Economic Problems of Modern Life, by S. Howard Patterson ... and Karl W. H. Scholz ... Samuel Howard Patterson, 1927

**The UK Regional-National Economic Problem** Philip McCann, 2016-03-10 In recent years the United Kingdom has become a more and more divided society with inequality between the regions as marked as it has ever been In a landmark analysis of the current state of Britain's regional development Philip McCann utilises current statistics examines historical trends and makes pertinent international comparisons to assess the state of the nation The UK Regional National Economic Problem brings attention to the highly centralised top down governance structure that the UK deploys and demonstrates that it is less than ideally placed to rectify these inequalities The North South divide in the UK has never been greater and the rising inequalities are evident in almost all aspects of the economy including productivity incomes employment status and wealth Whilst the traditional economic dominance of London and its hinterland has continued along with relative resilience in the South West of England and Scotland in contrast the Midlands the North of England Northern Ireland and Wales lag behind by most measures of prosperity This inequality is greatly limiting national economic performance and the fact that Britain has a below average standard of living by European and OECD terms has been ignored The UK's economic and governance inequality is unlikely to be fundamentally rebalanced by the current governance and connectivity trends although this definitive study suggests that some areas of improvement are possible if they are well implemented This pivotal analysis is essential reading for postgraduate students in economics and urban studies as well as researchers and policy makers in local and central government

*Methodology of Islamic Economics* Necmettin Kizilkaya, 2019-11-05 In its pursuit to equip the reader with a basic knowledge of Islamic economics this book divulges the micro foundations of the discipline and highlights the predominant schools of thought that exist in the field It explains in simple terms what Islamic economics entails and how it can be studied as a science in relation to the Holy Quran the Sunnah and the Islamic intellectual tradition based on these two sources The book familiarizes the reader with knowledge of the basic maxims of the discipline It then establishes the arguments that are presented by the proponents of religion based economics specifically Islam and apprises readers about the aforementioned schools as they exist A number of chapters consider the dimension of the dilemmas the discipline is facing and the chronological progress of the field is reviewed hence providing a comprehensive overview of the topic The book deals with the issues about the origins of Islamic economics the basic methodological questions the use of the

opportunities offered by fiqh in the methodological discussions and the main problems arising from the encounter with other cultures and civilizations. It offers practical solutions despite the differing schools of thought not unlike the development of conventional Economics where radical differences between Keynesian Classical and Monetarist approaches existed. It concludes by incorporating some of the finest works that explain to the reader how Islamic economics may progress as a discipline. This guide will provide both students and researchers in Comparative Economic Studies Islamic Economics and Islamic Finance with an essential overview of the field.

Economics, Volume 2: Modern Economic Problems Frank A. Fetter, 2020

Professor Fetter's Economic Principles is the second half of a two volume treatise on economics. The first half Economic Principles deals with the basics. The author of this volume is one of the great American economists. His contributions to economic literature have been notable and while it would of course be too much to say that they have won universal acceptance it can safely be affirmed that they have quite generally been accorded respectful and sympathetic attention. Professor Fetter occupies a place of distinction not only as a thinker and writer in the field of economics but also as a university teacher. Several years ago he served also as President of the American Economic Association. Few are better qualified therefore to prepare a general treatise on economics. This volume constitutes the second part of a work dealing with the principles of economics which in some respects may be regarded as a revision of Professor Fetter's Principles of Economics published as a single volume. But the treatment of the principles of value and distribution in volume I of the new work differs materially if not radically from that in the earlier text and at the same time as Professor Fetter himself remarks the years since have been so replete with interesting happenings in the field of practical problems that volume II represents more than a mere revision of the corresponding chapters in the earlier book. Hence the present volumes taken together must be regarded as an essentially new contribution. Considering the variety of economic problems that Professor Fetter discusses it seems extraordinary that he has been able to compress his treatment within the limits of a comparatively small book. His success in this direction however has been due to his method of treatment. While essential facts have not been neglected he has not attempted to give an encyclopedic description of all the elements involved in the several problems but he has confined himself rather to a setting forth of the points of principle involved in them suggesting in this connection the solutions which sound analysis and a healthy for as a writer it will appear superfluous to speak of style. But for those who may not know let it be said that Professor Fetter writes with a nicety and clearness of expression and with a delicacy of touch and of humor that stamp him as a writer of the first class.
