Mystery of Mysteries Lucyle T Werkmeister Professor of Philosophy and Director of the Program in the History and Philosophy of Science Michael Ruse,Michael Ruse,2009-06-01 With the recent Sokal hoax the publication of a prominent physicist s pseudo article in a leading journal of cultural studies the status of science moved sharply from debate to dispute Is science objective a disinterested reflection of reality as Karl Popper and his followers believed Or is it subjective a social construction as Thomas Kuhn and his students maintained Into the fray comes Mystery of Mysteries an enlightening inquiry into the nature of science using evolutionary theory as a case study Michael Ruse begins with such colorful luminaries as Erasmus Darwin grandfather of Charles and Julian Huxley brother of novelist Aldous and grandson of T H Huxley Darwin s bulldog and ends with the work of the English game theorist Geoffrey Parker a microevolutionist who made his mark studying the mating strategies of dung flies and the American paleontologist Jack Sepkoski whose computer generated models reconstruct mass extinctions and other macro events in life s history Along the way Ruse considers two great popularizers of evolution Richard Dawkins and Stephen Jay Gould as well as two leaders in the field of evolutionary studies Richard Lewontin and Edward O Wilson paying close attention to these figures cultural commitments Gould s transplanted Germanic idealism Dawkins s male dominated Oxbridge circle Lewontin s Jewish background and Wilson s southern childhood Ruse explicates the role of metaphor and metavalues in evolutionary thought and draws significant conclusions about the cultural impregnation of science Identifying strengths and weaknesses on both sides of the science wars he demonstrates that a resolution of the objective and subjective

debate is nonetheless possible      *International Rivalry and Secret Diplomacy in East Asia, 1896-1950* Bruce Elleman, 2019-08-30 East Asia was a major focus of struggle between the United States and the Soviet Union during the Cold War of 1945 to 1991 with multiple hot and cold conflicts in China Korea and Vietnam The struggle for predominance in East Asia however largely predated the Cold War as this book shows with many examples of the United States and Russia the Soviet Union working to exercise and increase control in the region The book focuses on secret treaties 26 of them signed from the mid 1890s through 1950 when secret agreements between China and the USSR including several concerning the Chinese Eastern Railway gave Russia greater control over Manchuria and Outer Mongolia One of the most important was negotiated in 1945 when Stalin signed the Sino Soviet Friendship Treaty with Chiang Kai shek and the Chinese Nationalists that included a secret protocol granting the Soviet Navy sea control over the Manchurian littorals This secret protocol excluded the US Navy from landing Nationalist troops at the major Manchurian ports thereby guaranteeing the Chinese Communist victory in Northeast China from Manchuria the Chinese Communists quickly spread south to take all of Mainland China To a large degree therefore this formerly undiscussed secret diplomacy set the underlying conditions for the Cold War in East Asia      **Language in Cognition** Cedric Boeckx, 2010-04-29 This textbook explores the ways in which language informs the structure and function of the human mind offering a point of entry into the fascinating territory of cognitive science Focusing mainly on syntactic issues Language in Cognition is a unique contribution to this burgeoning field of study Guides undergraduate students through the core questions of linguistics and cognitive science and provides tools that will help them think about the field in a structured way Uses the study of language and how language informs the structure and function of the human mind to introduce the major ideas in modern cognitive science including its history and controversies Explores questions such as what does it mean to say that linguistics is part of the cognitive sciences how do the core properties of language compare with the core properties of other human cognitive abilities such as vision music mathematics and other mental building blocks and what is the relationship between language and thought Includes an indispensable study guide as well as extensive references to encourage further independent study      **Markers of Psychosocial Maturation** Mufid James Hannush, 2021-07-15 This book advances an integrative approach to understanding the phenomenon of psychosocial maturation Through a rigorous dialectically informed interpretation of psychoanalytic and humanistic existential phenomenological sources Mufid James Hannush distills thirty essential markers of maturity The dialectical approach is described as a process whereby lived affect and value laden polar meanings are transformed through deep insight into complementary and integrative meta meanings The author demonstrates how responding to the call of maturation can be viewed as a life project that serves the ultimate purpose of living a balanced life The book will appeal to students and scholars of human development psychotherapy social work philosophy and existential humanistic and phenomenological psychology      **Guy de Maupassant's Selected Works (First International Student Edition) (Norton Critical**

**The Pain Mothers Must Never Expose:** Michelann Parr, 2024-07-04 In this collection, contributors reject the narrative that suggests that the pain of mothers must never be exposed. They allow their pain to wander outside the frame of the requisite pathos. Individual pieces reveal pain to be a complex and intersectional practice that encompasses denial and disenfranchisement, where pain is birthed and named, disorientation leading to a search for stable ground, destabilization that inspires non-normative mothering and discovery as an active stance that transforms intergenerational pain. As contributors take up the challenge of unravelling their stories, they reach for a life-sustaining and hopeful shift in consciousness that allows them to listen to what pain has to offer without judgment, to imagine and create a different future for themselves, their children, and the world, and to let go of maternal pain and suffering as a way of being. Readers will be inspired by raw honesty, authenticity, and willingness to embrace story as a gift to self.

**Movies and the Modern Psyche** Sharon Packer MD, 2007-09-30 By looking at the interactions between cinema and psychology, Packer offers readers clear and basic insights into some of the most fundamental reasons why film is such an important influence upon our lives today. *Movies and the Modern Psyche* first describes the basic concepts of psychoanalysis, experimental psychology, behavioral conditioning, and hypnosis, which have all played major roles in the histories of both film and psychiatry. It then goes on to discuss the recent rise in film therapy, drug treatments, treatment for drug abuse, and the closing of asylums, to show how shifts in treatment techniques, theories, and settings are foreshadowed and fossilized by film. Psychology and cinema are kindred cousins, born at the same time and developing together, so that each influences the other. From the mind-controlling villains that occupy early horror films and Cold War thrillers like *Caligari*, *Mabuse*, and *The Ipcress File* to the asylums that house numberless political allegories and personal dramas in *Shock Corridor*, *Spellbound*, *One Flew over the Cuckoo's Nest*, and *Girl Interrupted*, to the drugs, phobias, and disorders that pervade so many of our favorite films, including as a small sample *Vertigo*, *Night of the Hunter*, *Psycho*, *Rainman*, *Fight Club*, *Requiem for a Dream*, and *Batman Begins*, there is no escaping either psychology in the movies or the movies in psychology. By looking at the interactions between cinema and psychology, this book offers readers clear and basic insights into some of the most fundamental reasons why film is such an important influence upon our lives today. *Movies and the Modern Psyche* first describes the basic concepts of psychoanalysis.
