Education And Sustainability Responding To The Global Challenge:

Education and Sustainability International Union for Conservation of Nature and Natural Resources. Commission on Education and Communication, 2002 A publication from IUCN's Commission on Education and Communication CEC this book tells the stories of people who work with communities to motivate them to create a more sustainable future The accounts range from engaging communities through theatre to a revival of indigenous stories to pass on good environmental practice The publication was produced both to share what educators around the world have learnt and to give them a platform to tell their stories Handbook of Research on Applied Learning Theory and Design in Modern Education Railean, Elena, 2015-11-09 The field of education is in constant flux as new theories and practices emerge to engage students and improve the learning experience Research advances help to make these improvements happen and are essential to the continued improvement of education The Handbook of Research on Applied Learning Theory and Design in Modern Education provides international perspectives from education professors and researchers cyberneticists psychologists and instructional designers on the processes and mechanisms of the global learning environment Highlighting a compendium of trends strategies methodologies technologies and models of applied learning theory and design this publication is well suited to meet the research and practical needs of academics researchers teachers and graduate students as well as curriculum and instructional design professionals *Education for Sustainable Development* Brian Chalkley, Martin Haigh, David Higgitt, 2013-09-13 In 2005 The United Nations launched its Decade of Education for Sustainable Development which recognises that education including Higher Education is the key to the change in social attitudes that will be needed to protect the welfare of future generations This involves helping learners to live as though the future matters and to achieve ecoliteracy This includes the understanding that personal lifestyle decisions may have consequences ranging from climate change through loss of biodiversity to pollution and resource depletion that may permit environmental degradation on a planetary scale It also involves helping them to develop the skills needed to cope with such challenges This international collection of research papers and position statements from special issues of the Journal of Geography in Higher Education and Applied Environmental Education and Communication written by many of the leading practitioners in the field aims to provide resources and practical guidance for all seeking to promote and engage in education for a sustainable future Rabindranath Tagore encouraged each learner to make their actions demonstrate a harmonious union between education and environment David Orr argued that the world needs people who live well in their places to make the world both habitable and humane and that the main challenge for education is to help learners make their minds fit for life on Earth This book tries to chart a practical route towards these objectives This book was previously published as special issues of the Journal of Geography in Higher Education and Applied Environmental Education and Communication *Educational Response, Inclusion and Empowerment for SDGs in Emerging Economies* Mustafa Öztürk, 2022-08-22 This volume analyzes cases from

emerging economies in relation to the global endeavor to promote the vision of sustainable development in all forms of education. It aims to discuss the significance of hearing local voices and understanding local discourse regarding strategies for action for change and the role of educational systems as a means to communicate, promote and educate for the Sustainable Development Goals (SDGs). In this book, emerging economies are defined as newly industrialized countries that have not yet reached developed status but have in a macro economic sense outpaced their developing counterparts. In this context, the book highlights how education in emerging economies could extend conventional economic methods to sustainability issues or depart from money based calculations and business dominated values to promotion of real life considerations and ethical, environmental and humanistic values. With the help of this volume, readers will have a chance to look at educational response, inclusion and empowerment for SDGs in countries with emerging economies and to grasp the synthesis of Education for Sustainable Development, Global Citizenship Education (ESD/GCE) within the overall national educational systems. This volume focuses on early childhood through upper secondary education.

Young people, education, and sustainable development Peter Blaze Corcoran, Philip M. Osano, 2023-09-04

Young people have an enormous stake in the present and future state of Earth. Almost half of the human population is under the age of 25. If young people's resources of energy, time and knowledge are misdirected towards violence, terrorism, socially isolating technologies and unsustainable consumption, civilization risks destabilization. Yet there is a powerful opportunity for society if young people can participate positively in all aspects of sustainable development. In order to do so, young people need education, political support, resources, skills and hope. This volume offers a global perspective on education initiatives by and for young people that promote a transition to sustainability. It includes 38 essays co-authored by 68 contributors from 25 nations representing a diversity of geography, gender and generation. The development of youth leadership has been a central concern of my professional work. Young people have a lot to offer to sustainable development and should participate in planning for our planet's future. This rich collection of theoretical and practical approaches captures the growing response of young people to this challenge. I am particularly pleased with the attention paid to the role of often underrepresented regions of the world, to the role of women and to the Earth Charter in the creating of a peaceful and sustainable future.

Julia Marton-Lefèvre, Director General of IUCN International Union for Conservation of Nature and former Rector of the University for Peace. This book is a rich global tapestry depicting the inter-linkages among youth, education and sustainable development. What is particularly interesting is that it shows how education at all levels can be a powerful engine for promoting sustainability. This work is an important contribution to the United Nations Decade of Education for Sustainable Development.

Goolam Mohamedbhai, Secretary General, Association of African Universities and Past President, International Association of Universities. This important and skillfully prepared book comes at a critical time. A great strength of this volume is that it blends together theoretical and practical insights regarding education for sustainable development by and for young people.

It is written from diverse cultural perspectives from all world regions Readers from many fields especially young people and their teachers will find it timely and relevant I hope that it will inspire the younger generation to get involved in seeking solutions to the challenges we face James Gustave Speth Former Administrator of the United Nations Development Programme and Dean Emeritus of the School of Forestry and Environmental Studies at Yale University It is my hope that you are inspired as I have been by Young People Education and Sustainable Development Exploring Principles Perspectives and Praxis for the stories in this volume are full of the possibilities that emerge when we honor and support young people Ruud Lubbers Former Prime Minister of The Netherlands and past United Nations High Commissioner for Refugees

Rethinking Work and Learning Peter Willis, Stephen Mckenzie, Roger Harris, 2008-11-02 Rethinking a Sustainable Society Alan Mayne The world has already passed the midway point for achieving by 2015 the eight Millennium Development Goals for a more peaceful prosperous and just world that were set by the United Nations in the wake of its inspirational Millennium Declaration in 2000 These goals range from combating poverty hunger and disease to empowering women and ensuring environmental sustainability However Ban Ki Moon the United Nations Secretary General conceded in 2007 that progress to date has been mixed During 2008 the head of the United Nations World Food Programme cautioned that because of the surge in world commodity prices the program had insufficient money to stave off global malnutrition and the World Health Organization warned of a global crisis in water and sanitation Depressing news accounts accumulate about opportunities missed to achieve a fairer world order and ecological sustainability the manipulation of election results in Africa human rights abuses in China 4000 Americans dead and another nation torn apart by a senseless and protracted war in Iraq and weasel words by the world's political leadership in the lead up to negotiations for a climate change deal in 2009 that is supposed to stabilize global carbon dioxide emissions It is clear that the parameters of the debates that drive progressive policy change urgently require repositioning and energizing As is shown by the contributors to Rethinking work and learning experts in the humanities and social sciences HASS could have an important role to play in this process
