Educational System In Japan Case Study Findings:

The Educational System in Japan, 1998 **The Japanese Education System** Angela Wu, 1999 *Educational System in Japan* United States Government Printing Office, 1998-06-01 *The Educational System in Japan*, 1998 The Educational System In Japan: Case Study Findings... ED418918... U.S. Department Of Education United States. Office of Educational Research and Improvement, 1999* **Japanese Education** Roberta E. Pike, 2007 Presents a large representative sample of the literature on Japanese education with an emphasis on its psychosocial aspects Many discussions compare the Japanese educational system with that of the United States and other countries The citations cover most of the 1990s including a few earlier and later references Includes extensive discussions about Japanese educational reform movements and their consequences Also cites published and unpublished dissertations and theses Updates the last comprehensive English language bibliography on Japanese education published by Ulrich Teichler in 1974 The citations were taken from many online databases Suitable for students teachers scholars and the general public A Case Study of Japanese Middle Schools, 1983-1998 Nancy C. Whitman, 2000 An excellent addition to the growing body of work in comparative mathematics education Whitman's longitudinal case study is thorough and informative comparing Japanese mathematics curriculum and methods of instruction with those of American schools National Standards and School Reform in Japan and the United States Gary DeCoker, 2002 Explores the implications of a national US curriculum through the study of Japanese education It suggests that the US educational system lacks certain organizational mechanisms that support student achievement and would facilitate teacher involvement in the educational reform process Selected Publications of the U.S. Department of Education United States. Department of Education, 2000 Pursuing excellence : a study of U.S. twelfth-grade mathematics and science achievement in international context , **Competitor or Ally?** Gerald K. LeTendre, 2013-06-17 In this book the authors systematically address the most common stereotypes or myths about Japanese education that are currently being circulated in the popular press teaching magazines and educational research journals The authors show how arguments about Japan are used to further political ends within the American educational debate Some of the myths that the book debunks are Japan's high adolescent suicide rate LeTendre and Zeng show that adolescent suicide among males is now twice as high in the U S as in Japan Tsuchida and Lewis take on the myth of Japanese classrooms as crowded places centered on rote learning providing detailed evidence as to why Japanese students may indeed have an edge in math McConnell uses Japan's highly successful foreign language program to deconstruct images of Japan Inc showing the highly fractious and bitter political debates that occur in Japan Yang provides data on differences in Japanese and American teachers work roles showing that differences in the two educational systems are not simply due to cultural differences but have a basis in educational policy and school organization Shimizu offers an alternative view of achievement motivation among Japanese students based on in depth interviews with Japanese teens **Selected Publications of the U.S.**

Contextualizing Inclusive Education David Mitchell,2005-04-30

Inclusive education is a complex and problematic concept that raises many questions A team of prominent academics present fresh and critical perspectives on these issues drawing upon their global resources and knowledge The over arching theme of this book is that social political economic and cultural contexts play a central role in determining whether or not inclusive education is implemented in a range of regions and countries around the world A series of original and provocative conclusions is presented such as inclusive education means creating a single system of education which serves all children inclusive education is a site of conflicting paradigms of children with special needs centering on a psycho medical model and a socio political model while many countries seem committed to inclusive education in their rhetoric legislation and policies in practice this often falls short This major landmark resource is suitable for educational policy makers researchers teacher educators students and international agencies with interests in education

Handbook on International Studies in Education Donald K. Sharpes,2010-02-01 This Handbook provides windows into worldwide research endeavors including countries not usually widely known in international education studies The goal of this compendium is to foster the understanding of research and education from different national and cultural perspectives and to support the exchange of ideas and people who conduct research and development activities From these varied individual and collaborative research projects we can infer directions for our own research agenda and for policy development The resulting chapters represent a respectable cross section of international research efforts The total is representative of the variety of research techniques Additionally there are more women than men contributors with sufficient representation from Muslim Asian and developing country contributors These seventeen chapters are an indication of what is occurring in the global educational marketplace They represent a sound and current balance of international studies in education that can be used as models for development elsewhere Reading them can motivate researchers everywhere to maintain a high level of scholarship that will benefit international and comparative studies and the academic profession

Resources in Education ,1999-04 **Modern Japanese society / edited by Josef Kreiner, Ulrich Hohwald and Hans Dieter Olschleger.** Josef Kreiner,Ulrich Mèohwald,Hans Dieter Ölschleger,2004 Is Japanese society essentially different from other modern industrialized societies or not This survey work with contributions from the leading scholars in this complicated field presents a full overview of the most important aspects of Japanese society which may lead the reader to find an answer to these two often asked questions Japanese society defined as those institutions shaping the life of individuals and groups as well as being responsible for the dynamics of social development is shown to be as modern as any other industrialized society definitely distinct though are the ways in which institutions are defined and organised as a result of different social and historical roots of the process of modernization

Engineering Tasks for the New Century National Research Council,Policy and Global Affairs,Office of International Affairs,Committee on Japan,1999-08-12 The U S Japan bilateral task force was tasked with addressing the

following questions 1 How do Japan and the United States educate and train engineers and what are the major similarities differences and trends 2 What are the superior practices that have been developed by each country especially approaches that could be adopted by the other country 3 Are there areas in which expanded U S Japan cooperation could help to improve engineering education in the two countries and around the world The joint task force was organized by the Committee on Advanced Technology and the International Environment Committee 149 of the Japan Society for the Promotion of Science JSPS and the Committee on Japan COJ of the National Research Council NRC Committee 149 s work was supported by member dues and the COJ s work was supported by the United States Japan Foundation and the National Academy of Engineering The joint task force was chaired by Mildred Dresselhaus of the Massachusetts Institute of Technology and Sogo Okamura of Tokyo Denki University Japan and the United States are two of the leading nations in the world in engineering education and practice Their systems for training and educating engineers display marked contrasts resulting from the very different economic and cultural environments in which they have developed The joint task force used a lifelong learning approach in examining the two countries systems exploring differences and similarities in K 12 education of future engineers undergraduate and graduate education as well as continuing education of working professionals The panel also explored two important issues that will affect engineering education in both countries in the future the need to educate and train global engineers who can work effectively in international contexts and the potential for information technology to transform engineering education in the future

The International Handbook of Educational Research in the Asia-Pacific Region J.P. Keeves, Ryo Watanabe, 2013-11-11 The aim of the Handbook is to present readily accessible but scholarly sources of information about educational research in the Asia Pacific region The scale and scope of the Handbook is such that the articles included in it provide substantive contributions to knowledge and understanding of education in the Asia region In so doing the articles present the problems and issues facing education in the region and the findings of research conducted within the region that contribute to the resolution of these problems and issues Moreover since new problems and issues are constantly arising the articles in the Handbook also indicate the likely directions of future developments The different articles within the Handbook seek to conceptualize the problems in each specific content area under review provide an integration of the research conducted within that area the theoretical basis of the research the practical implications of the research and the contribution of the research towards the resolution of the problems identified Thus the articles do not involve the reporting of newly conducted research but rather require a synthesis of the research undertaken in a particular area with reference to the research methods employed and the theoretical frameworks on which the research is based In general the articles do not advocate a single point of view but rather present alternative points of view and comment on the debate and disagreements associated with the conduct and findings of the research Furthermore it should be noted that the Handbook is not concerned with research methodology and only considers the methods employed in inquiry in so far as the particular

methods of research contribute to the effective investigation of problems and issues that have arisen in the conduct and provision of education at different levels within the region
