Pérez-Milans,2013-07-24 Shortlisted for the 2014 BAAL Book Prize This book explores the meaning of modernization in contemporary Chinese education It examines the implications of the implementation of reforms in English language education for experimental urban schools in the People s Republic of China P rez Milans sheds light on how national linguistic and cultural ideologies linked to modernization are being institutionally re produced legitimated and inter personally negotiated through everyday practice in the current context of Chinese educational reforms He places special emphasis on those reforms regarding English language education with respect to the economic processes of globalization that are shaping and being shaped by the contemporary Chinese nation state In particular the book analyzes the processes of institutional categorization of the good experimental school the good student and the appropriate knowledge that emerge from the daily discursive organization of those schools with special attention to the related contradictions uncertainties and dilemmas Thus it provides an account of the on going cultural processes of change faced by contemporary Chinese educational institutions under conditions of late modernity Winner of The University of Hong Kong s Faculty Early Career Research Output Award for outstanding book publication by the Faculty of Education Property Ownership and Private Higher Education in China Spring Su,2011-05-13 Recent decades have witnessed the proliferation in China of huge numbers of private universities and colleges in response to a wide ranging spectrum of socio economic and political demands under the country s flourishing market economy and its wholesale pursuit of decentralization This book explores the issue of property ownership an area which is regarded as an essential element in the attraction into the sector of local private institutions and foreign partnerships as well as in facilitating the future development of the country s existing institutions The focus throughout this book is primarily on the legal economic managerial and financial aspects of the relevant issues as well as other related topics such as consumer protections and fund raising activities A feasibility analysis and discussion is also provided on for profit universities and their potential market niches in China in recognition of the fact that the current regulations which allow private universities to maintain a non profit status whilst actually enjoying profit returns clearly provides some legitimacy to the phenomenon of for profit in disguise It is argued in this book that such quasi profit regulations may further exacerbate profiteering behavior whilst it is also noted that in the short term there is a clear need to provide adequate protections within the apparent hybrid version of an ownership system a system characterized by a mix of capitalism and socialism through the adoption of a definitive legal framework within which economic actors can coordinate their efforts through a mutually understood framework of action Finally it is clear that in the transition from the rule of the people to the rule of law legislation practices and compliance do not always go hand in hand in China thus the healthy development of the educational sector will undoubtedly require some time as well as the introduction of complementary mechanisms for such legislation to be fully enforced in practice This book concludes **Japanese Studies of Modern China since 1953** Noriko Kamachi,John K.
