The enduring debate on institutional pillars of contemporary political economies has gathered a noticeable momentum in terms of the change path dependence and varieties of capitalism. By taking a methodological standpoint claiming that the current structure and the future of contemporary societies can only be understood by using an evolutionary and macro-institutional approach that would explain the trajectories of social structures from a systemic perspective, this book first aims at formulating a novel analytical framework, thus *Institutional System Analysis in Political Economy*. This framework comprises inter alia a model of path-dependent changes and then attempts to apply it to the case of the Ottoman Turkish social system. In sum, the book develops an interaction-theoretic and evolutionarily structured approach with an aim to better capture the path dependence and change of political, economic and cultural action in terms of their intersectional dynamics. *The*

Handbook of Political, Social, and Economic Transformation Wolfgang Merkel, Raj Kollmorgen, Hans-Jürgen

Wagener, 2019-01-25 Political, social and economic transformation is a complex historical phenomenon. It can adequately be analysed only by a multidisciplinary approach. The Handbook brings together an international team of scholars who are specialists in their respective research fields. It introduces the most important areas, theories and methods in transformation research, with particular attention placed on the historical and comparative dimension. Although focussing on post-communist and other democratic transformations in our epoch, the Handbook therefore presents and discusses not only their problems, paths and developments but also deals with the antecedent waves beginning with the Meiji Restoration in Japan in 1868 and its aftermath. The book is structured into six parts. Starting with basic concepts as systems, actors and institutions, Section I gives an overview over major theoretical approaches and research methods. Sections II and III: The connection of theory and method with their application is essential, allowing special insights into the past and opening analytical avenues for transformation research in the future. Section IV provides a historically oriented description or interpretation of particular waves or types of societal transformation. With a clear focus on present transformations, the contributions to Section V provide a description and discussion of the problems, structures, actors and courses of the transformations within different spheres of civil society, politics, law and economics. Finally, brief lexicographic entries in Section VI delineate research perspectives and facts about relevant issues of societal transformation. Each of the 79 contributions contains a concise list of the most important research literature. *Handbook of State Government Administration* John J. Gargan, 2020-01-27 Devised to meet the ongoing challenge of identifying the skills and knowledge necessary for expanding the governing capacity of state and local authorities, this book discusses the fiscal consequences of getting tough approaches to crime and presents more effective and less expensive policy options.
