from the War of 1898 to the War on Terror Very little coordinated or sustained research has been devoted to the broader contours of America education and empire And third this volume seeks to inspire new directions in the study of American educational history **Education and Empire** Rebecca Swartz, 2019-01-09 This book tracks the changes in government

involvement in Indigneous children s education over the nineteenth century drawing on case studies from the Caribbean Australia and South Africa Schools were pivotal in the production and reproduction of racial difference in the colonies of settlement Between 1833 and 1880 there were remarkable changes in thinking about education in Britain and the Empire with it increasingly seen as a government responsibility At the same time children s needs came to be seen as different to

those of their parents and childhood was approached as a time to make interventions into Indigenous people's lives. This period also saw shifts in thinking about race. Members of the public, researchers, missionaries, and governments discussed the function of education considering whether it could be used to further humanitarian or settler colonial aims. Underlying these questions were anxieties regarding the status of Indigenous people in newly colonised territories: the successful education of their children could show their potential for equality.

Education for Empire Clif Stratton, 2016-01-19. Education for Empire brings together topics in American history often treated separately: schools, race, immigration, and empire building. During the Gilded Age and Progressive Era, American imperial ambitions abroad expanded as the country's public school system grew. How did this imperialism affect public education? School officials, teachers, and textbook authors used public education to place children, both native and foreign born, on multiple uneven paths to citizenship. Using case studies from around the country, Clif Stratton deftly shows that public schooling and colonialism were intimately intertwined. This book reveals how students from Asians in the U.S. West and Hawai'i to blacks in the South, Mexicans in the Southwest, and Puerto Ricans in the Caribbean and New York City grappled with the expectations of citizenship imposed by nationalist professionals at the helm of curriculum and policy. Students of American history, American studies, and the history of education will find *Education for Empire* an eminently valuable book.

Military Education and the British Empire, 1815-1949 Douglas E. Delaney, Robert C. Engen, Meghan Fitzpatrick, 2018-12-14. Common military education was the lifeblood of the armies, navies, and air forces of the British Empire. It permeated every aspect of the profession of arms and was an essential ingredient for success in both war and peace. *Military Education and Empire* is the first major scholarly work to address the role of military education in maintaining the empire throughout the nineteenth and twentieth centuries. Bringing together the world's top scholars on the subject, this book places distinct national narratives—Canadian, Australian, South African, British, and Indian—within a comparative context. The contributors examine military education within the British Empire as a generator of institutional knowledge, as a socializing agent, and as an enhancer of interoperability. This volume is the first to examine military education from a transnational perspective, which allows readers the opportunity to consider the connections between education and empire.

Educational Resources in the British Empire Tony Lyons, Noel Moloney, 2019-02-21. This book explores the impact of the Lesson Books of the National Board of Education in Ireland in the nineteenth century. The author contextualizes the books used in national schools as well as across the wider British Empire. In doing so, he highlights the influence of the religious, social, political, and cultural realms of the time. Firmly grounding the volume in its historical context, the author goes on to explore the contemporary moral climate and social influences, including imperialism, morality, rote learning, and socialization. Through meticulous analysis of each Lesson Book, the author traces the evolution of education in Ireland as a reflection of contemporary society as it changes and transforms in line with cultural, religious, and social changes. This pioneering and

comprehensive volume will be of interest and value to students and scholars of education in Ireland as well as education in the British Empire more widely

Missionaries and modernity Felicity Jensz, 2022-02-22 Many missionary societies established mission schools in the nineteenth century in the British Empire as a means to convert non Europeans to Christianity Although the details differed in various colonial contexts the driving ideology behind mission schools was that Christian morality was highest form of civilisation needed for non Europeans to be useful members of colonies under British rule This comprehensive survey of multi colonial sites over the long time span clearly describes the missionary paradox that to draw in pupils they needed to provide secular education but that secular education was seen to lead both to a moral crisis and to anti British sentiments

'Benefits Bestowed'? J. A. Mangan, 1988 The study of the European Union has historically been a theoretical battleground Since the 1990s new theoretical directions such as neo institutionalism multi level governance and constructivism have provided a new impetus However despite these new inroads empirical work has often remained sociologically and empirically underspecified This volume seeks to bridge the gap between theory and fieldwork by developing an actor centred political sociology In doing so the volume engages in a critical dialogue with the constructivist framework and proposes to build on its insights through a sociological hardening centred on European actors The renewal of European studies through political sociology is only useful if it generates new understandings through empirical observation This volume seeks to take a new tack on constructivism by asking what it is that Europe constructs by looking at three areas social spaces and professions policy problems and policies and policy instruments such as the Eurobarometer

Principles, Practices, and Creative Tensions in Progressive Higher Education Katherine Jelly, Alan Mandell, 2017-03-23 In this multi-faceted case study of one progressive institution of adult higher education, the editors and contributors to the volume lay out significant challenges confronting not just non-traditional post-secondary colleges and universities but all institutions of higher education in today's rapidly changing context. Contending that nontraditional institutions are especially challenged in these turbulent times, they argue that these organizations' distinctive academic programs are among the most threatened in the landscape of higher education today. The 19 essays that make up this volume highlight and examine key creative tensions, rich interplays of emphases and values in higher education in order to illuminate and address more intentionally the questions that we must address: Can we make constructive use of these tensions? Can we recognize what is at stake? And can we chart a course that will both respond innovatively to rapid change and sustain a vision and the purposes and principles on which that vision rests? Taken as a whole, this volume sheds light on the questions and creative tensions that can, with thoughtful attention, help to keep an alternative progressive vision of adult higher education alive.
