The Postmodern Challenge to the Theory and Practice of Educational Administration Fenwick W. English, 2003 Based on nearly a decade of scholarship this is a highly focused book on the implications of postmodernism for the construction and assessment of theory and practice in educational administration Current ideas of practice are deconstructed from the notions of sound research to the use of national standards in the preparation of educational leaders along with ways of examining and resolving the theory practice gap Part One of the book contains chapters dealing with the rise of postmodernism and describes its broad based dissent from a century of thought in the field including a penetrating examination of whether the concept of a field itself is viable Part Two of the book explores the many ramifications of postmodernism to practice beginning with ideas concerning educational research These chapters tackle the tough issues of the efficacy of the Interstate Leaders Licensure Standards ISLLC and the national exam as examples of job deskilling and deprofessionalization in the guise of raising standards of preparation of future educational leaders Other chapters deal with deconstructing the popular managerial ideas contained in Stephen Covey's works and dispute Joe Murphy's call for a new center of gravity in the field as reinforcing the status quo Finally the book tackles the issue of the theory practice gap and indicates that new and progressive theories which anticipate problems of practice are what is required to deal with this persistent issue The book contains many helpful exhibits in understanding the issues concerning theory and practice as well as a glossary of terms most commonly found in postmodern discourse This book is designed for college and university programs engaged in the preparation of educational leaders for elementary secondary schools and college administrative positions

Educational Governance and Administration Thomas J. Sergiovanni, 1980 Centering Educational Administration Robert J. Starratt, 2003-04-02 In this book Starratt enters the national conversation among educational administration scholars and practitioners about what constitutes the core of their knowledge and practice In Part I he develops three main themes cultivating meaning community and moral responsibility which he then positions against national themes about the core of educational administration school improvement democratic

community and social justice Rather than focusing on the routine managerial tasks normally associated with school administration budgeting personnel and legal problems time and resource management etc this text asks aspiring school leaders to reflect first on the underlying philosophical and sociological perspectives that constitute the substance of administrative work in education Centering Educational Administration provides A Unique Perspective on Leadership The author views leadership as organically related to teaching and learning as concerned with internal capacity building in response to state imposed accountability pressures and as an existential process of writing one s autobiography through their day to day work An Interdisciplinary View of Educational Administration Centering Educational Administration asks educational administrators to bring contemporary philosophical ethical and anthropological issues as well as learning theory social theory and political theory into their thinking about the daily operation of the school A Unique Perspective on School Improvement This text asserts that school improvement narrowly defined as improving results on high stakes tests can likewise place the nation at risk An equally important agenda is teaching the young the basic satisfactions norms and potential of using their knowledge in the service of the community and of a wider humanity Exercises in Reflective Practice This book challenges the reader to use the ideas of each chapter to analyze the current practices in their school and to propose concrete changes to improve the teaching and learning environment of their school Individualizing Instruction in Educational Administration Launey F. Roberts,1976 **Catholic School Administration** Robert H. Palestini,2008-09-24 The leading comprehensive guide for Catholic school principals Fully revised and expanded 2nd edition New material on curriculum instruction testing development fundraising federal regulations Discusses school management fundamentals from budgeting to recruitment This new edition of the highly influential text Catholic School Administration has been greatly enlarged and improved with new chapters on curriculum improvement supervision of instruction ways to assess testing as well as new information on marketing human resources and student recruitment Based on principles drawn from Ignatius to Vatican II as well as concepts from current educational and social theorists the book combines the best ideas for leading and decision making with detailed practical presentations of the managerial tasks that must be mastered to run a parochial school Case studies and surveys provide extra guidance For readers seeking to make organizational and instructional improvements this text offers proven techniques for systematic change It is an outstanding resource for introducing administrators to the challenges of running a Catholic school *Inclusive Educational Administration* Mary Konya Weishaar, Phillip M. Weishaar, John C. Borsa,2014-01-30 The belief that regular and special education administrators should work together to create and maintain successful education programs for all students is not new nor is the assumption that administrator preparation programs should foster the development of an inclusive approach yet this critical educational partnership has not reached its full potential Despite the lack of agreement within the federal legislative branch on exactly what should be changed within our education system some promising points of consensus have emerged competitive grants

college and career readiness multi tiered systems of support common core standards a rewards based rather than punitive system for school improvement the critical role of effective teachers and principals increased school choice options and evidence based learning strategies particularly in high need schools The third edition stresses the importance of these key points Each chapter features case studies that simulate real life situations readers are likely to encounter in their careers as administrators Within the safety of the classroom they will rehearse controversial scenarios involving inclusive school governance school reform identification and placement conflict resolution program evaluation fiscal issues transportation and discipline Enhanced practice situations and role play exercises emphasize the special education administrator s role in resolving difficult situations The case study approach is an effective learning tool for aspiring special and regular education administrators and instructors alike fostering enthusiastic classroom discussion and critical thinking about potential solutions to today s complex problems in inclusive educational administration
