Ackerman, 2009-04-15 According to many scientists climate change is a growing threat to life as we know it requiring a large scale immediate response According to many economists climate change is a moderately important problem the best policy is a slow gradual start to avoid spending too much They can't both be right In this book Frank Ackerman offers a refreshing look at the economics of climate change explaining how the arbitrary assumptions of conventional theories get in the way of understanding this urgent problem The benefits of climate protection are vital but priceless and hence often devalued in cost benefit calculations Preparation for the most predictable outcomes of global warming is less important than protection against the growing risk of catastrophic change massive investment in new low carbon technologies and industries should be thought of as life insurance for the planet Ackerman makes an impassioned plea to construct a better economics arguing that the solutions are affordable and the alternative is unthinkable If we can't afford the future what are we saving our money for Can we Afford the Future is part of The New Economics series which uses the ideas behind a new more human economics to provide a fresh way of looking at major contemporary issues

Warming the World William D. Nordhaus, Joseph Boyer, 2003-08-11 This book presents in detail a pair of models of the economics of climate change The models called RICE 99 for the Regional Dynamic Integrated model of Climate and the Economy and DICE 99 for the Dynamic Integrated Model of Climate and the Economy build on the authors earlier work particularly their RICE and DICE models of the early 1990s Humanity is risking the health of the natural environment through a myriad of interventions including the atmospheric emission of trace gases such as carbon dioxide the use of ozone depleting chemicals

the engineering of massive land use changes and the destruction of the habitats of many species It is imperative that we learn to protect our common geophysical and biological resources Although scientists have studied greenhouse warming for decades it is only recently that society has begun to consider the economic political and institutional aspects of environmental intervention To do so raises formidable challenges of data modeling uncertainty international coordination and institutional design Attempts to deal with complex scientific and economic issues have increasingly involved the use of models to help analysts and decision makers understand likely future outcomes as well as the implications of alternative policies This book presents in detail a pair of models of the economics of climate change The models called RICE 99 for the Regional Dynamic Integrated model of Climate and the Economy and DICE 99 for the Dynamic Integrated Model of Climate and the Economy build on the authors earlier work particularly their RICE and DICE models of the early 1990s They can help policy makers design better economic and environmental policies Economic Issues In Global Climate Change John M. Reilly, 2019-04-10 This book provides a snapshot on economic thinking about global change and provides a starting point for researchers for evaluating the economics of global change in the context of agriculture forestry and resource issues It attempts to rectify the scarcity of economic analysis in global change
