Economies and Politics in the Aztec Realm Mary G. Hodge, Michael Ernest Smith, 1994 The Seventeen papers in this collection deal with various aspects of the relationship between economics and the political units which constituted the Aztec state and its main competitor the Tarascan empire Until recently Aztec studies were dominated by two rather narrow foci a preoccupation with the Aztec capital of Tenochtitlan coupled with neglect of other cities and the rural countryside and an over emphasis on the best known Native and Spanish chronicles which ignored the vast corpus of lesser known but equally important documentary sources Fortunately a few archaeologists and ethnohistorians including the contributors to this volume insisted on expanding the geographical and conceptual parameters of Aztec studies They also began to employ recent innovative approaches in archaeology locational geography economics political theory and history in their quest to understand what really happened in central Mexico during the Postclassic period The result has been some very exciting new perspectives on this fascinating topic Richard A Diehl Professor of Anthropology University of Alabama

Bey,2022-08-23 Pottery is one of the most important classes of artifacts available to archaeologists and anthropologists Every year volumes of data are generated detailing ceramic production distribution and consumption How these data can be interpreted in relation to the social and cultural framework of prehistoric societies

in Mesoamerica is the subject of this book. Nine chapters written by some of the most well known and respected scholars in the field offer readers an in depth look at key advances from the past fifteen years. These scholars examine ethnoarchaeological studies and the Preclassic Formative Classic and Postclassic periods and cover geographic areas from eastern to central Mesoamerica. In a series of case studies contributors address a range of new and developing theories and methods for inferring the technological organizational and social dimensions of pottery economics and draw on a range of sociopolitical examples. Specific topics include the impacts and costs of innovations the role of the producer in technological choices the outcomes when errors in vessel formation are tolerated or rectified the often undocumented multiple lives and uses of ceramic pieces and the difficulties associated with locating and documenting ceramic production areas in tropical lowlands.
