Resources in Education ,1998-12 Teaching History for the Common Good Keith C. Barton,Linda S. Levstik,2004-07-13 In Teaching History for the Common Good Barton and Levstik present a clear overview of competing ideas among educators historians politicians and the public about the nature and purpose of teaching history and they evaluate these debates in light of current research on students historical thinking In many cases disagreements about what should be taught to the nation s children and how it should be presented reflect fundamental differences that will not easily be resolved A central premise of this book though is that systematic theory and research can play an important role in such debates by providing evidence of how students think how their ideas interact with the information they encounter both in school and out and how these ideas differ across contexts Such evidence is needed as an alternative to the untested assumptions that plague so many discussions of history education The authors review research on students historical thinking and set it in the theoretical context of mediated action an approach that calls attention to the concrete actions that people undertake the human agents responsible for such actions the cultural tools that aid and constrain them their purposes and their social contexts They explain how this theory allows educators to address the breadth of practices settings purposes and tools that influence students developing understanding of the past as well as how it provides an alternative to the academic discipline of history as a way of making decisions about teaching and learning the subject in schools Beyond simply describing the factors that influence students thinking Barton and Levstik evaluate their implications for historical understanding and civic engagement They base these evaluations not on the disciplinary study of history but on the purpose of social education preparing students for participation in a pluralist democracy Their ultimate concern is how history can help citizens engage in collaboration toward the common good In Teaching History for the Common Good Barton and Levstik discuss the contribution of theory and research explain the theory of mediated action and

how it guides their analysis and describe research on children's and adults' knowledge of and interest in history lay out a vision of pluralist participatory democracy and its relationship to the humanistic study of history as a basis for evaluating the perspectives on the past that influence students' learning explore four principal stances toward history identification analysis moral response and exhibition review research on the extent to which children and adolescents understand and accept each of these and examine how the stances might contribute to or detract from participation in a pluralist democracy address six of the principal tools of history narrative structure stories of individual achievement and motivation national narratives inquiry empathy as perspective taking and empathy as caring and review research and conventional wisdom on teachers' knowledge and practice and argue that for teachers to embrace investigative multi-perspectival approaches to history they need more than knowledge of content and pedagogy they need a guiding purpose that can be fulfilled only by these approaches and preparation for participatory democracy provides such purpose *Teaching History for the Common Good* is essential reading for history and social studies professionals researchers teacher educators and students as well as for policymakers parents and members of the general public who are interested in history education or in students thinking and learning about the subject

Cohen-Cole, 2020-03-04 This study chronicles the rise of psychology as a tool for social analysis during the Cold War Era and the concept of the open mind in American culture In the years following World War II a scientific vision of the rational creative and autonomous self took hold as an essential way of understanding society In The Open Mind science historian Jamie Cohen Cole demonstrates how this notion of the self became a defining feature of Cold War culture From 1945 to 1965 policy makers used this new concept of human nature to advance a centrist political agenda and instigate nationwide educational reforms that promoted more open and indeed more human minds The new field of cognitive science was central to this project helping to overthrow the behaviorist view that the mind either did not exist or could not be studied scientifically While the concept of the open mind initially unified American culture this unity started to fracture between 1965 and 1975 as the ties between political centrism and the scientific account of human nature began to unravel During the late 1960s feminists and the New Left repurposed psychological tools to redefine open mindedness as a characteristic of left wing politics As a result once liberal intellectuals became neoconservative and in the early 1970s struggles against open mindedness gave energy and purpose to the right wing **Handbook of Moral and Character Education** Larry

Toward an Ethic of Citizenship

William K. Dustin, 2000-01-11 The idea for this book arose out of a little known political scandal known as phonegate that occurred in Minnesota in the early 1990 s in which a number of legislators were found to have been abusing their phone privileges The hubris of the legislature in response to the discovery of this abuse not only made me rather angry but since I had been called for jury duty the year before gave me the idea that service in the legislature ought to be a duty of citizenship like jury duty Although the idea of the citizen legislature goes back to Aristotle serious consideration of it raises the question of what is meant by citizenship and representation This book addresses that question It is an attempt to develop a model of citizenship in which representation is simultaneously a fundamental right and the highest obligation After developing these ideas at a rather high level of abstraction the book concludes with a proposed constitutional amendment for the State of Minnesota to illustrate how the model will work in practice
