

3.49 *Editor & Publisher International Yearbook* published a listing of the top 10 daily newspapers in the United States, as shown here. Use these population data to compute a mean and a standard deviation. The figures are given in average daily circulation from Monday through Friday. Because the numbers are large, it may save you some effort to recode the data. One way to recode these data is to move the decimal point six places to the left (e.g., 1,774,880 becomes 1.77488). If you recode the data this way, the resulting mean and standard deviation will be correct for the recoded data. To rewrite the answers so that they are correct for the original data, move the decimal point back to the right six places in the answers.
