Ecology and Revolutionary Thought Murray Bookchin, 1970 *Ecology and Revolutionary Thought [by] Murray Bookchin* Murray Bookchin, 1970 Ecology and Revolutionary Thought Murray Bookchin, Ecology Action East, 1970
Ecology and Revolutionary Thought Murray Bookchin, 1968 *Ecology and Revolutionary Thought [by] Murray Bookchin* Lewis Herber, 1970* **Ecology and Revolutionary Thought** Lewis Herber, 1970* **Ecology and revolutionary thought with the Ecology action east manifesto** Lewis Herber, 1970 **Toward an Ecological Society** Murray Bookchin, 2024-03-05 Visionary essays from a founder of the modern ecology movement In this collection of essays Murray Bookchin's vision for an ecological society remains central as he addresses questions of urbanism and city planning technology self management energy utopianism and more Throughout he opposes efforts to reduce ecology to a toothless environmentalism a task as vital today as when these essays were first published Written between 1969 and 1979 the essays in this collection represent a fascinating and fertile period in Bookchin's life Coming out of the unfulfilled promise of the sixties and trying to develop a revolutionary critique of social life that avoided the pitfalls of Marxism he was entering his creative intellectual peak He was laying the foundations of a truly social ecology a society based on decentralization interdependence democratic self management mutual aid and solidarity Presented with clarity and fervor these key works contain the kernels of concerns that would occupy him until his death in 2006 This edition also includes a new foreword by Dan Chodorkoff someone who was with Bookchin at the founding of his Institute for Social Ecology and who understands his work better than anyone Thinking Through the Environment Mark J. Smith, 2005-09-30 This reader brings together material from ecological thought environmental policy environmental philosophy social and political thought historical sociology and cultural studies The extracts tell the story of the way the natural environment has been understood in the modern world and how this has recently been questioned as contemporary societies are seen as characterised by uncertainty and complexity The literature guides the reader through the conventional grounds for thinking about rights and obligations in relation to future generations non human animals and the biotic communities bringing each into question This then leads into a critical examination of social and political theories and their capacity for drawing on ecological thought Each of the seven sections of readings is introduced by the editor who locates the set of readings within the specific themes and issues at the heart of each section This broad reaching and thought provoking set of readings stresses the diversity of response to environmental problems both within and between anthropocentric and ecocentric approaches and will encourage the reader to examine how they are manifested in the areas of environmental ethics policy analysis and social and political theory **The Ecopoetics of Entanglement in Contemporary Turkish and American Literatures** Meliz Ergin, 2017-10-11 This book foregrounds entanglement as a guiding concept in Derrida's work and considers its implications and benefits for ecocritical thought Ergin introduces the notion of ecological text to emphasize textuality as a form of

entanglement that proves useful in thinking about ecological interdependence and uncertainty She brings deconstruction into a dialogue with social ecology and new materialism outlining entanglements in three strands of thought to demonstrate the relevance of this concept in theoretical terms Ergin then investigates natural social entanglements through a comparative analysis of the works of the American poet Juliana Spahr and the Turkish writer Latife Tekin The book enriches our understanding of complicity and accountability by revealing the ecological network of material and discursive forces in which we are deeply embedded It makes a significant contribution to current debates on ecocritical theory comparative literature and ecopoetics

The Murray Bookchin Reader Janet Biehl, Murray Bookchin, 1999 This collection provides an overview of the thought of the foremost social theorist and political philosopher of the libertarian left today Best known for introducing ecology as a concept relevant to radical political thought in the early 1960s Murray Bookchin was the first to propose in the innovative and coherent body of ideas that he has called social ecology that a liberatory society would also have to be an ecological one His writings span five decades and encompass subject matter of remarkable breadth Bookchin s writings on revolutionary philosophy politics and history are far less known than the specific controversies that have surrounded him but deserve far greater attention Despite Bookchin s critical engagement with both Marxism and anarchism his political philosophy known as libertarian municipalism draws on the best

of both for the emancipatory tools to build a democratic libertarian alternative His nature philosophy is an organic outlook of generation development and evolution that grounds human beings in natural evolution yet contrary to today's fashionable anti humanism places them firmly at its summit Bookchin's anthropological writings trace the rise of hierarchy and domination out of egalitarian societies while his historical writings cover important chapters in the European revolutionary tradition Consistent throughout Bookchin's work is a search for ways to replace today's capitalist society which disenchants most of humanity for the benefit of the few and is poisoning the natural world with a more rational and humane alternative The selections in this reader constitute a sampling from the writings of one of the most pivotal thinkers of our era

How to be a Green Liberal Simon A. Hailwood, 2014-12-18 It is often claimed by environmental philosophers and green political theorists that liberalism the dominant tradition of western political philosophy is too focused on the interests of human individuals to give due weight to the environment for its own sake In *How to be a Green Liberal* Simon Hailwood challenges this view and argues that liberalism can embrace a genuinely green non instrumental view of nature The book's central claim is that nature's otherness its being constituted of independent entities and processes that do not reflect our purposes is a basis for value and can be incorporated within liberal political philosophy as a fundamental commitment alongside human freedom and equality Hailwood argues that the conceptual resources already exist within mainstream liberalism for a thoroughly non instrumental perspective Adopting a rigorous philosophical approach Hailwood tackles a wide range of themes across environmental ethics including holistic theories deep ecology eco feminism and eco anarchism as well as issues in value theory and political philosophy more generally In making the case for liberalism's green credentials *How to be a Green Liberal* is a formidable challenge to recent green political theory and will be required reading not only for students of political philosophy but for all those interested in the natural world and man's relationship to it
