Understanding Undergraduates Celia Popovic, David A. Green, 2012-08-06 Most university teachers have ideas about the typical good or not so good student in their classes but rarely do they share these thoughts with others By keeping quiet about the preconceptions or stereotypes they harbour teachers put themselves at risk of missing key evidence to help them revise their beliefs more importantly they may fail to notice students in real need of their support and encouragement In this unique work the authors explore UK and US university teachers beliefs about their students performance and reveal which beliefs are well founded which are mistaken which mask other underlying factors and what they can do about them So is it true for instance that British Asian students find medicine more difficult than their white counterparts or that American students with sports scholarships take their studies less seriously Is it the case that students who sit at the front of the lecture hall get better grades than those who sit at the back By comparing students demographic data and their actual performance with their teachers expectations the authors expose a complex picture of multiple factors affecting performance They also contrast students comments about their own study habits with their views on what makes a good learner For each preconception they offer clear advice on how university teachers can redesign their courses introduce new activities and assignments and communicate effective learning strategies that students will be able to put into practice Finally the authors explore the ramifications of teachers beliefs and suggest actions that can

be taken at the level of the institution department or programme and in educational development events designed to level the playing field so that students have a more equitable chance of success Ideal for both educational developers and university teachers this book reveals general tendencies and findings that will inform developers own work with university teachers provides practical guidance and solutions for university teachers to be able to identify and address students actual rather than assumed needs explores means of addressing and challenging people s natural tendency to rely on preconceived ideas and stereotypes and explains an action research method that educational developers can use on their own campuses to unravel some of the local preconceptions that may be hampering student success

Excellence in Teaching and Learning in Higher Education Isabel Huet,Teresa Pessoa,Fátima Sol,2021 The initial idea for the book emerged during the seminar Sharing of Innovative Pedagogical Practices that occurred at the University of Coimbra Portugal in 2018 Like all good ideas this one originated in a conversation between colleagues from the University of Coimbra and the University of West London in the United Kingdom The idea of this book was to move away from sharing experiences related to teaching and learning in higher education in just one or two countries but instead to organise a more European view about the policy research and teaching practices that are shaping the way our students learn academics teach and do research We have a total of 16 chapters from academics in Portugal the United Kingdom Ireland Sweden the Netherlands Spain Italy and the Czech Republic The book is organised in four interrelated themes 1 policy and quality 2 professionalisation of teaching and academic development 3 research and teaching nexus and 4 pedagogy and practice Enjoy reading the book

A Resilience Approach to Acceleration of Sustainable Development Goals Mika Shimizu, 2022-11-09 This is the first book to articulate how to address interlinkages among sustainable development goals SDGs which are keys to implementing those goals by 2030 At the heart of the book is a resilience approach to the enabling relevant systems practices and education and research While SDGs are well known at different levels from local to global spheres a major gap can be seen between goals and approaches as approaches are lacking for addressing interlinkages among SDGs The United Nations General Assembly in 2015 acknowledged interlinkages

as being of crucial importance in ensuring the purpose of the goals. However, few actual approaches have been specified to address the interlinkages or interconnections at both the policy and practical levels. Thus, it is urgent to face the question of how to address the interlinkages by stakeholders not only policy communities and researchers but also practitioners and students, especially innovators who can go beyond existing boundaries. By highlighting that challenge, this book lays out a path for addressing interlinkages among SDGs by applying a resilience approach to the issues of a sustainable society. The resilience approach has been developed from combinations of different modes of thinking and practices, including the systems approach, systems and design thinking, and resilience thinking and practices. Based on this overarching approach, innovators seek out the relevance of that approach to their SDGs-related practices at the system, local, and educational levels. The book therefore serves as a guide to how the resilience approach can contribute to accelerating implementation of SDGs by 2030.

Sustainable Development Goals and Institutions of Higher Education Godwell Nhamo, Vuyo Mjimba, 2019-09-14. This volume brings together both theoretical and case study-based contributions to the implementation of the Sustainable Development Goals (SDGs) in Institutions of Higher Education (IHE), presenting an impactful combination of authors from both developing and developed countries. While most current publications addressing the SDGs and education focus on sustainable development in general and specific topics such as climate change or energy, this book attempts to accelerate the localisation of the SDGs by presenting opportunities and innovations offered in various universities and campuses regarding SDGs localisation. The book seeks to provide an important contribution to the global dialogue on IHE and the SDGs and will be of interest to academics and researchers engaged in the SDGs and education as well as government agencies and other interested stakeholders. The book focuses on curriculum and learning matters, research and development, as well as community engagement. Case studies detail the integration of SDGs in academic and professional development, new approaches to implementing sustainability science instruction, improvements in teaching practices to enhance teacher competence, and responsible management education. Additional focus is placed on the alignment of the SDGs in higher education with the other goals, emphasizing technological innovation for improved human health and environmental management and climate change policies and action plans. Interdisciplinary solutions for pressing environmental problems are also provided, making sure that no one is left behind in realising these global development goals.
