Economic Impact Of The Demand For Ethanol:

The Economic Impact of the Demand for Ethanol Michael K. Evans, 1997 Ethanol production is the third largest user of corn behind only feed export uses Ethanol production uses approximately 7% of the nation's corn crop which increases farm income generates economic activity nationwide This report is the first comprehensive analysis of the macroeconomic impacts of ethanol production The conclusions in this report verify the cost effectiveness of the federal ethanol program In short the partial excise tax exemption provided for ethanol blends is a non inflationary incentive that creates jobs stimulates tremendous economic activity reduces our trade imbalance

The Economic Impact of Public Support to Agriculture Virgil Ball, Roberto Fanfani, Luciano Gutierrez, 2010-07-27 Despite a gradual and sustained decline in the contribution of agriculture to the economies of the member countries of the Organization for Economic Cooperation and Development OECD the sector remains socially and politically important Although agriculture accounts for less than 2% of the gross domestic product of the OECD countries it occupies over 35% of their total land area Predominantly rural regions where agriculture remains particularly important contain almost one quarter of the population of OECD countries The past quarter century has witnessed significant changes in agricultural policies in OECD countries Although total support remains high a shift has taken place from price linked measures to direct income support most notably in the European Union Policies have been adapted to meet pressing social concerns such as ensuring food security and improving environmental quality OECD countries face major economic issues due to the ageing of their populations and the need to adapt to globalization and increasing competition from emerging economies Continued pressure to reform agricultural policies will be exerted by the need to economize on the use of scarce public resources At the same time agriculture faces new challenges generated by climate change the greening of the economy increasing scarcity of energy and water and the demands placed on the food system by an expanding world population

Effects of Increased Biofuels on the U.S. Economy in 2022 Mark Gehlhar, 2011-04 Achieving greater energy security by reducing dependence on foreign petroleum is a goal of U S energy policy The Energy Independence and Security Act calls for a Renewable Fuel Standard RFS 2 which mandates that the U S increase the volume of biofuel that is blended into transportation fuel from 9 to 36 billion gallons from 2008 to 2022 This report examines how meeting the RFS 2 would affect various components of the U S economy If biofuel production advances with cost reducing

technology and petroleum prices continue to rise as projected the RFS 2 could provide economywide benefits However the actual level of benefits depends on future oil prices and whether tax credits are retained Illus A print on demand publication

Socio-Economic Impacts of Bioenergy Production Dominik Rutz,Rainer Janssen,2014-02-23 Around the world many countries are increasing efforts to promote biomass production for industrial uses including biofuels and bio products such as chemicals and bio plastic Against a backdrop of lively public debate on sustainability bioenergy yields both positive and negative impacts upon a variety of environmental and socio economic issues These include property rights labor conditions social welfare economic wealth poverty reduction and more This book discusses the issues and impacts of bioenergy taking into account the local and regional framework under which bioenergy is produced touching upon educational level cultural aspects the history and economies of the producing countries and an array of policies including environmental and social targets The book surveys and analyzes global bioenergy production from a number of perspectives The authors illustrate the complexity of interrelated topics in the bioenergy value chain ranging from agriculture to conversion processes as well as from social implications to environmental effects It goes on to offer insight on future challenges associated with the expected boom of a global bio based economy which contributes to the paradigm shift from a fossil based to a biomass and renewable energy based economy The expert contributors include researchers investors policy makers representatives from NGOs and other stakeholders from Europe Africa Asia and Latin America Their contributions build upon the results of the Global Bio Pact project on Global Assessment of Biomass and Bio product Impacts on Socio economics and Sustainability which was supported by the European Commission in its 7th Framework Program for Research and Technological Development conducted from February 2010 to January 2013 The book benefits policy makers scientists and NGO staffers working in the fields of agriculture forestry biotechnology and energy
