Changing Urban Education Clarence Nathan Stone,1998 With critical issues like desegregation and funding facing our schools dissatisfaction with public education has reached a new high Teachers decry inadequate resources while critics claim educators are more concerned with job security than effective teaching Though urban education has reached crisis proportions contending players have difficulty agreeing on a common program of action This book tells why Changing Urban Education confronts the prevailing naivete in school reform by examining the factors that shape reinforce or undermine reform efforts Edited by one of the nation s leading urban scholars it examines forces for change and resistance in urban

education and proposes that the barrier to reform can only be overcome by understanding how schools fit into the broader political contexts of their cities. Much of the problem with our schools lies with the reluctance of educators to recognize the profoundly political character of public education. The contributors show how urban political contexts vary widely with factors like racial composition, the role of the teachers union, and relations between cities and surrounding metropolitan areas. Presenting case studies of original field research in Baltimore, Chicago, Houston, and six other urban areas, they consider how resistance to desegregation and the concentration of the poor in central urban areas affect education and they suggest how cities can build support for reform through the involvement of business and other community players. By demonstrating the complex interrelationship between urban education and politics, this book shows schools to be not just places for educating children but also major employers and large spenders of tax dollars. It also introduces the concept of civic capacity, the ability of educators and non educators to work together on common goals, and suggests that this key issue must be addressed before education can be improved. *Changing Urban Education* makes it clear to educators that the outcome of reform efforts depends heavily on their political context, as it reminds political scientists that education is a major part of the urban mix. While its prognosis is not entirely optimistic, it sets forth important guidelines that cannot be ignored if our schools are to successfully prepare children for the future.

K-12 STEM Education in Urban Learning Environments Wendt, Jillian L., Apugo, Danielle L., 2019-04-12. Urban Education for the 21st Century Festus E. Obiakor, Floyd D. Beachum, 2005. This timely book exposes the complexities and realities facing urbanity and urban schools that are inadequately funded and denigrated, along with students who continue to be misidentified, misassessed, miscategorized, misplaced, and misinstructed by ill-prepared and unprepared educators and service providers. The text very successfully demonstrates the comprehensive nature and connectedness of problems and prospects in urban education. This book will be an added resource to researchers, scholars, educators, and service providers. It should be an excellent required text for graduate and undergraduate courses in all branches of education. Additionally, the book will be of interest to education administrators at all levels, public school teachers, policy makers, and change agents. The thirteen chapters discuss and explore the following primary topics: Urban education

and the quest for democracy equity and excellence Educating urban learners with and without special needs Personnel preparation and urban schools Teaching and learning in urban schools Educational leadership in urban schools Insights into educational psychology and what urban practitioners must know Managing violence in urban schools Financing urban schools Reducing the power of whiteness in urban schools Promises and challenges of building and the future perspectives of urban education International Handbook of Urban Education William T. Pink, George W. Noblit, 2008-09-03 It is evident that urban education has become the central focus of educators at the present time In the U S for example almost one third of all school age children attend schools in large urban school districts It is in these urban schools where the diversity of cultures and languages is highest and where student learning is most problematic What has emerged from recent work to improve urban schools is the insight that there is no one size fits all panacea Rather we have discovered that the local context shapes in critically important ways what will be effective at the school level The universality of the problematics with urban education together with the importance of understanding the local or situated context of improvement interventions brings into sharp focus the importance and timeliness of an undertaking like the International Handbook of Urban Education An important focus of the International Handbook of Urban Education will be the interrogation of both the social and political factors that lead to different problem posing and subsequent solutions within each region An important question to be answered for example is what it takes in terms of resources political will and policy actions to improve urban education
