Contemporary Economic Reforms as a Development Strategy Dieter Cassel, Günter Heiduk, 1990 *Russian and Western Economic Thought* Vladimir Avtonomov, Harald Hagemann, 2022-10-03 This book examines the interrelations between Russian and European economics from the early 19th century to the present. It analyzes how Western economic thinking such as classical economics and the marginal revolution influenced Russian economic thinking and how Western economic ideas were modified and adapted to better reflect the specific Russian circumstances of the time. Moreover, the contributions in this book show how these modified ideas also influenced Western economists at the end of the 19th century when Russian economics had reached the stage of professionalism and joined the international discourse on the discipline. Written by an international selection of respected experts, this book provides an overview of the most influential Russian economists and covers a wide range of topics such as the marginal revolution, the specific influence of Marxism, the evolution of mathematics and statistics in Russia in the 1890s, 1920s, and the unique experience of building a planned economy in the Soviet Union. It is intended for all scholars and students who are interested in the history of economic thought.

Identity and Strategy Olaf G. Rughase, 2006 This book exemplifies one of the most complete and rigorous examples of scholarship relative to its subject matter that I have ever seen Russell L Ackoff University of Pennsylvania US This is a book written by someone who makes a living from helping organizations make strategy It is also though written by a scholar someone who has thought hard about the topic and knows what other scholars think This mix makes a book that is both thorough well argued and yet of great significance for consultants and managers It unashamedly takes an inside out view of strategy making and this is what makes it so practical It focuses on what those who manage want to do with their organization rather than on some notion of what they should do The book takes the field of strategic management forward by bringing theory and practice together more management writing needs to come from practitioner scholars Colin Eden University of Strathclyde Graduate School of Business UK Olaf Rughase successfully unlocks important insights for creative market strategy development by linking it to central ideas about organizational identity He provides a compelling theoretical rationale and useful practical process insights for how to induce creative market strategy formation through articulating current desired organizational identities The book is clearly written the claims well documented and well illustrated providing a fresh and useful perspective on how to enable market strategies that work Jane E Dutton University of Michigan US In his well researched book Olaf Rughase introduces a new element into the concept of strategy which has so far been neglected to a surprising degree the human factor Strategy development certainly consists of data research analysis and synthesis but after all it is at least as much driven by fear and hope will and might the vision and the experience of the people involved Only approaches that take this into account can claim any relevance for real life strategy making Viewed in this light Olaf Rughase s book fills a gaping hole in the existing world of strategic thinking J rg Fengler Management Consultancy E ON Ruhrgas AG Germany Theorists and practitioners often underestimate the subtlety of each others thinking Rughase s work engages seriously with both groups and as a result is both deep and thoroughly practical This is a genuinely original contribution David Sims Cass Business School London UK this book is not just an academic treatise Its insights grow out of facilitating strategy making and one of these experiences is described in some detail There are many practical observations to be found here Political realities are acknowledged Alternative paths

Business Strategy in the Online Industry Christian Götsch, 2012-12-06 The Internet is like a 201 00t tidal wave coming thousands of miles across the Pacific and we are in kayaks Andi Grove In the course of the commercial distribution of Internet technology since the year 1995 new business models emerged and ultimately established the on line industry as a distinct economic environment The author defines this new marketplace as a multi layered industry consisting of five main layers network hosting software content and devices Each layer consists of sub layers Players from the converging industries telecommunications computer hardware software media and consumer electronics conduct on line business units offering a set of on line services S 17 Significance and growth of the on line industry are enormous The market for multimedia products and services represents approximately 10% of the US GOP already today The industry volume is expected to double every 12 to 18 months The increasing relevance of the on line industry is driving the interest of academia in a theoretical foundation of the observed economic phenomena The term network economics establishes a new scientific area Due to the specific structure and logic of the industry traditional business concepts and strategy approaches can be translated only in a limited way At this point the work of Christian Gottsch comes in play which by utilizing the theoretical concepts of net work economics and game theory models the structure of the on line industry and delivers a methodic set of instruments to develop marketing strategies

Strategy Mix for Nonprofit Organisations Annette E. Zimmer, Christina Stecker, 2013-03-19 In many countries particularly in continental Europe societies have been plagued by high unemployment for several decades Simultaneously due to recent shifts from industrial to service oriented post industrial societies labor as a significant culture code is increasingly losing importance Because of this the third or voluntary sector as a place of employment and as a service agency to society has become important for Europe as indicated by the 1997 Communication of the European Commission and various declarations by the European Parliament and the EU s Economic and Social Council *Strategy Mix for Nonprofit Organizations Vehicles for Social and Labor Market Integration* explores the role of the third

sector in Europe where unemployment is high and in North America where unemployment is rising and exploring the gaps that the third sector is fulfilling both as a social service and as an employer The volume is organized into two distinctive parts Part 1 The Nonprofit Sector and Social Integration highlights the embeddedness of the sector in selected countries it discusses how the sector is currently affected by changes of public policy particularly in the traditional social democratic welfare state regimes and it draws our attention to the sector's potentials to provide avenues for social integration self actualization and civic empowerment Part 2 Labor Concepts and Market Integration refers to the multifunctionality of third sector organizations discussing potentials of workplace as well as community involvement via nonprofit organizations This seminal volume will be of interest to those in the nonprofit sector organizational management and economics political scientists and other researchers working with nonprofit organizations and civil society studies on an international level

National Purpose in the World Economy Rawi Abdelal, 2018-08-06 How do national identities affect the world economy Building on the insight that nationalisms and national identities endow economic policy with social purpose Rawi Abdelal proposes a novel theoretical framework a distinctively Nationalist perspective on international political economy to answer this question Using this framework and drawing on field research in Lithuania Ukraine and Belarus he provides an in depth look at the link between national identity and the economic policies of the new states formed by the breakup of the Soviet Union All these states from the Baltic coast to central Asia were economically dependent on Russia during the 1990s However they reacted very differently to that dependence and their reactions can be traced Abdelal contends to their individual societies Some such as Belarus found dependence inevitable and sought economic reintegration with Russia Others like Lithuania interpreted dependence as a large scale security threat and reoriented their economies away from Russia A third group typified by Ukraine demonstrated no coherent economic policy at all regarding dependence Abdelal distinguishes the Nationalist tradition in international political economy from the Realist tradition and shows that economic nationalism is different than mercantilism He demonstrates the ways that national identity affects economic policy and explains why some governments seek economic autonomy while others prefer regional reintegration He then applies his approach to other cases of economic reorganization after the end of empire eastern Europe in the 1920s after the Habsburgs 1950s Indonesia and French West Africa in the 1960s *Handbook of Media and Communication Economics* Jan
