Edible Oil Processing:

Edible Oil Processing Wolf Hamm, Richard J. Hamilton, Gijs Calliauw, 2013-05-28 Oils and fats are almost ubiquitous in food processing whether naturally occurring in foods or added as ingredients that bring functional benefits. Whilst levels of fat intake must be controlled in order to avoid obesity and other health problems, it remains the fact that fats along with proteins and carbohydrates are one of the three macronutrients and therefore an essential part of a healthy diet. The ability to process oils and fats to make them acceptable as part of our food supplies is a key component in our overall knowledge of them. Without this ability, the food that we consume would be totally different and much of the flexibility available to us as a result of the application of processing techniques would be lost. Obviously, we need to know how to process fatty oils, but we also need to know how best to use them once they have been processed. This second edition of *Edible Oil Processing* presents a valuable overview of the technology and applications behind the subject. It covers the latest technologies which address new environmental and nutritional requirements as well as the current state of world edible oil markets. This book is intended for food scientists and technologists who use oils and fats in food formulations as well as chemists and technologists working in edible oils and fats processing.

Practical Guide to Vegetable Oil Processing Monoj Gupta, 2017-02-16 *Practical Guide to Vegetable Oil Processing* Second Edition includes an up to date summary of the basic principles of edible oil refining, processing and deodorizing, serving as a hands on training manual for chemists, engineers and managers new to the industry. The 15 chapter book includes current information on the bleaching of green oils and coconut oil, quality requirements for frying oil applications and more. Written for the non chemist new to the industry, the book makes it simple to apply these important concepts for the edible oil industry. Provides insights to the challenges of bleaching very green oils. Includes new deodorizer designs and performance measures. Offers insights on frying oil quality management. Simple and easy to read language.

Edible Fats and Oils Processing David R. Erickson, 1990 *Nutritionally Enhanced Edible Oil Processing* Nurhan Turgut Dunford, H. Brian Dunford, 2004-04-30 This book provides a summary of research to help in the attainment of higher yields of beneficial compounds naturally present in edible fats and oils that can be obtained through new refining techniques or modifications of conventional methods, potentially leading to use of these products for disease prevention and treatment. It also provides a summary of research on modifications of natural lipids. The major emphasis is on vegetable sources of oils. Oil and oilseed processing is very complex, involving a number of unit operations. Readers will find this book helpful in learning about the fundamental concepts and practical information on oil and oilseed processing and their relevance to human nutrition and health.
