Economic Thinking And Pollution Problems:

Economic Thinking and Pollution Problems Douglas Auld, 1972-12-15 The purpose of this collection is to provide the student with an introduction to the way in which the discipline of economics tackles the problems posed in affluent societies by their various waste products Pollution economics introduces a student to aspects of price economics public finance and political economy in relation to a pressing and complex public concern The work includes a number of Canadian statements on pollution and its control in this country and gives the text of two recent pieces of legislation on the topic The selections in this volume present a wide variety of opinions ideas and facts about the economic dimension of the ecological crisis Pollution costs money pollution abatement also costs money and these costs will have to be paid somehow by some people The contributors politicians businessmen and professors explore the problem of pollution and its control as each sees it and the volume as a whole should help encourage a greater awareness both of economics as a way of thinking and of the difficulties in making the right public policies

Economic Thinking and Pollution Problems Douglas Allen Lauriston Auld, 1972
Cost Analysis of Water Pollution Control Dennis P. Tihansky, 1973 **New Concepts in Air Pollution Research** Willums, 2013-11-11 Recent publications on the fate of our limited earth have stirred up vivid worldwide discussions during which it became clear that our knowledge of the complex ecosystem is far from sufficient today All planning and predictive models are only as good as the input data they are based on Improved research methods and new ideas and impulses are therefore urgently needed both to stimulate the specialized scientists and to supply the concerned citizen with the updated background information necessary to make responsible decisions Generally most of the serious publications in the field of pollution are written by well known and well established scientists It is beyond doubt that their experience and profound knowledge is an essential contribution to the understanding of our environment But one whole group of scientists has not been able to present their ideas and concerns to a broader scientific or non scientific readership the young scientist at the beginning of his career He belongs to a new generation of scientists who have studied during a time when environmental concern has become a vital part of the university life Now in the first decade of his academic career his educational approach and his developing expertise in this field may synthesize ideas that will fall on what is already a fertile ground for new concepts that are urgently needed to solve the environmental crisis

Economics and the Environment Ian Wills, 2020-09-13 Coordinating our use of the earth's natural resources is not easy Resource users are many their goals diverse and their impacts on the environment often uncertain How we use those resources depends on the signals

and incentives we receive from either the market or our governments These systems encourage certain uses of natural resources but they are not perfect We harm the environment not out of malice but because we do not know the consequences of our actions or the incentives for harm are too great to ignore Economics and the Environment argues that by lowering the cost and improving the quality of the necessary signals and incentives we can better reconcile our diverse interests in the environment It introduces an economic way of thinking about environmental issues without assuming a background in economics how the economy and the environment interact how resource use is coordinated in ideal market and planned economies the barriers to ideal signalling and incentives in real markets and real government planning the economist s tools for dealing with natural resource issues the uncertainty and complexity of environmental issues climate change water rights air pollution and overharvesting of common resources This second edition of Economics and the Environment is fully updated and includes new material on sustainability valuation of environmental changes the prospects for international cooperation under the Kyoto Protocol and the problems of defining and enforcing measures to protect biodiversity It offers students in both economics and environmental studies programs a coherent framework for understanding our major environmental problems Ian Wills succeeds in providing a fresh perspective a very interesting and informative textbook Economic Record

The Economic Theory and Measurement of Environmental Benefits Per-Olov Johansson,1987-10-29 A comprehensive survey of developments in the theory of measurement of welfare is applied to issues relevant to environmental economics in this advanced study *Economic Theory for Environmentalists* John Gowdy,2020-02-10 Economic Theory for Environmentalists is a much needed and heralded new book that examines the implications of neoclassical economic theory and how it relates to the environment and environmental activity It addresses the ongoing conflict between market forces and environmental integrity and explains how neoclassical economic theory views the relationship between economic activity and the natural world Each chapter outlines the concepts of economic theory and the relevance of its environmental and policy implications It focuses on both micro and macro economics Policy tools such as price and income elasticities consumer surplus and methods for measuring the economic value of environmental resources are discussed A case study which examines a range of policy options is presented Examples are also given throughout the text to illustrate regional and international policy questions Presented in a simple and easy to understand manner this valuable book is suited for anyone dealing with environmental economic or policy issues *Environment and Social Theory* John Barry,2007-01-24 This thematic rather than theorist centred approach is an essential guide to the way in which the environment and social theory relate to one another including examinations of the works of the key theorists including Marx Mill Habermas and Adorno
