**Educating Citizens** Patrick J. Wolf, Stephen Macedo, 2004-09-30 *The United States is in the midst of historic experiments with publicly funded choice in K 12 education experiments that recently received a green light from the Supreme Court Other nations have long experience with the funding and regulation of nonpublic schools including religious schools This book asks what U S policymakers public officials and citizens can learn from these experiences In particular how do other countries regulate or structure publicly funded educational choice with an eye toward civic values looking not only for improvements in test scores but also in tolerance civic cohesion and democratic values such as integration across the lines of class religion and race The experience of Europe and Canada with school choice is both extensive and varied In England and Wales public school choice is widespread as parents play a significant role in selecting the school their children will attend In the Netherlands and much of Belgium a majority of students attend religious schools at government expense In Canada France and Germany state financed school choice is limited to circumstances that serve particular social and governmental needs In Italy school choice has just recently arrived on the policy agenda In spite of the diversity of national experiences in all of these countries choice is regulated by the government in significant and varied ways to promote civic values In several of these countries school choice policy itself appears to have played an important role in promoting social cohesion and integration This book presents a wealth of experience designed to aid policymakers and citizens as they consider historic changes in American public education policy     *Educating Citizens* Kenneth Osborne, Ken Osborne, 1988*

The Canadian left has over the years paid remarkably little attention to the actual content of education. Apart from occasional bursts of concern about militarism, sexism, racism, or anti-labour bias, the school curriculum has gone largely unquestioned. Socialist values such as cooperation, participation, personal autonomy, and a sense of community do not appear out of thin air. They have to be acquired. Conservatives and liberals have long realized this and have shaped the schools accordingly so that the capitalist ethic of competitive individualism is now strongly entrenched and is learned early in life. If the vision of cooperative commonwealth is to become a reality, then education will have an important role to play. This book is an attempt to outline what this role might be. *Educating Citizens* outlines a working class curriculum designed to prepare students for participation in a socialist democracy. *An Our Schools Our Selves* book **Educating Citizens** Charles Venegoni, 2004-09-20

The United States is in the midst of historic experiments with publicly funded choice in K-12 education, experiments that recently received a green light from the Supreme Court. Other nations have long experience with the funding and regulation of nonpublic schools, including religious schools. This book asks what U.S. policymakers, public officials, and citizens can learn from these experiences. In particular, how do other countries regulate or structure publicly funded educational choice with an eye toward civic values, looking not only for improvements in test scores but also in tolerance, civic cohesion, and democratic values such as integration across the lines of class, religion, and race. The experience of Europe and Canada with school choice is both extensive and varied. In England and Wales, public school choice is widespread as parents play a significant role in selecting the school their children will attend. In the Netherlands and much of Belgium, a majority of students attend religious schools at government expense. In Canada, France, and Germany, state-financed school choice is limited to circumstances that serve particular social and governmental needs. In Italy, school choice has just recently arrived on the policy agenda. In spite of the diversity of national experiences, in all of these countries, choice is regulated by the government in significant and varied ways to promote civic values. In several of these countries, school choice policy itself appears to have played an important role in promoting social cohesion and integration. This book presents a wealth of experience designed to aid policymakers and citizens as they consider historic changes in American public education policy.
