The Theory of the Leisure Class (Unabridged) Thorstein Veblen, 2010-11 The Theory of the Leisure Class was first published in 1899 by the Norwegian American economist and sociologist Thorstein Veblen while he was a professor at the University of Chicago The Theory of the Leisure Class is considered one of the first detailed critiques of consumerism In the book Veblen argues that economic life is driven not by notions of utility but by social vestiges from pre historic times Drawing examples from the contemporary period and anthropology he held that much of today s society is a variation on early tribal life According to Veblen beginning with primitive tribes people began to adopt a division of labor along certain lines The higher status group monopolized war and hunting while farming and cooking were considered inferior work He argued this was due to barbarism and conquest of some tribes over others Once conquerors took control they relegated the more menial and labor intensive jobs to the subjugated people while retaining the more warlike and violent work for themselves It did not matter that these menial jobs did more to support society in Veblen s view than the higher ones Even within tribes that were initially free of conquerors or violence Veblen argued that certain individuals upon watching this labor division take place in other groups began to emulate the behavior in higher status groups Veblen referred to the emerging ruling class as the leisure class He argued that while this class did perform some work and contributed to the tribe s well being it did so in only a minor peripheral and largely symbolic manner For example although hunting could provide the tribe with food it was not as productive or reliable as farming or animal domestication and compared with the latter types of work was relatively easier to perform Likewise while tribes occasionally required warriors if a conflict broke out Veblen argued that militaristic members of the leisure class retained their position and with it exemption from menial work even during the extremely long stretches of time when there was no war even though they were perfectly capable of contributing to the tribe s menial work during times of peace At the same time Veblen claimed that the leisure class managed to retain its position through both direct and indirect coercion For example the leisure class reserved for itself the honor of warfare and often prevented members of the lower classes from owning weapons or learning how to fight At the same time it made the rest of the tribe feel dependent on the leisure class s continued existence due to the fear of hostilities from other tribes or as religions began to form the hostility of imagined deities Veblen argued that the first priests and religious leaders were members of the leisure class To Veblen society never grew out of this stage it simply evolved different forms and expressions For example he noted that during the Middle Ages only the nobility was allowed to hunt and fight wars Likewise in modern times he noted that manual laborers usually make less money than white collar workers

conspicuous consumption offers a satiric examination of the hollowness and falsity of many cherished standards of taste education dress and culture Almost a century after its original publication The Theory of the Leisure Class is as fresh and relevant as ever In the tradition of Adam Smith's The Wealth of Nations and Thomas Hobbes's Leviathan The Theory of the Leisure Class provides a surprisingly contemporary look at American economics and society As Thorstein Veblen's most famous work it become an archetype not only of economic theory but of historical and sociological thought Though readers might expect one of the great classics of economic theory to be either technical or dull Thorstein Veblen's book is stylishly written endlessly startling and funny as well Verblen's expose of conspicuous consumption is as relevant today as it was in 1899 if not more so Whether or not you agree with all that he says it's thought provoking and exciting stuff Now a classic of economic theory as well as a text book of social science The Theory of the Leisure Class describes the tendencies of consumerism leisure and the materialization of the ideals of the aspiring new princes or nouveau rich of society Veblen's vibrant satire of the tendency of the modern individual to believe that real accomplishment is all about acquiring a condition of ostentatious wealth and status and his analysis of the inception of modern class structure in America still stand a century after as recommended reading for historians and economists

The institution of a leisure class is found in its best development at the higher stages of the barbarian culture as for instance in feudal Europe or feudal Japan In such communities the distinction between classes is very rigorously observed and the feature of most striking economic significance in these class differences is the distinction maintained between the employments proper to the several classes The upper classes are by custom exempt or excluded from industrial occupations and are reserved for certain employments to which a degree of honour attaches Chief among the honourable employments in any feudal community is warfare and priestly service is commonly second to warfare If the barbarian community is not notably warlike the priestly office may take the precedence with that of the warrior second But the rule holds with but slight exceptions that whether warriors or priests the upper classes are exempt from industrial employments and this exemption is the economic expression of their superior rank Brahmin India affords a fair illustration of the industrial exemption of both these classes In the communities belonging to the higher barbarian culture there is a considerable differentiation of sub classes within what may be comprehensively called the leisure class and there is a corresponding differentiation of employments between these sub classes

The Theory of the Leisure Class Thorstein Veblen, 2020-02-24 The Theory of the Leisure Class An Economic Study of Institutions 1899 by Thorstein Veblen is a treatise on economics and a detailed social critique of conspicuous consumption as a function of social class and of consumerism derived from the social stratification of people and the division of labour which are social institutions of the feudal period 9th 15th c that have continued to the modern era Veblen asserts that the contemporary lords of the manor the businessmen who own the means of production have employed themselves in the economically unproductive practices of conspicuous consumption and conspicuous leisure which are useless activities that contribute neither to the economy nor to the material production of the useful goods and services required for the functioning of society while it is the middle class and the working class who are usefully employed in the industrialised productive occupations that support the whole of society Conducted in the late 19th century Veblen's socio economic analyses of the business cycles and the consequent price politics of the U S economy and of the emergent division of labour by technocratic speciality scientist engineer technologist etc proved to be accurate sociological predictions of the economic structure of an industrial society The Theory of the Leisure Class An Economic Study of Institutions 1899 presents the evolutionary development of human institutions social and economic that shape society such as how the citizens earn their livelihoods wherein technology and the industrial arts are the creative forces of economic production That such production of goods and services was not merely the means of meeting the material needs of society but of earning profits for the owners of the means of production That the industrial production system required the workers men and women to be diligent efficient and co operative whilst the owners businessmen and businesswomen concerned themselves with making money and with the public display of their accumulated wealth and that such behaviours conspicuous consumption and conspicuous leisure survived from the predatory barbarian past of the tribal stage of modern society Originally published as The Theory of the Leisure Class An Economic Study in the Evolution of Institutions 1899 the book arose from three articles that Veblen published in the American Journal of Sociology i The Beginning of Ownership ii

The Barbarian Status of Women and iii The Instinct of Workmanship and the Irsomeness of Labour 1898 99 which presented the major themes of economics and sociology that he later developed in works such as The Theory of Business Enterprise 1904 about how incompatible are the pursuit of profit and the making of useful goods and The Instinct of Workmanship and the State of the Industrial Arts 1914 about the fundamental conflict between the human predisposition to useful production and the societal institutions that waste the useful products of human effort The Economic Theory of the Leisure Class
